ABSTRACT

It is being believed that Muslims do not do idol worship. It is myth. Before origin of the universe all things were in form of tachyons particles which are made up of two basic building blocks – Yang and Yin or mind and mass part of reality (Not set of informations Code PcPs – Originator of all sets of informatins Code PcPs). To understand concept of idol worship we have to understand Basic Building Blocks (B.B.B – Mind – CCP, Code PcPs or set of informations and CP and Mass – Fig. 1). The Creator B.B.B or Almighty B.B.B has considered them as smallest idols. Hence He has made idol picture of male and female parallel to these B.B.Bs Fig 1. The fundamental belief of all religions on which the base (Main Pillors) of all religions is stood are these two God particles and the fundamental worship is Idol worship of these two God particles. At the end of universe all sciences fundamentals (shapes, laws, and properties) would be no more but religious fundamental about God particles and their Idol worship would persist in form of “I” or “Satyam Shivum Sunderum” Muslim do believe that Allaha means The Creator only. After researching 99 names in the light of science and the paper published in Journal (1), we found that the word Allaha means – Primary God, Secondary God, tertiary God, trinity, and Tawhid in the light of science. His portrait Fig 14 represents Tachyon particle (One yang B.B.B and many Yins B.B.B) apart from Creation and Destruction of universe under control of Almighty B.B.B. The admiring of this Almighty B.B.B is Allaha ho Akbar. Worship of Tertiary God is also Idol worship as these are made up of smallest idol of the universe Fig 15. Hence All worships are Idol worship in this universe as all are made up of smallest idol called B.B.Bs, the true fundamental belief of all religions. This belief persists even after destruction of the universe in form of “I”.

Quantum Consciousness – According to Physicists and Biologist

The nature of consciousness remains deeply mysterious and profoundly important, with existential, medical and spiritual implication. We know what it is like to *be* conscious – to have awareness, a conscious ‘mind’, but who, or what, are ‘we’ who know such things? How is the subjective nature of phenomenal experience – our ‘inner life’ - to be explained in scientific terms? What consciousness actually *is*, and how it comes about remain unknown. The general assumption in modern science and philosophy - the ‘standard model’ - is that consciousness emerges from complex computation among brain neurons, computation whose currency is seen as neuronal firings (‘spikes’) and synaptic transmissions, equated with binary ‘bits’ in digital computing. Consciousness is presumed to ‘emerge’ from complex neuronal computation, and to have arisen during biological evolution as an adaptation of living systems, extrinsic to the makeup of the universe. On the other hand, spiritual and contemplative traditions, and some scientists and philosophers consider consciousness to be intrinsic, ‘woven into the fabric of the universe’. In these views, conscious precursors and Platonic forms preceded biology, existing all along in the fine scale structure of reality.

My research involves a theory of consciousness which can bridge these two approaches, a theory developed over the past 20 years with eminent British physicist Sir Roger Penrose. Called ‘orchestrated objective reduction’ (‘Orch OR’), it suggests consciousness arises from quantum vibrations in protein polymers called microtubules inside the brain’s neurons, vibrations which interfere, ‘collapse’ and resonate across scale, control neuronal firings, generate consciousness, and connect ultimately to ‘deeper order’ ripples in spacetime geometry. Consciousness is more like music than computation.

Colleagues Travis Craddock and Jack Tuszyński and I also study how anesthetics act in microtubules to erase consciousness, and with Jay Sanguinetti, John JB Allen and Sterling Cooley, we are studying how transcranial ultrasound (TUS) can be used noninvasively to resonate brain microtubules and treat mental, cognitive and neurological disorders.

Mind and Mass Realities (Das, 2014)

Fig. 1. Divine Mechanics Unit – CCP, CP and information s – Code PcPs with B-Bit – Mass

Atomic genetics is the branch of science where we investigate about fundamental interactions of the universe i.e. atomic transcription and translations. New words have been coined to understand hidden science of mind part of reality. Mind reality has been recognized as different faces by “I” about 5000 years back to Arjuna in Mahabharata as shown in Fig 1. It is just like to understand any language through Alphabets. These are (different faces) Alphabets of mind reality. One Mind reality has one face identity and the second mind reality has second face identity and so on. The facial expression represents phenomenon of intelligence and different faces represent different types of properties carrying property. The open eyes means property is activated while close eye means property is inactivated. In spite of carrying properties consciousness they also know how to conduct not only origin of universe but also how to create two different universe i.e. next creation could be different from this creation. In all, it is automatic system of the universe. The mind realities which are of good properties have devtas face identity (first five faces on both side) and those mind realities which are of bad properties have demons face identity (last four faces on both side). These are named as code PCPs or messenger atomic genes. The central face is CCP or Thought script where all thoughts of the universe are banked. It is bank of data of all information s of the universe. It is face identity of Anti mind particles as data of all information’s of the universe are stored as anti mind particles. It is the Time mind ness (biological clock) that keeps on expressing different thoughts from this thought script (CCP). There are four more faces (black bodies) shown on extreme left and right floating in fire are CPs (translating Atomic genes). That translates the messages and realizes it and reacts accordingly. (Das 2014)

The standard model not only modified rather it has been completed (Das, 2014) with introduction of energized gravitons, primary fermions, primary bosons, Basic Building Blocks, Mind and Tachyons as shown in Fig 3.

Participatory science has coined (Das, 2014) some new words and there are some words which already exist in physics. Both these words are defined here and the definitions are according to participatory science. It has no relation with the definitions given in modern physics.

1. Mass -The part which gives shape to the smallest mass unit i.e. basics building blocks (B. B. Bs.) is called mass.
2. Matter :-Mixture of fermions and bosons or only bosons which are made up of mass (B.B.Bs) and that is why we realize their shape is called matter.
3. Inertial mass :-Mass (smallest mass units i.e. B. B. Bs) having inertial properties (classical inertia) either absolute rest or uniform motion in straight line is called inertial mass. Or Number of B. B. Bs. Per unit space present in bigger units is called inertial mass. Or Total matter contained by the bigger units or total number of fermions and bosons contained by the bigger units is called inertial mass. Therefore it never changes from place to place.
4. Gravitational mass :- The mass (interacting surfaces) which takes part in gravity (divine energized gravitons theory) interaction (which is due to mind) is called gravitational mass. When gravity interaction increases (number of divine energized gravitons increases) the interacting mass (interacting surface) also increases or when interacting mass (interacting surfaces) increases, gravity interaction (number of divine energized gravitons) also increases. Therefore gravitational mass (interacting mass or surfaces) changes from place to place. It is the fed mind that decides gravity interaction. We shall discuss it in gravity chapter and in atomic genetics.
5. Pure m (matter) mass :-matter mass (smallest mass unit or B.B.B) which have got inertial property of absolute rest.
6. Energy mass:-Energy mass (smallest energy mass unit B.B.B) which have got inertial property of uniform motion in straight line and which also gives shape to the bigger energy mass (Higgs Bosons etc) units.
7. m (impure matter) of $E=mc^2$:-Matter particles (fermions) which have got spin property are called impure matter particles.

Prayer message formation in brain

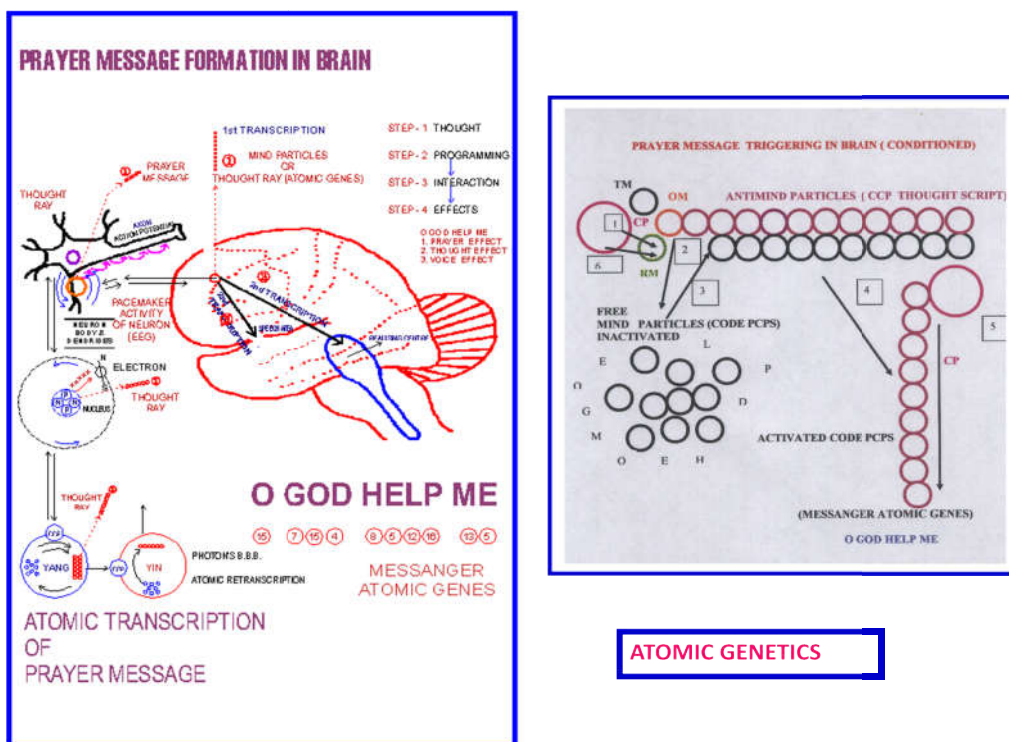

Fig. 4. Divine Mechanics - Prayer message formation in brain

In atomic transcription and translation of prayer (Das, 2014), following steps take place on Yang B.B.B – B-Bit as shown in Figure 4.

1. CP removes RM (repressor mindness-green) from OM (operating mindness -orange) thus induction of atomic transcription triggers.
2. OM triggers activation of free mind particles (black -inactivated code PCPs) of that thought script (magenta) of “o god help me”.
3. Free mind particles (black -inactivated code PCPs) get attached to anti mind particles script (magenta one) to form messenger thought script of “o god help me”.
4. Messenger atomic genes (black) get activated by anti mind particles thought script and further they get detached from anti mind particles thought script to form activated messenger atomic genes (activated code PCPs) (magenta) of “ o god help me”
5. CP carries phenomenon of splicing by translating the messenger activated atomic genes (activated code PcPs) and finally there is activated message of “o god help me” is formed.
6. CP represses atomic transcription by adding RM (green) to OM (orange). Thus atomic transcription gets halt.

Having formed the message it comes out in three forms.

In atomic genetic engineering (prayer) we use our basic power i.e. power of B.B.Bs. Our B.B.B. (higher center) talks with highest center of the universe by sending the message by first transcription. Till today nobody knows how does the brain generate thoughts. I am going to tell you that mystery too. In the frontal lobe the neurons are responsible for thought generation. In the neuron there is electrical activity called pacemaker activity which is occurring between dendrites and the body of the neuron. The membrane of the cell is made up of atoms and atom is made up of B.B.Bs. At the level of B.B.B. say thought of 'O GOD HELP ME' is expressed. As a result programmed messages of O GOD HELP ME (code PCPs) are formed. Out of three programmed messages, one is carried by atomic genes to highest center of the universe. It is called THOUGHT RAY (Quantum entanglement) which is made up of pure atomic genes and then the message goes through phenomenon called first transcription. They come out from brain directly. The other two messages are carried by photons from nucleus of atom to electrons. Here they are modulated on electrical activity of the cell called pacemaker activity. Further they are modulated on actions potentials going towards REALIZING CENTER situated in brain stem (RAS) and from RAS to speech area situated in the frontal area. Target B.B.Bs. of the realizing center finally realizes thought effect of O GOD HELP ME. While from speech area message goes to motor cortex again via RAS and from there to vocal cords and finally it comes out as a speech effect of O GOD HELP ME. In layman's terminology formation of the thought ray means PRAYER as shown in Fig 4

Where Does Prayer Message go ?

Prayer message goes as shown in Figure 5 to highest center of the universe via first transcription where it is realized and it is accepted, the highest center sends two messages to B.B.Bs working as higher center in cancer cell. These messages are message of inhibition of abnormal thought expression and message of activation of normal thought expression. Having received the messages, higher center stops expressing the abnormal thoughts and it starts expressing the normal thoughts. As a result, there are no more abnormal programmed messages and in place of that normal programmed messages are there. Now the messages have shifted from abnormal (5 and 6) to normal (2 and 3). This shifting of thought expression is called ATOMIC GENETIC ENGINEERING as shown in Figure 4.1

The changed messages reach to target B.B.Bs. through same route. Having received the changed messages, target B.B.Bs. stop expressing the previous programming and they start expressing the normal programming. As a result the cancer cells transmutate into normal cells. Or diseased cell gets cured (Harris, 1999) as shown in Fig 4.1

Message system of the Universe

Before the origin of the universe (Das, 2014) nature had only one type of message systems which is called FIRST TRANSCRIPTION. Messages (Code PcPs) used to go from one B.B.B. to another B.B.B. by atomic transcription. Messages were carried by atomic genes (Code PcPs) with very very high velocity. It is the fundamental message system. After the origin of the universe, nature created atoms. It also created one more message system called SECOND TRANSCRIPTION. Here the message (code PcPs) are carried by photons from one atom to another atom with velocity of light. Thus atoms, molecules, cells, and even individuals talk with one another. After the formation of the cell, nature created one more system called THIRD TRANSCRIPTION. Here there is a message storage system formed by DNA. There are messenger molecules called mRNA that carry message from DNA script to cytoplasm where the message (code PCPs) is read or translated by ribosome and they work accordingly. Thus the messages reach to enzymes and hormones and finally messages reach to target units. Having received the messages, target units work accordingly.

Finally life effects (metabolic) are observed. These three types of message systems are working in the nature. These message system are being used by the nature according to nature's need. as shown in Fig 5

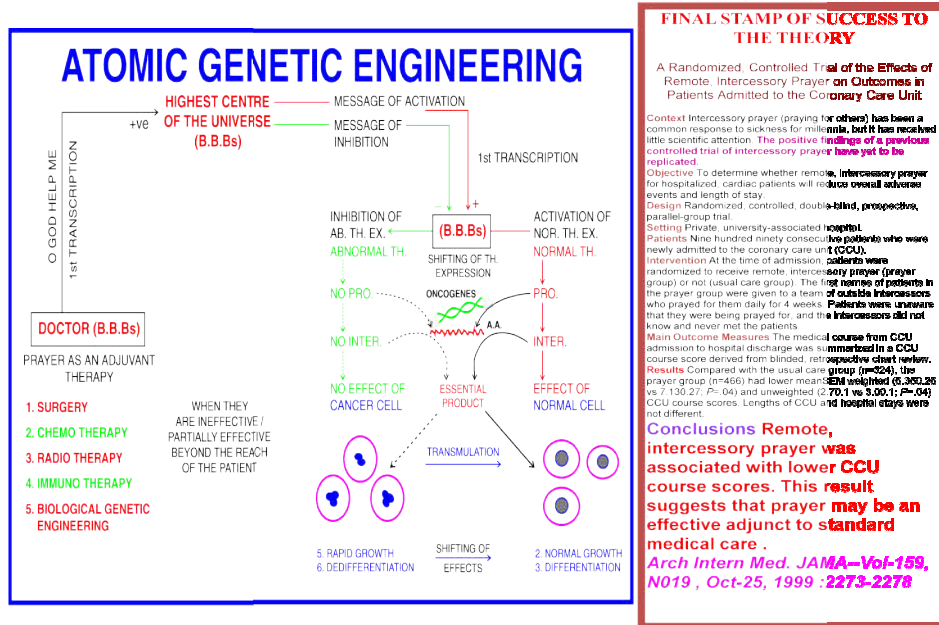

Fig. 4.1. A.G.E and Final stamp of success to New Theory (Harris, 1999)

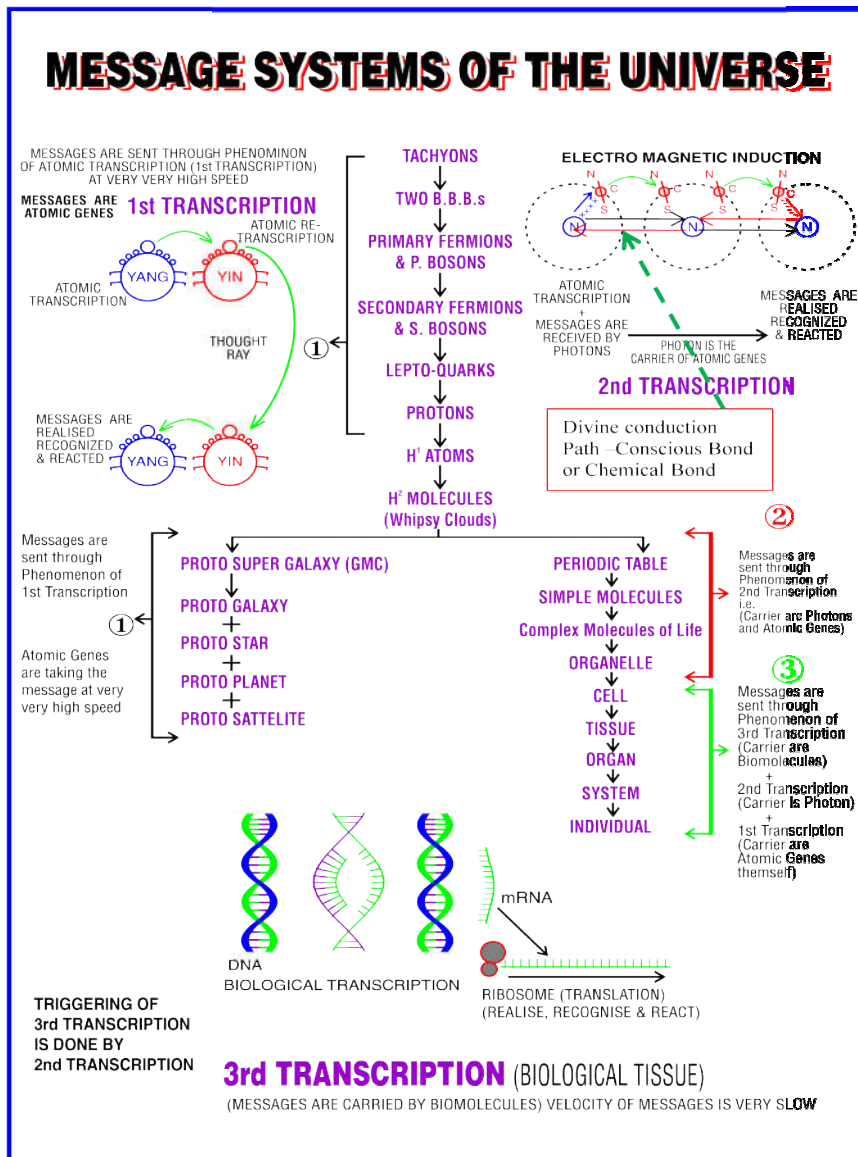

Fig. 5. Messages system of the universe

How does nature work & triggering of normal & abnormal effects

To understand creation physics as shown in Fig 6 and Fig 7.. There are two types of thought stimulation (Das, 2014). One is **CONDITIONED THOUGHT STIMULATION** and other one is **UNCONDITIONED THOUGHT STIMULATION**. **STIMULATION OF THOUGHT EXPRESSION** --- There are two types of thought expressions one is **CONDITIONED STIMULATION** of thought expression, and other one is **self stimulation of thoughts** i.e. **UNCONDITIONED STIMULATION** of thought expression. At the time of the origin of the universe, all effects got created. The cause of all effects of the universe is **THOUGHT** expression. These thought expressions were triggered by **UNCONDITIONED OR SELF STIMULATED WAY**. It is the first step and it is followed by **PROGRAMMING** or formation of programmed messages by code PCPs. This programmed message moves from higher centers to target B.B.Bs. it is called **INTERACTION**. Having received the messages, the mind and mass of the target B.B.Bs. work in a synchronized way so as to produced the effects as thought by a the higher center. If the thought expression by higher center is normal, the shapes, properties and laws produced by target B.B.Bs. would be normal and if the thought expressions are abnormal, the shapes, properties and laws would be abnormal. This is the basic concept of transmutation phenomenon. Finally what we observe is called **EFFECT**. Appearance of new shapes. properties and laws is called **TRANSMUTATION**. The first three steps are collectively called **CCP**. During transmutation process if CCP is written, it does mean that unless the thought, programming and interaction take place, nature cannot transmutate. Transmutation phenomenon is seen in particles, atoms, molecules and even in cells. The basic steps of any transmutation remain the same except that the thought expressions differ.

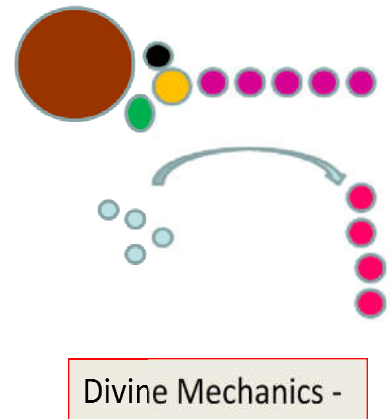

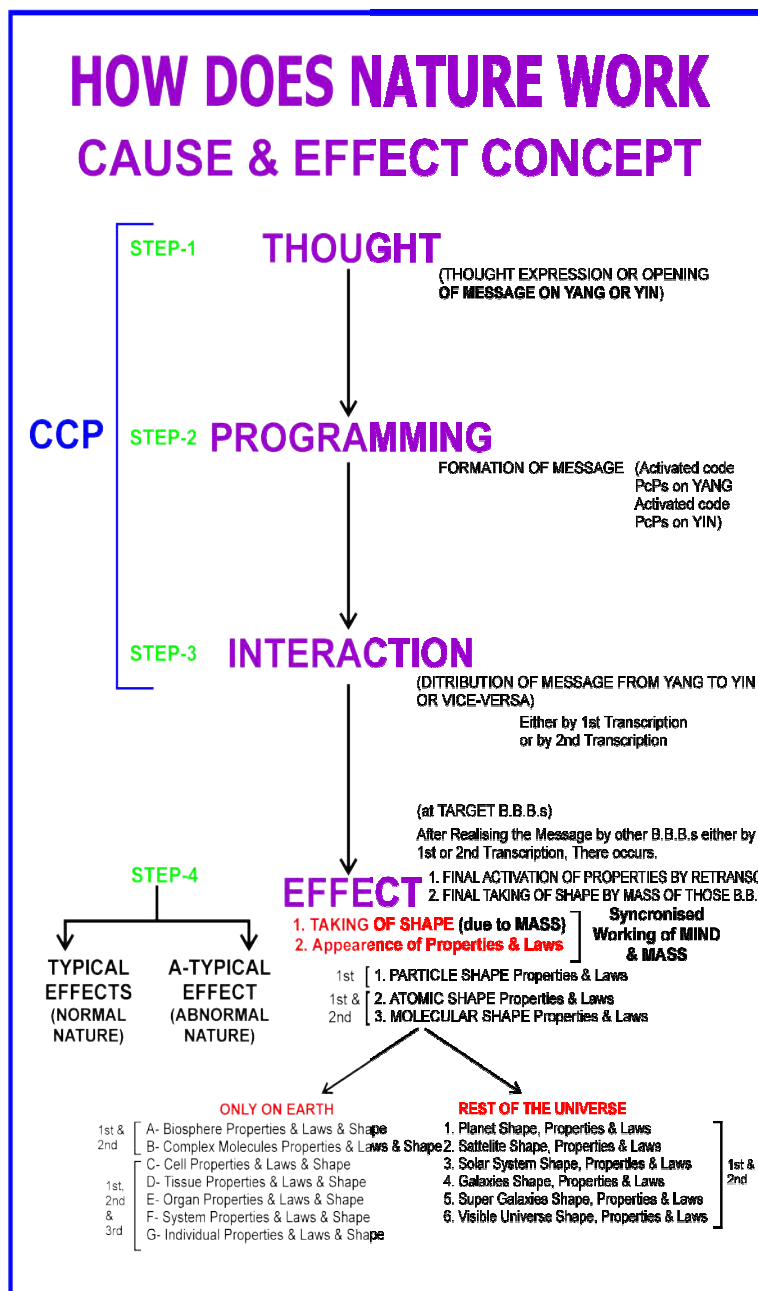

Fig. 6. Divine Mechanics – How Does Nature work ?

The subatomic particles are made up of more fundamental particles called Basic Building Blocks (B.B.Bs) which are made up of mind and mass. These B.B.Bs are divine in nature with the result they talk with each other by phenomenon called atomic transcription and translation (thought expressions). The triggering of broken symmetry is caused by atomic transcriptions. Unless the atomic transcriptions occur, subatomic particles could never exhibit phenomenon of broken symmetry. So the broken symmetry is never spontaneous. It is being mis understood that sub atomic particles do have spontaneous activities as far as broken symmetry is concerned. Hence the Nobel prize physics 2008 awarded to this work is too early to give prize.

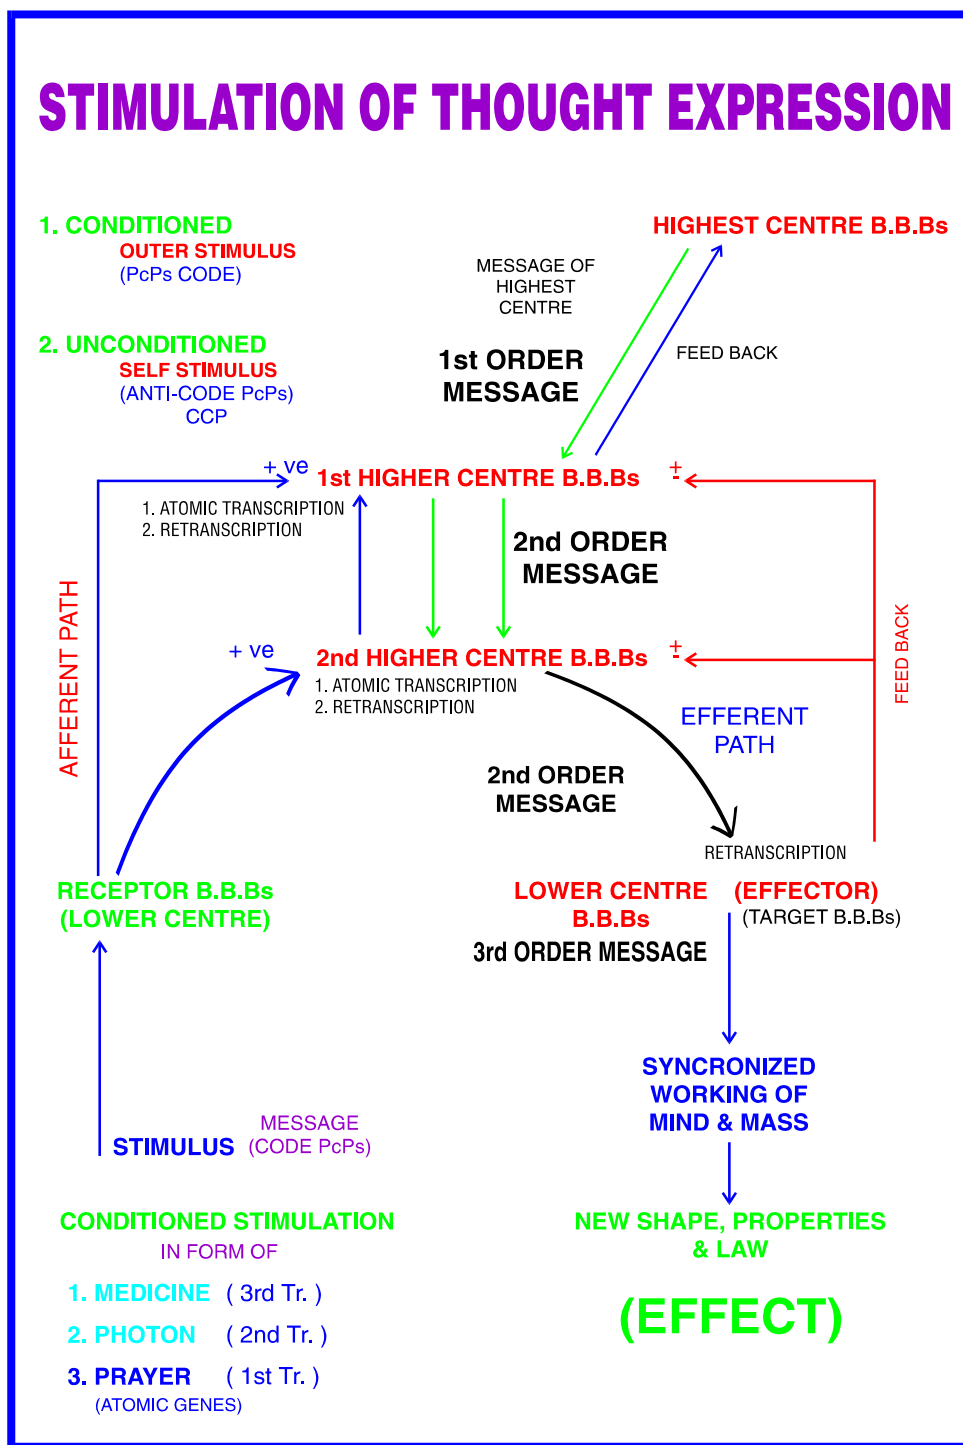

Fig. 7. Conditioned and Unconditioned thought expressions

Message network of the Universe (Feed Back Mechanism and different centers of the Universe)

With the origin of universe, nature first created primary units i.e. primary fermions (gravitation) and primary boson, these primary units are equipped with one higher center (one B.B.B.) and rest of the B.B.Bs. are working as lower centers or target B.B.Bs. (Das, 2014) After primary units, nature created secondary units i.e. secondary fermions and secondary bosons. Similarly nature created tertiary units (lepto-quarks) and then quaternary units (protons & neutrons). Each unit is equipped with higher centers, lower

centers and target B.B.Bs. After quaternary units nature created atomic units, molecular units, complex molecules of life units, organelle units, cell units, tissue units, organ units, system units and individual units. Each unit is equipped with higher centers, lower centers, and target B.B.Bs. Similarly nature created satellite units, planet units, solar system units, galaxy units, super galaxy units, dark matter layer unit. These units are also equipped with higher centers, lower centers and target B.B.Bs. Thus our universe is divided into different units and each unit is equipped with higher and lower centers. All higher centers are under control of highest center of the universe by efferent paths. This efferent path is made up of first transcription. Higher centers can send messages to highest center of the universe by afferent path or feed back path. Thus highest center of the universe is well informed about all effects of the universe. Messages can come from lower centers to higher centers and from higher centers to highest center of the universe via afferent path. The highest center of the universe can send messages to higher centers and from higher center to lower centers. There is an inter unit message network also which is made up of first, second and third transcription depending upon the nature's need. Thus the entire universe is under control of highest center of the universe. Highest center can change any programming programmed by it during pre creation era as shown in Fig 8.

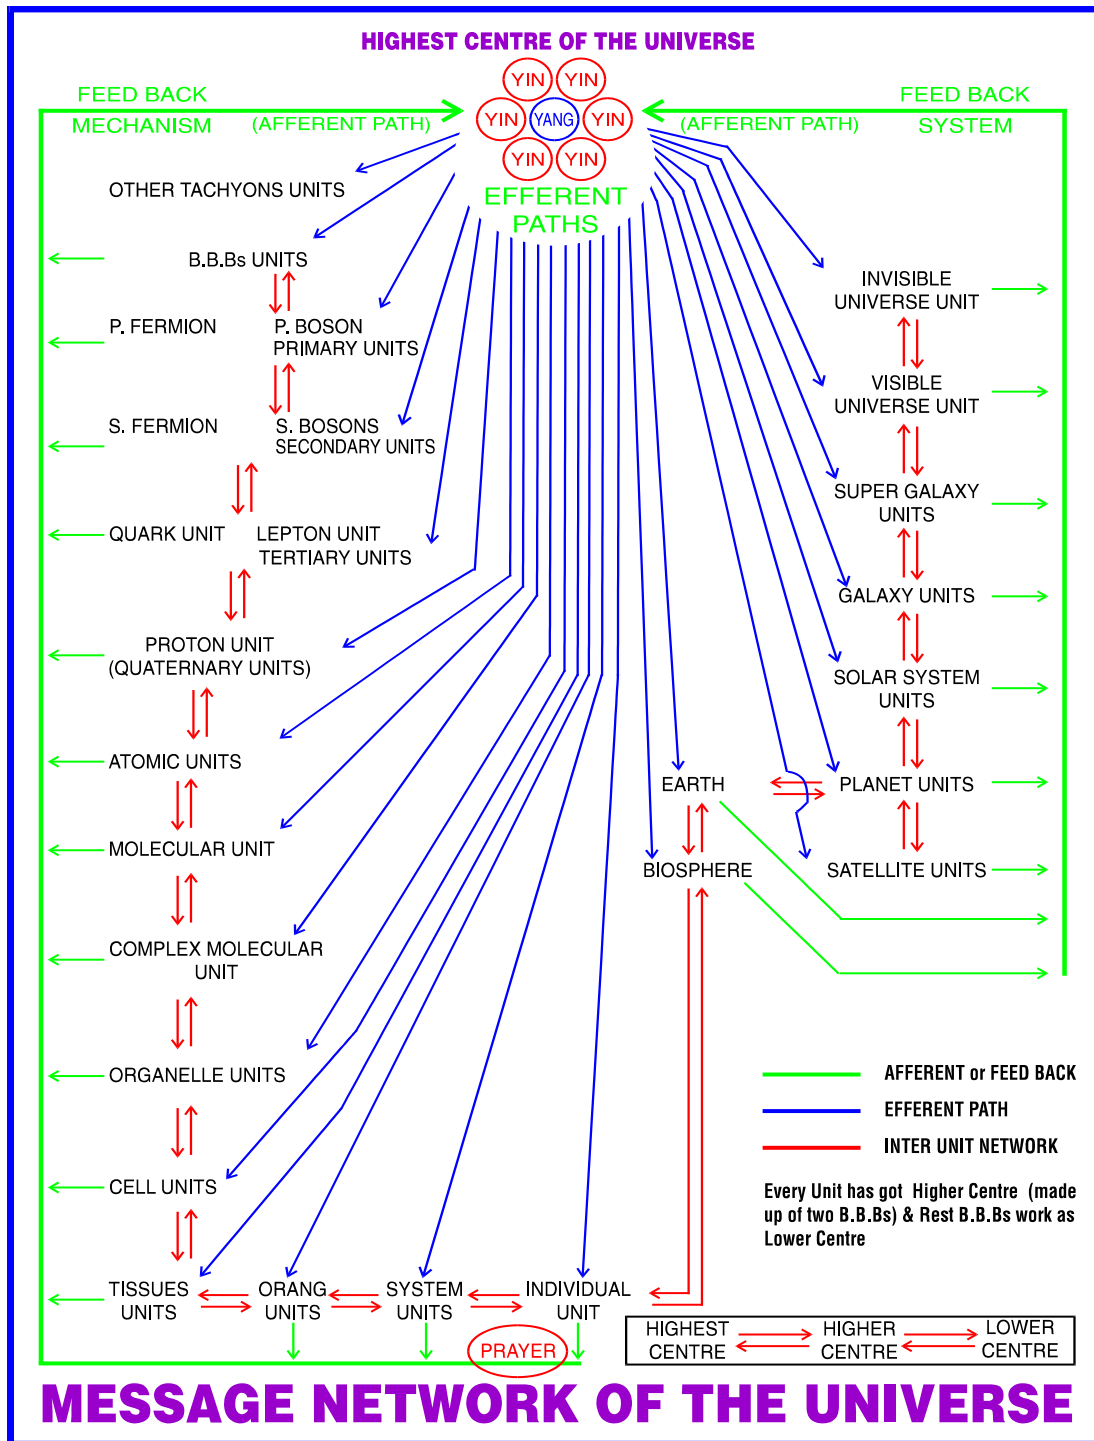

Fig. 8. Messages Net work of the Universe

Origin of the universe (Das, 2014)

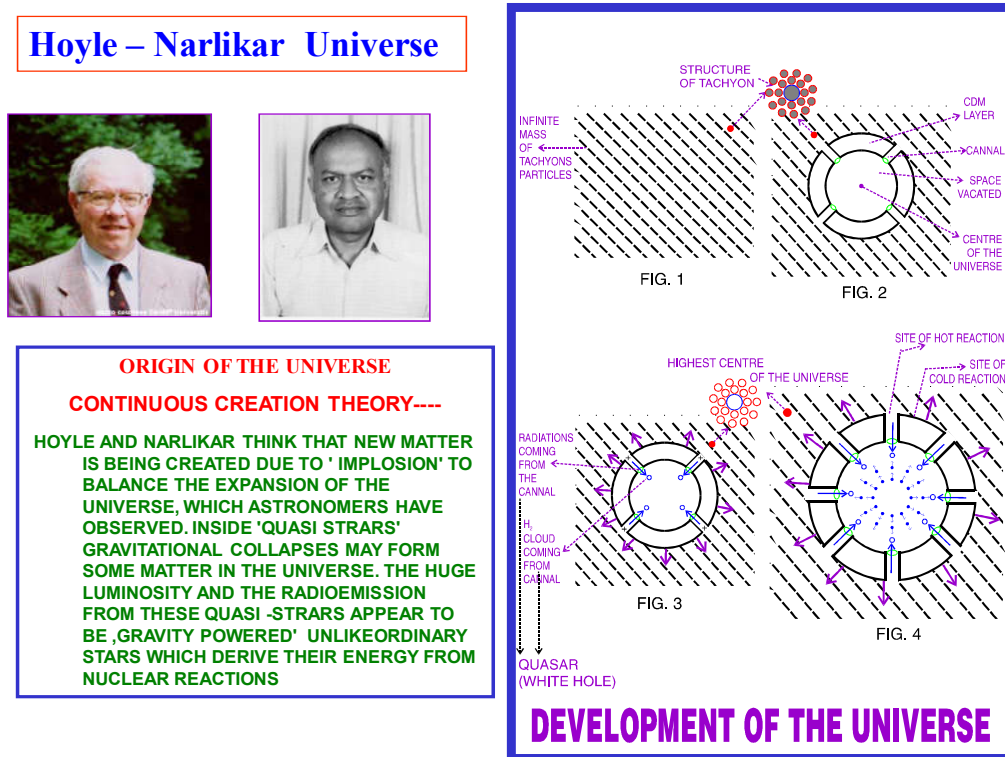

Fig. 9. Development of the Universe

Before the origin of the universe, these Basic Building Blocks (B.B.Bs) as shown in Fig-3 were in the form of tachyons as shown in Fig-9 (7). It means that at that time the tachyons were everywhere in the universe. Let us look at the structure of tachyons; it is made up of one matter B.B.B. (YANG) and many energy (YINs) B.B.Bs. Initially out of the infinite tachyons, one became the highest center of the universe. Messages used to go from highest center to rest of the universe and messages could come from rest of the universe to highest center of the universe by atomic transcription. Thus highest center had fed its thought to rest of the B.B.Bs. that would take part in creation - that they would express only those thoughts to give desired effect as wished by the highest center of the universe. So all B.B.Bs were informed about their role before creation of the universe. In pre-creation era programming of the future universe was done by highest center of the universe. Our universe is oscillating and it is a divine universe. It means that it has a creation phase and a destruction phase. During creation phase tachyons break into their B.B.Bs. and from these B.B.Bs, formation of fermions and bosons take place as shown in Fig 3.1. After the creation phase, destruction would start and in this phase all created particles would again break into their B.B.Bs and finally tachyons would form. At the time of origin of the universe, all the effects got created. These effects are taking of different shapes and appearance of properties and laws. All these effects are studied in various branches of science. With the origin of the universe, nature first created a sphere of COLD DARK MATTER (C.D.M) and canals in it. With the result space got created. At the other end of the canals, hot reaction started (the relics are back ground radiations 2.7 degree K of our hydrogen clouds). As a result hydrogen clouds and lot of radiations were created. The empty canals were filled by these hydrogen clouds and radiations and thus QUASARS appeared in the universe. Simultaneously C.D.M. layer started expanding and clouds and radiations kept on coming in this closed universe as shown in Fig 9. With the passage of time more and more C.D.M. layer formed, more and more quasars formed. The hydrogen cloud came in this closed universe. They started running towards C.D.M. layer as they were attracted by the gravity of C.D.M. layer. Those clouds, which were nearer, moved faster than those, which were away from CDM Layer. The HUBBLE LAW, can thus be explained. With some more passage of time, clouds were joined to form GMC (giant molecular clouds). Later by self-gravitation different proto stars, proto planets, proto satellites were formed. Finally stars became bright and thus bright galaxies appeared in this universe. Our universe is still in expansion phase and creation is still going inside quasars. It is to be remembered that highest center of the universe does not come in the visible universe. It keeps on receiving the messages by atomic transcription and it has power to change any programming programmed by it during pre-creation era. It is the atomic genes which constitutes mind part of reality. Mind incorporation in physics is awaited as theory of every thing is not yet investigated. I have investigated theory of every thing (ToE) and I found that while studying unified theory at the time of origin of the universe by Hoyle Narlikar universe, it was mind reality that triggered symmetry breaking phase. It is mind reality that triggers oscillation phenomenon of the universe. It is the mind reality which is behind perfect cosmological principle. There is nothing like artificial intelligence in the universe. These mind particles constitute intelligence of the universe that controls the deterministic order of the universe. It is the mind reality behind all effects of the universe. But this is not our mind rather it is mind of Almighty B.B.B (Yang B.B.B or matter B.B.B. or Male B.B.B working as Highest center of the universe). His mind could be manipulated by prayer only. as shown in figure 9.1 and 9.2

Divine Mechanics and Brain Computation

Learning and Memory and information s (Code PcPs) Net work in Brain (Das, 2015)

Divine Mechanics and Brain Computation

Fig. 12. Divine Mechanics of Brain Computing System – Learning and memory

At all steps, these are B.B.Bs (B-Bit) that are responsible for information's control and triggering. If CCP is written it means unless atomic transcription and translation occur, brain cannot have learning and memory triggering and control and it is called Divine mechanics of Biology and it is life. These are higher thought expressions of B.B.Bs. In Bits of classical computers and qubits of QC, the thought expressions are lower and different but the mechanics (DIVINE) remains the same. As shown in Fig 12

Physics dictates the lowest limit of size of chip **but DIVINE mechanics does not Moore's Law Modified and Completed**

Fig. 13. The Theory of Computers and Brain are same – DIVINE MECHANICS

(Structural and Functional smallest Bit (mass) is B-Bit of the universe and the Divine Mechanical Unit is CCP, Code PcPs and CP.)

DIVINE MECHANICS The Theory of Computers and Brain is SAME as shown in Fig 13

Physics dictates the lowest limits of the size of chips (<https://www.youtube.com/watch?v=Fb3gn5GsvRk>). But divine mechanics does not. Hence the bit is a typical unit of information. (Classical and Quantum Bit) is wrong and to describe informations by adding qubit is also illusion as in complicate system, it is the different thoughts expressions that describe informations. Informations are separate (Code PcPs) and bits (Electron of transistor) qubits (electron of diamond crystal) are separate. At DNA level the bit is nucleotide (A,T,C,G) and at Atomic level the bit is photon and electron, at particle level (secondary fermions and secondary bosons) the bit is primary fermions and primary bosons and informations are still code PcPs and at B.B.B level the bit is B.B.B (Yang mass and Yin mass - B- bit) it self and the information is carried by Code PcPs but at all level of all bit units the information storage system is CCP (Physiological arrow of Time) it never dies even after destruction of the universe. Hence information s are eternal. In computers, Bit is a structural configuration that describes information s of the system and information s are in form of Code PcPs. The working of the bit is triggered and controlled by thoughts of higher centers that form that bit. If the bit is classical (transistors of chips) the effect is different. But if the bit is qubit with entanglement the working is triggered and controlled by thoughts of higher center that form that crystal. In both the effect of describing informations would be different. One is classical (thought expressions are fixed and limited)and other one is quantum (thought expressions are changing and more wide to describe the more wide complicated system to have fast results). In life sciences in Brain the bit is again Photon and the information s are Code PcPs and they are triggered and controlled by CCP of higher centers that is triggered by DIVINE MECHANICS. In life sciences the CCP (cryptography) of B-bit expresses informations (Code PcPs) which were not fed like speaking Lie and unlike Bit of classical computer and qubit of QC it shows phenomenon of forgetfulness and IQ phenomenon (mental age /real age). It is Higher functions of B.B.B or B Bit and it is life. Hence there is difference in some aspect of DIVINE MECHANICS \of Computers computation and Brain computation

What eye sees is different (illusion) than what brain sees (truth)

What eye sees is different (illusion) than what brain sees (truth). In science hypothesis is made and that hypothesis is confirmed by observation. Two God particles hypothesis is based on observation that Super unification is not proven yet. When photo depiction of two God particles is made by brain, it was same as made by Almighty B.B.B thousands of year back by clue pictures given by Hindu spiritualism (Fig 1). what Idol worship (Eyes see - sculpture – statue) is defined before the research of Two God particles is illusion (Eyes see - sculpture – statue, set of informations Code PcPs) as the real idol worship is worship of two God particles which constitute big Idols (Eyes see - sculpture – statue, set of informations Code PcPs) (Brain sees-Two God Particles – Not set of informations Code PcPs). On this basis the all created units (sun, moon fire, rain) in created universe are also worshiped as idol worship as they are made up of these two God particles, Though they do not look as idol. Same is true for idols of trinity. (Lord Jesus, Lord Ram etc) as idol concept started with idol of these trinities since two God particles idol concept was not written any where in books before their search by me.by science. Big Idols worship would end with end of Universe. But Idol worship of B.B.Bs (Not set of informations Code PcPs or originator of different sets of informations Code PcPs) would persist even after destruction of universe.

Eyes see different (illusion) than what the brain sees (Truth)

Galileo and Church - The Galileo Controversy (<https://www.catholic.com/tract/the-galileo-controversy>)

It is commonly believed that the Catholic Church persecuted Galileo for abandoning the geocentric (earth-at-the-center) view of the solar system for the heliocentric (sun-at-the-center) view. The Galileo case, for many anti-Catholics, is thought to prove that the Church abhors science, refuses to abandon outdated teachings and is not infallible. For Catholics, the episode is often an embarrassment. It shouldn't be. This tract provides a brief explanation of what really happened to Galileo

- In his later years Italian astronomer Galileo Galilei insisted on the truth of the geocentric system, said UCLA professor Henry Kelly.
- Today virtually every child grows up learning that the earth orbits the sun.

But four centuries ago, the idea of a heliocentric solar system was so controversial that the Catholic Church classified it as a heresy, and warned the Italian astronomer Galileo Galilei to abandon it. Many people believe that Galileo was hounded by the church for almost two decades, that he openly maintained a belief in heliocentrism, and that he was only spared torture and death because his powerful friends intervened on his behalf. But an examination of the fine details of Galileo's conflict with church leaders doesn't bear that out, according to English department distinguished research professor Henry Kelly. In an article published this month in the journal "Church History," Kelly clarifies some popularly held notions around Galileo's travails with the church. "We can only guess at what he really believed," said Kelly, who for his research undertook a thorough examination of the judicial procedure used by the church in its investigation of Galileo. "Galileo was clearly stretching the truth when he maintained at his trial in 1633 that after 1616 he had never considered heliocentrism to be possible. Admitting otherwise would have increased the penance he was given, but would not have endangered his life, since he agreed to renounce the heresy — and in fact it would have spared him even the threat of torture." This year marks the 400th anniversary of the beginning of the Catholic Church's investigation into Galileo. When first summoned by the Roman Inquisition in 1616, Galileo was not questioned but merely warned not to espouse heliocentrism. Also in 1616, the church banned Nicholas Copernicus' book "On the Revolutions of the Celestial Spheres," published in 1543, which contained the theory that the Earth revolved around the sun. After a few minor edits, making sure that the sun theory was presented as purely hypothetical, it was allowed again in 1620 with the blessing of the church. Sixteen years after his first encounter with the church Galileo published his "Dialogue on the Two World Systems" in 1632, and the pope, Urban VIII, ordered another investigation against him. This time he was prosecuted, following the usual methods of the Roman Inquisition. First, on April 12, 1633, before any charges were laid against him, Galileo was forced to testify about himself under oath, in the hopes of obtaining a confession. This had long been a standard practice in heresy proceedings, even though it was a violation of the canonical law of inquisitorial due process, Kelly said. However, the interrogation was not successful. Galileo failed to admit any wrongdoing. The cardinal inquisitors realized that the case against Galileo would be very weak without an admission of guilt, so a plea bargain was arranged. He was told that if he admitted to having gone too far in his treatment of heliocentrism, he would be let off with a light punishment. Galileo agreed and confessed that he had given stronger arguments to the heliocentric proponent in his dialogue than to the geocentric champion. But he insisted that he did not do so because he himself believed in heliocentrism, Kelly said. Rather, he claimed he was simply showing off his debating skills. After his formal trial, which took place on May 10 of that year, Galileo was convicted of a "strong suspicion of heresy," a lesser charge than actual heresy. In sum, the 1616 event was not the beginning of a 17-year-long trial, as is often said, but a non-trial," Kelly said. "Galileo's actual trial lasted for only a fraction of a single day, with no fanfare at all. Kelly also noted that by the practice of the time, Galileo's guilty plea, which denied actual belief in the heresy, triggered an automatic examination of his private beliefs under torture, a new procedure adopted by the church around the turn of the 17th century. Galileo was never tortured, however. The pope decreed that the interrogation should stop short with the mere threat of torture. This was a routine kind of limitation for people of advanced age

and ill health like Galileo, and it should not be attributed to the influence of the scientist’s supporters. Ultimately, Galileo’s book was banned, and he was sentenced to a light regimen of penance and imprisonment at the discretion of church inquisitors. After one day in prison, his punishment was commuted to “villa arrest” for the rest of his life. He died in 1642. In his later years Galileo insisted on the truth of the geocentric solar system, Kelly said. The story that after he formally renounced the motion of the earth at his sentencing he muttered, “And yet it moves,” is a romantic invention of a later generation. “If he had ever come out and said he believed in heliocentrism after swearing it off, he would have been liable to receive an automatic death sentence,” Kelly said. The church, however, made efforts to ensure their version of Galileo’s scientific beliefs were prevalent. “The most unusual aspect of the proceedings was that the sentence was ordered to be widely publicized in scientific circles,” Kelly said. “The cardinals asserted that Galileo had always been orthodox in his belief concerning the cosmos and had never believed in or affirmed the heliocentric heresy.”

Structure

New nomenclature (Scientific) of religious names of God

Gurur Brahma, Gurur Vishnu, Gurur Devo Maheshvaraha
Guru shakshat Para Brahma, Tasmai Shri Guruve Namah

OR

The Creator, The Operator, and The Destroyer
The teacher that is Omniscience i.e. Having knowledge of All
We should give respect
And He is One - Almighty B.B.B

In precreation era, Almighty B.B.B had thought what would be His Karma in created universe and thought appeared in above mentioned quotation.i.e. He would be Creator, Operator and Destroyer of the universe (Hoyle narlikar Universe) and He would impart as omniscience teacher all eternal and universal knowledge to mankind. That is how He became both Almighty God and Teacher of all knowledge of our Universe. Simultaneously He thought His name to be popular in created universe and the name is “Allaha”. He defined Himself the word Allaha in 99 names. The attributes of the word Allah have been defined in His 99 names. The outcome of the word Allah and His attributes is – “Every Thing Is Allah, Every Book Is Quran, Then All Worships Are Allah’s Worship.” The third aspect of amicable solution is secularization of God which would appear in the end of Kalyug i.e. God is out of religion. It is the science of Prayer that would redefine God’s name and thus no religious names would be popular among scientists and thus God would be secularized. These names are – Primary God, Secondary God, tertiary God, trinity, and Tawhid.

For example

	Religious names of God	Secularized names of God or Scientific names	photo depiction
1	•Christian God – Jesus	Trinity (Almighty B.B.B in flesh form)	
2	•Islam – Allahatala	Secondary God (Almighty B.B.B) Creator	(smallest Idol) 
3	•Hindu God – Ram	Trinity (Almighty B.B.B in flesh form)	
4	•Jainism God --- Nirakar - postulate an eternal universe	Taw hid .(one absolute God or I)	
5	•Vedas – worship -Creation Sun , moon , plants , rain etc	Tertiary God (Visible units)	
6	Hindu Goddess Durga and Her Nine Avatar	Trinity (Yin B.B.B In flesh form)	

But no religion discussed Primary God (two God particles) made up of mind and mass - the eternal structure or body, as Primary God (Two God particles) is the subject of research through science, and it would be researched by science only. Thus the Geeta's secret is the same as Quran's secret and Bible's secrets. The Geeta's secret is – I am the origin of All. Every thing evolved from Me – 10/8

Krishna Consciousness and Islam connection

Now coming to the amicable solution of Ayodhya issue –it could be resolved by knowing in detail about “Science of Prayer “ and “ Know Allaha in the light of Science). (Das, 2015)

Order of Almighty B.B.B.(First Order of the Universe – Quantum Entanglement)

1. Those who donot want Mosque to be built, they are insulting Primary God (Two God particles).
2. Those who donot want Idol worship of Lord Ram (Set of informations Code PcPs) in Mosque (Set of informations Code PcPs) are insulting Allaha in Trinity form as Trinity's worship (Almighty B.B.B. in flesh form) is Allaha's worship.

In such dilemma both Hindu and Muslim should equip themselves with knowledge of“ Science of Prayer “ and “ Know Allaha in the light of Science “ and they should reform wrong thoughts to right thoughts along with repent themselves and do priyashit (self reformation). Because wrong knowledge keeps them apart and right knowledge evokes both of them (Hindu and Muslim) to pray Almighty B.B.B under one roof.

Krishna Consciousness and Islam connection

**Lam blakhai gesu mere Ghanshyam ke –
Kafir hai wo jo kayal nahi Is-lam ke .**

Krishna (Trinity – Allahatala as Trinity – Secondary God) Consciousness. The meaning is that who is not kayal (do not admire) of Krishna consciousness (Set of informations Code PcPs), is Kafir (Atheist or disobedient). What is Islam ? Kafir hai wo jo kayal nahi islam ke. Lam blakhai gesu mere Ghanshyam ke - Kafir hai wo jo kayal nahi Is-lam ke. The meaning is that who is not kayal (do not admire) of Krishna consciousness, is Kafir (Atheist or disobedient).The meaning that Krishna told in Quran (Gita) That - I am Islam. I am Quran and I am Allahatala.(Set of informations Code PcPs) **read 10/ 8**

Islam and Almighty B.B.B., The Creator of Universe

Muslim do believe that Allaha means The Creator only. After researching 99 names, we found that Allaha means – Primary God, Secondary God, tertiary God, trinity, and Tawhid. in the light of science. This portrait represents Tachyon particle (One yang B.B.B and many Yins B.B.B) apart from Creation and Destruction of universe under control of Almighty B.B.B. The Jai ghosh of this Almighty B.B.B (Allahatala) is Allaha ho Akbar.

Conclusion

Hitherto, Idol worship in Islam is not that idol worship that all religions do i.e. idol worship of God particles which is the real idol worship and it will persist even after destruction of the universe. On this ground Islam does idol worship at the time of Namaz. Now the worship of other created things (Set of informations Code PcPs) that are made up of these God particles is also Idol worship because as though they are not idol (say sun, moon, rains, fire etc) but since they are made of same God particle hence Almighty B.B.B also calls it Idol worship. Since every thing is Allaha (B.B.Bs), hence all worshipers are (idol worship – two B.B.Bs) worship of Allaha Muslim do believe that Allaha means The Creator only. After researching 99 names in the light of science and the paper published in Journal (Das, 2014), we found that Allaha means – Primary God, Secondary God, tertiary God, trinity, and Tawhid. in the light of science. This portrait represents Tachyon particle (Fig 14 - One yang B.B.B and many Yins

B.B.B) apart from Creation and Destruction of universe under control of Almighty B.B.B (Allahatala). The admiring of this Almighty B.B.B is Allha ho Akbar. Hence All worships are Idol worship in this universe as all are made up of smallest idol called B.B.Bs, the true fundamental belief of all religions. This belief persists even after destruction of the universe in form of "I" What eye sees is different (illusion) than what brain sees (truth). In science hypothesis is made and that hypothesis is confirmed by observation. Two God particles hypothesis is based on observation that Superunification is not proven yet. When photo depiction of two God particles is made by brain, it were same as made by Almighty B.B.B thousands of year back by clue pictures given by Hindu spiritualism (Fig 1). what Idol worship (Set of informations Code PcPs or sculpture – statue) is defined before the research of Two God particles is illusion as the real idol worship is worship of two God particles (Not Set of informations Code PcPs--Brain sees). On this basis the all created units (sun, moon fire, rain - Set of informations Code PcPs) in created universe are also worshiped as idol worship as they are made up of these two God particles (Not Set of informations Code PcPs), Though they donot look as idol. Same is true for idol of trinity (Set of informations Code PcPs). (Lord Jesus, Lord Ram etc)
