ABSTRACT

Highest center of the universe created Earth (solar System) and heaven (galaxies) by unconditioned thought expression or by conditioned thought expression by higher centers (B.B.Bs). Hence laws of physics are made by these two ways of thought expressions. it is called Laws of Nature. But at certain places, Highest center of the universe or Creator B.B.B has made Lawlessness ie thoughts of natural laws (Thought of law of Flying or thought of law of Floating) get inhibited. It is time mindness (TM) that triggers this unconditioned thought expressions (lawlessness) at Bermuda triangle leading to sinking effect of ships or crashing effect of aero planes while crossing that Devil's triangle. Hence it is "fed act of God" like triggering of thought of Earthquakes by sun rather than tectonic plate movements.

INTRODUCTION

How the Bermuda Triangle Works

BY LEE ANN OBRINGER & PATRICK J. KIGER [1]

A magnifying globe shows a plane and boats over a map of the Bermuda Triangle, the site of many 'mysterious' disappearances. LIGHTGUARD/GETTY IMAGES

You won't find it on any official map, and if you're sailing in the Atlantic, you're likely not to even notice when you cross its vague boundaries. Nevertheless, the Bermuda Triangle — also sometimes known as the Devil's Triangle — for decades has been the subject of numerous books, TV programs, newspaper and magazine articles and websites, and inspired plenty of dread and fascination.

To believers in the Triangle, which lies roughly between the Bahamas, Bermuda and the east coast of the U.S., it's a very real place where numerous ships, planes and people have disappeared with no good explanation. To skeptics, who point to the lack of data proving that the area has any unusual number of lost craft, it's an example of how pseudoscience and popular culture can influence the unwary to believe in ideas that have no real basis in fact. One of the big dilemmas of solving the mystery of the Bermuda Triangle is that there's no general agreement on where exactly it is. According to an article on the Triangle in "The Skeptic Encyclopedia of Pseudoscience," some sources describe the Bermuda Triangle as being about 193,000 square miles (500,000 square kilometers) in area, while others ascribe to it an area three times that size and include the Azores and the West Indies as part of the dreaded region [source: Shermer et al.]. Since a magazine writer first coined the phrase "Bermuda Triangle" in 1964, the mystery has continued to attract attention [source: Gaddis].

Advanced Sciences, University of God, Das nursing Home, Fatehgarh, Farrukhabad, U.P., India

When you dig deeper into most cases, though, they're much less mysterious. Either they were never in the area to begin with, they were actually found, or there's a reasonable explanation for their disappearance.

What is New Physics or Physics of Mind ?

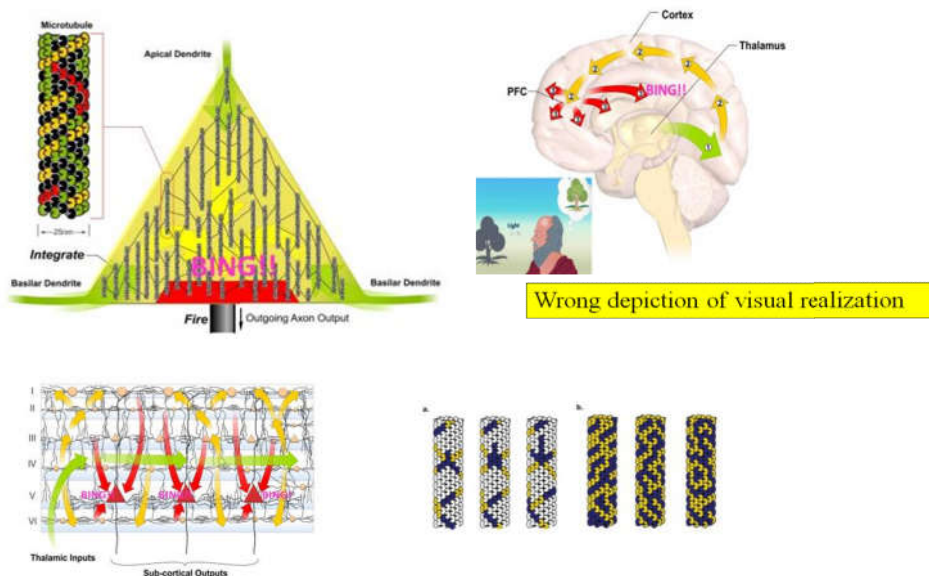

Physics of Mind

Quantum Consciousness – According to Physicists and Biologist

The nature of consciousness remains deeply mysterious and profoundly important, with existential, medical and spiritual implication. We know what it is like to *be* conscious – to have awareness, a conscious ‘mind’, but who, or what, are ‘we’ who know such things? How is the subjective nature of phenomenal experience – our ‘inner life’ - to be explained in scientific terms? What consciousness actually *is*, and how it comes about remain unknown. The general assumption in modern science and philosophy - the ‘standard model’ - is that consciousness emerges from complex computation among brain neurons, computation whose currency is seen as neuronal firings (‘spikes’) and synaptic transmissions, equated with binary ‘bits’ in digital computing. Consciousness is presumed to ‘emerge’ from complex neuronal computation, and to have arisen during biological evolution as an adaptation of living systems, extrinsic to the makeup of the universe. On the other hand, spiritual and contemplative traditions, and some scientists and philosophers consider consciousness to be intrinsic, ‘woven into the fabric of the universe’. In these views, conscious precursors and Platonic forms preceded biology, existing all along in the fine scale structure of reality.

My research involves a theory of consciousness which can bridge these two approaches, a theory developed over the past 20 years with eminent British physicist Sir Roger Penrose. Called ‘orchestrated objective reduction’ (‘Orch OR’), it suggests consciousness arises from quantum vibrations in protein polymers called microtubules inside the brain’s neurons, vibrations which interfere, ‘collapse’ and resonate across scale, control neuronal firings, generate consciousness, and connect ultimately to ‘deeper order’ ripples in spacetime geometry. Consciousness is more like music than computation.

Colleagues Travis Craddock and Jack Tuszynski and I also study how anesthetics act in microtubules to erase consciousness, and with Jay Sanguinetti, John JB Allen and Sterling Cooley, we are studying how transcranial ultrasound (TUS) can be used noninvasively to resonate brain microtubules and treat mental, cognitive and neurological disorders. Many thanks to my assistant Abi Behar-Montefiore and Ed Xia for maintaining this website.

1.2 Mind and Mass Realities [2]

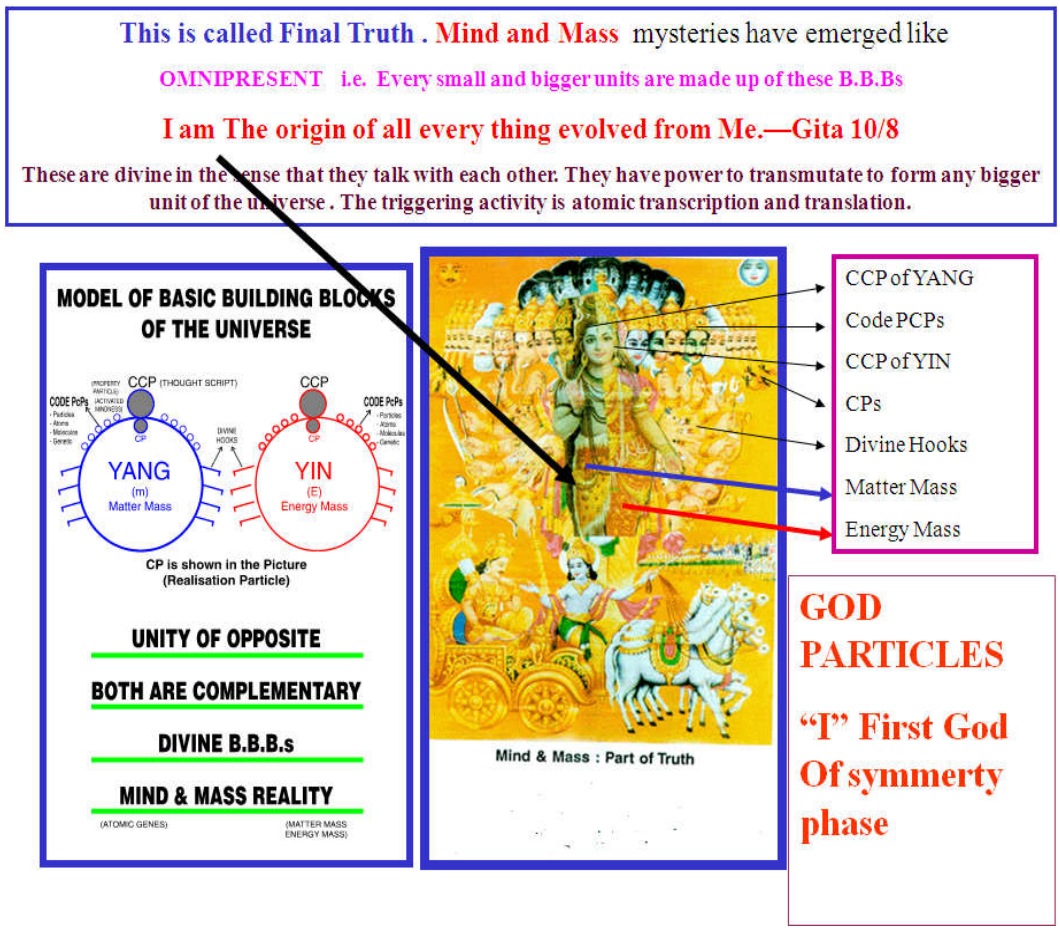

Fig. 1. Divine Mechanics Unit – CCP, CP and information s – Code PcPs with B-Bit – Mass

Atomic genetics is the branch of science where we investigate about fundamental interactions of the universe i.e. atomic transcription and translations. New words have been coined to understand hidden science of mind part of reality. Mind reality has been recognized as different faces by “T” about 5000 years back to Arjuna in Mahabharata.as shown in Fig 1. It is just like to understand any language through Alphabets. These are (different faces) Alphabets of mind reality. One Mind reality has one face identity and the second mind reality has second face identity and so on. The facial expression represents phenomenon of intelligence and different faces represent different types of properties carrying property.

The open eyes means property is activated while close eye means property is inactivated. In spite of carrying properties consciousness they also know how to conduct not only origin of universe but also how to create two different universe i.e. next creation could be different from this creation. In all, it is automatic system of the universe. The mind realities which are of good properties have devtas face identity (first five faces on both side) and those mind realities which are of bad properties have demons face identity (last four faces on both side). These are named as code PCPs or messenger atomic genes. The central face is CCP or Thought script where all thoughts of the universe are banked. It is bank of data of all information s of the universe It is face identity of Anti mind particles as data of all information’s of the universe are stored as anti mind particles.

It is the Time mind ness (biological clock) that keeps on expressing different thoughts from this thought script (CCP). There are four more faces (black bodies) shown on extreme left and right floating in fire are CPs (translating Atomic genes). That translates the messages and realizes it and reacts accordingly. [2]

1.3. Messages From Biological world to understand B.B.B world as shown in Fig 2 [2]

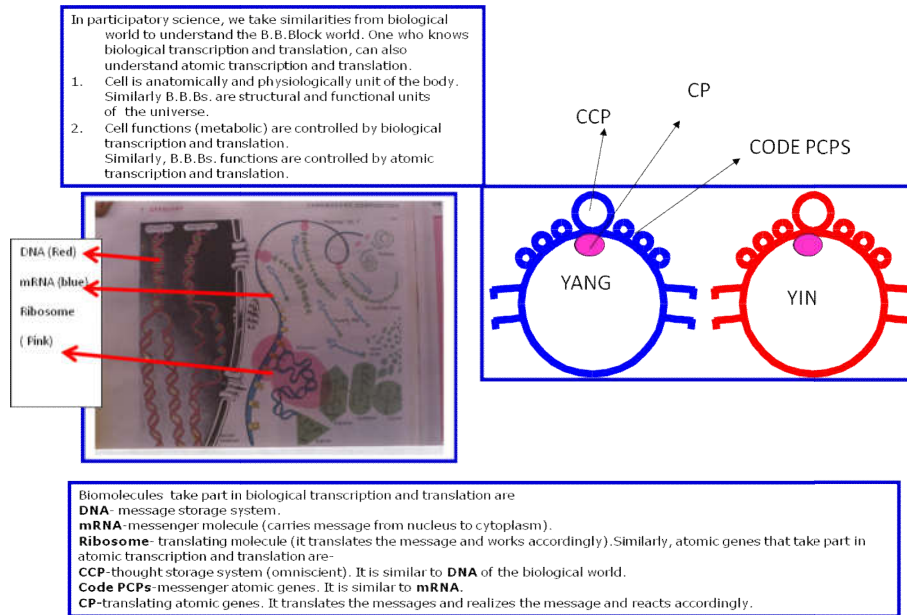

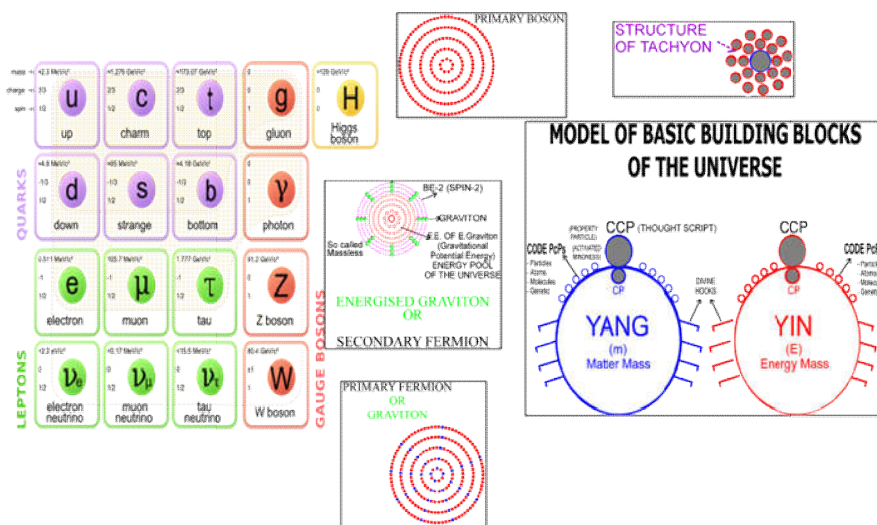

Fig. 2. Parallel teaching by participatory science

The standard model not only modified rather it has been completed [3] with introduction of energized gravitons, primary fermions, primary bosons, Basic Building Blocks, Mind and Tachyons as shown in Fig 3.

Standard model completed with Fundamental particles and Mind And Tachyons

Fig. 3. Standard Model chart [3]

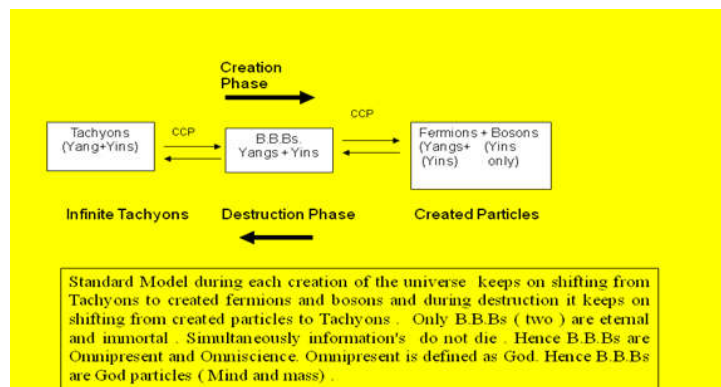

Fig. 3.1. One creation and destruction cycle [4]

Participatory science has coined [5] some new words and there are some words which already exist in physics. Both these words are defined here and the definitions are according to participatory science. It has no relation with the definitions given in modern physics.

- **Mass** -The part which gives shape to the smallest mass unit i.e. basics building blocks (B. B. Bs.) is called mass.
- **Matter**: Mixture of fermions and bosons or only bosons which are made up of mass (B.B.Bs) and that is why we realize their shape is called matter.
- **Inertial mass**: Mass (smallest mass units i.e. B. B. Bs) having inertial properties (classical inertia) either absolute rest or uniform motion in straight line is called inertial mass. Or Number of B. B. Bs. Per unit space present in bigger units is called inertial mass. Or Total matter contained by the bigger units or total number of fermions and bosons contained by the bigger units is called inertial mass. Therefore it never changes from place to place.
- **Gravitational mass**: The mass (interacting surfaces) which takes part in gravity (divine energized gravitons theory) interaction (which is due to mind) is called gravitational mass. When gravity interaction increases (number of divine energized gravitons increases) the interacting mass (interacting surface) also increases or when interacting mass (interacting surfaces) increases, gravity interaction (number of divine energized gravitons) also increases. Therefore gravitational mass (interacting mass or surfaces) changes from place to place. It is the fed mind that decides gravity interaction. We shall discuss it in gravity chapter and in atomic genetics.
- **Pure m (matter) mass**: matter mass (smallest mass unit or B.B.B) which have got inertial property of absolute rest.
- **Energy mass**: Energy mass (smallest energy mass unit B.B.B) which have got inertial property of uniform motion in straight line and which also gives shape to the bigger energy mass (Higgs Bosons etc) units.
- **m (impure matter) of $E=mc^2$** : Matter particles (fermions) which have got spin property are called impure matter particles.

1.4 Prayer message formation in brain

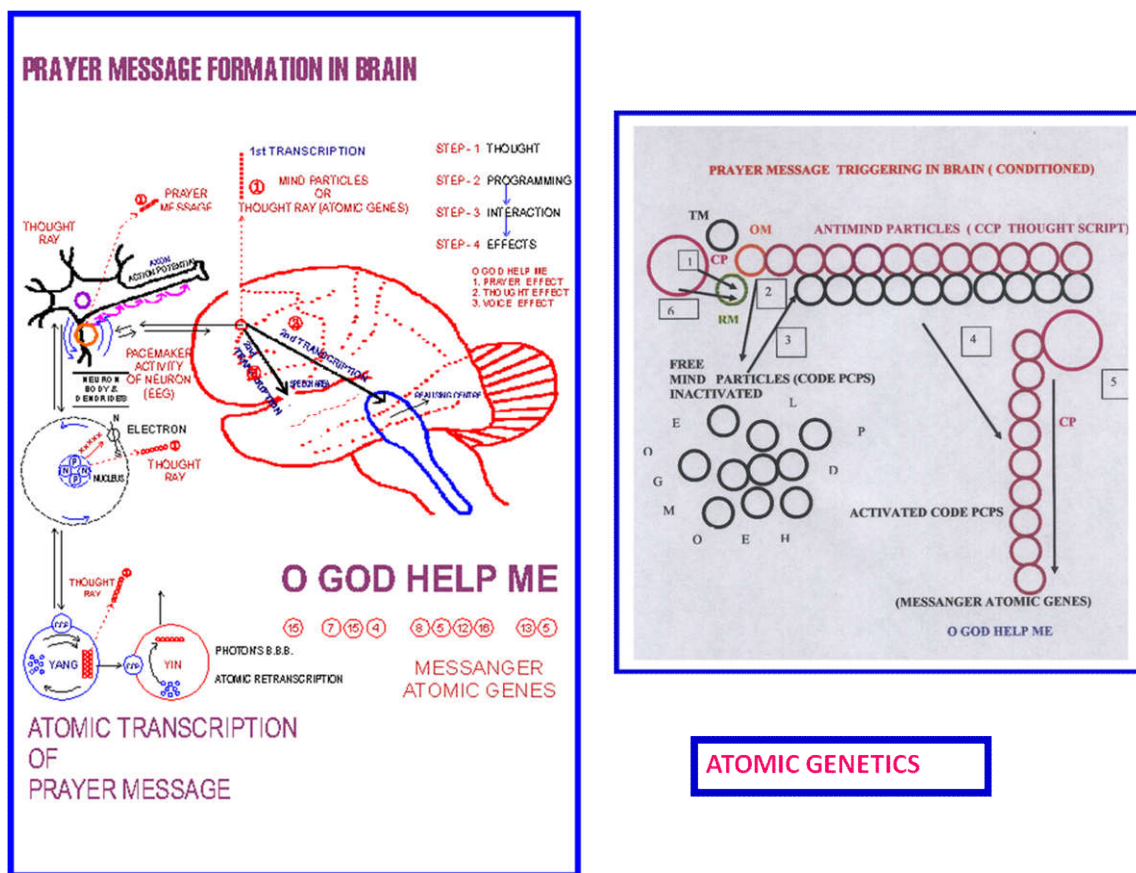

Fig. 4. Divine Mechanics - Prayer message formation in brain

In atomic transcription and translation of prayer [5], following steps take place on Yang B.B.B – B-Bit as shown in Figure 4.

- CP removes RM (repressor mindness-green) from OM (operating mindness -orange) thus induction of atomic transcription triggers.
- OM triggers activation of free mind particles (black -inactivated code PCPs) of that thought script (magenta) of “o god help me”.
- Free mind particles (black -inactivated code PCPs) get attached to anti mind particles script (magenta one) to form messenger thought script of “o god help me”.

- Messenger atomic genes (black) get activated by anti mind particles thought script and further they get detached from anti mind particles thought script to form activated messenger atomic genes (activated code PCPs) (magenta) of “ o god help me ”
- CP carries phenomenon of splicing by translating the messenger activated atomic genes (activated code PcPs) and finally there is activated message of “ o god help me” is formed.
- CP represses atomic transcription by adding RM (green) to OM (orange). Thus atomic transcription gets halt.

Having formed the message it comes out in three forms.

In atomic genetic engineering (prayer) we use our basic power i.e. power of B.B.Bs. Our B.B.B. (higher center) talks with highest center of the universe by sending the message by first transcription. Till today nobody knows how does the brain generate thoughts. I am going to tell you that mystery too. In the frontal lobe the neurons are responsible for thought generation. In the neuron there is electrical activity called pacemaker activity which is occurring between dendrites and the body of the neuron. The membrane of the cell is made up of atoms and atom is made up of B.B.Bs. At the level of B.B.B. say thought of 'O GOD HELP ME' is expressed. As a result programmed messages of O GOD HELP ME (code PCPs) are formed. Out of three programmed messages, one is carried by atomic genes to highest center of the universe. It is called THOUGHT RAY (Quantum entanglement) which is made up of pure atomic genes and then the message goes through phenomenon called first transcription. They come out from brain directly. The other two messages are carried by photons from nucleus of atom to electrons. Here they are modulated on electrical activity of the cell called pacemaker activity. Further they are modulated on actions potentials going towards REALIZING CENTER situated in brain stem (RAS) and from RAS to speech area situated in the frontal area. Target B.B.Bs. of the realizing center finally realizes thought effect of O GOD HELP ME. While from speech area message goes to motor cortex again via RAS and from there to vocal cords and finally it comes out as a speech effect of O GOD HELP ME. In layman's terminology formation of the thought ray means PRAYER as shown in Fig 4.

Where Does Prayer Message go ?

Prayer message goes as shown in Figure 5 to highest center of the universe via first transcription where it is realized and it is accepted, the highest center sends two messages to B.B.Bs working as higher center in cancer cell. These messages are message of inhibition of abnormal thought expression and message of activation of normal thought expression. Having received the messages, higher center stops expressing the abnormal thoughts and it starts expressing the normal thoughts. As a result, there are no more abnormal programmed messages and in place of that normal programmed messages are there. Now the messages have shifted from abnormal (5 and 6) to normal (2 and 3). This shifting of thought expression is called ATOMIC GENETIC ENGINEERING as shown in Figure 4.1

The changed messages reach to target B.B.Bs. through same route. Having received the changed messages, target B.B.Bs. stop expressing the previous programming and they start expressing the normal programming. As a result the cancer cells transmutate into normal cells. Or diseased cell gets cured [6] as shown in Fig 4.1.

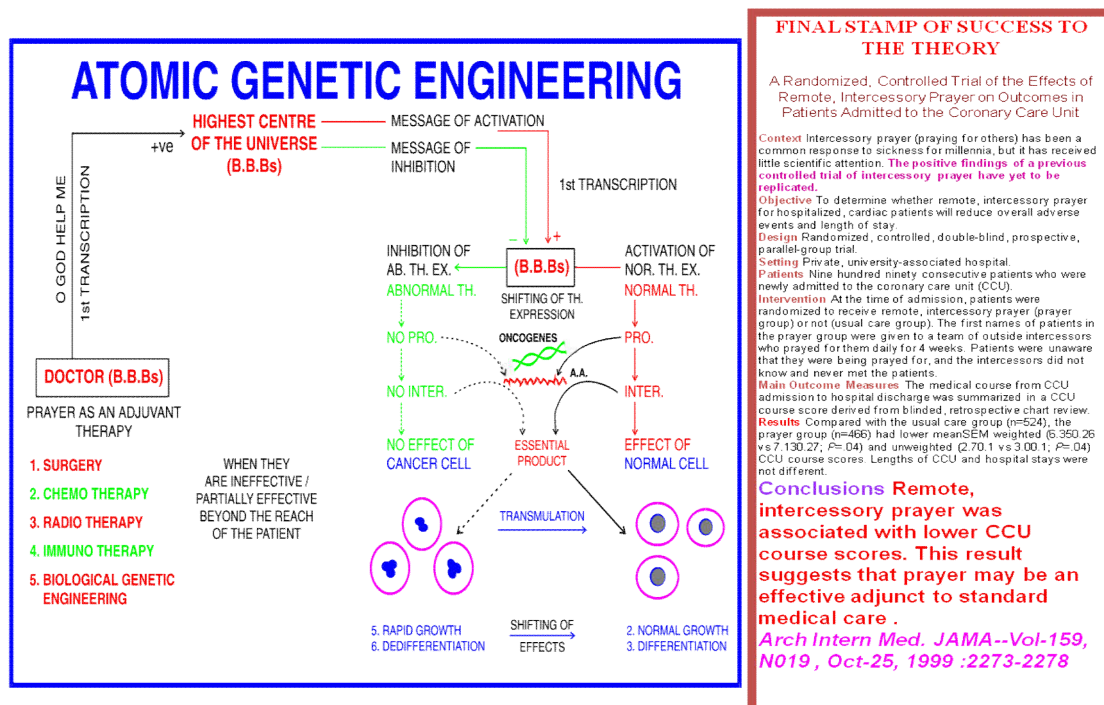

Fig. 4.1. A.G.E and Final stamp of success to New Theory[6]

Before the origin of the universe [2] nature had only one type of message systems which is called FIRST TRANSCRIPTION. Messages (Code PcPs) used to go from one B.B.B. to another B.B.B. by atomic transcription. Messages were carried by atomic genes (Code PcPs) with very very high velocity. It is the fundamental message system. After the origin of the universe, nature created atoms. It also created one more message system called SECOND TRANSCRIPTION. Here the message (code PcPs) are carried by photons from one atom to another atom with velocity of light. Thus atoms, molecules, cells, and even individuals talk with one another.

After the formation of the cell, nature created one more system called THIRD TRANSCRIPTION. Here there is a message storage system formed by DNA. There are messenger molecules called mRNA that carry message from DNA script to cytoplasm where the message (code PCPs) is read or translated by ribosome and they work accordingly. Thus the messages reach to enzymes and hormones and finally messages reach to target units. Having received the messages, target units work accordingly. Finally life effects (metabolic) are observed.

These three types of message systems are working in the nature. These message system are being used by the nature according to nature's need. as shown in Fig 5.

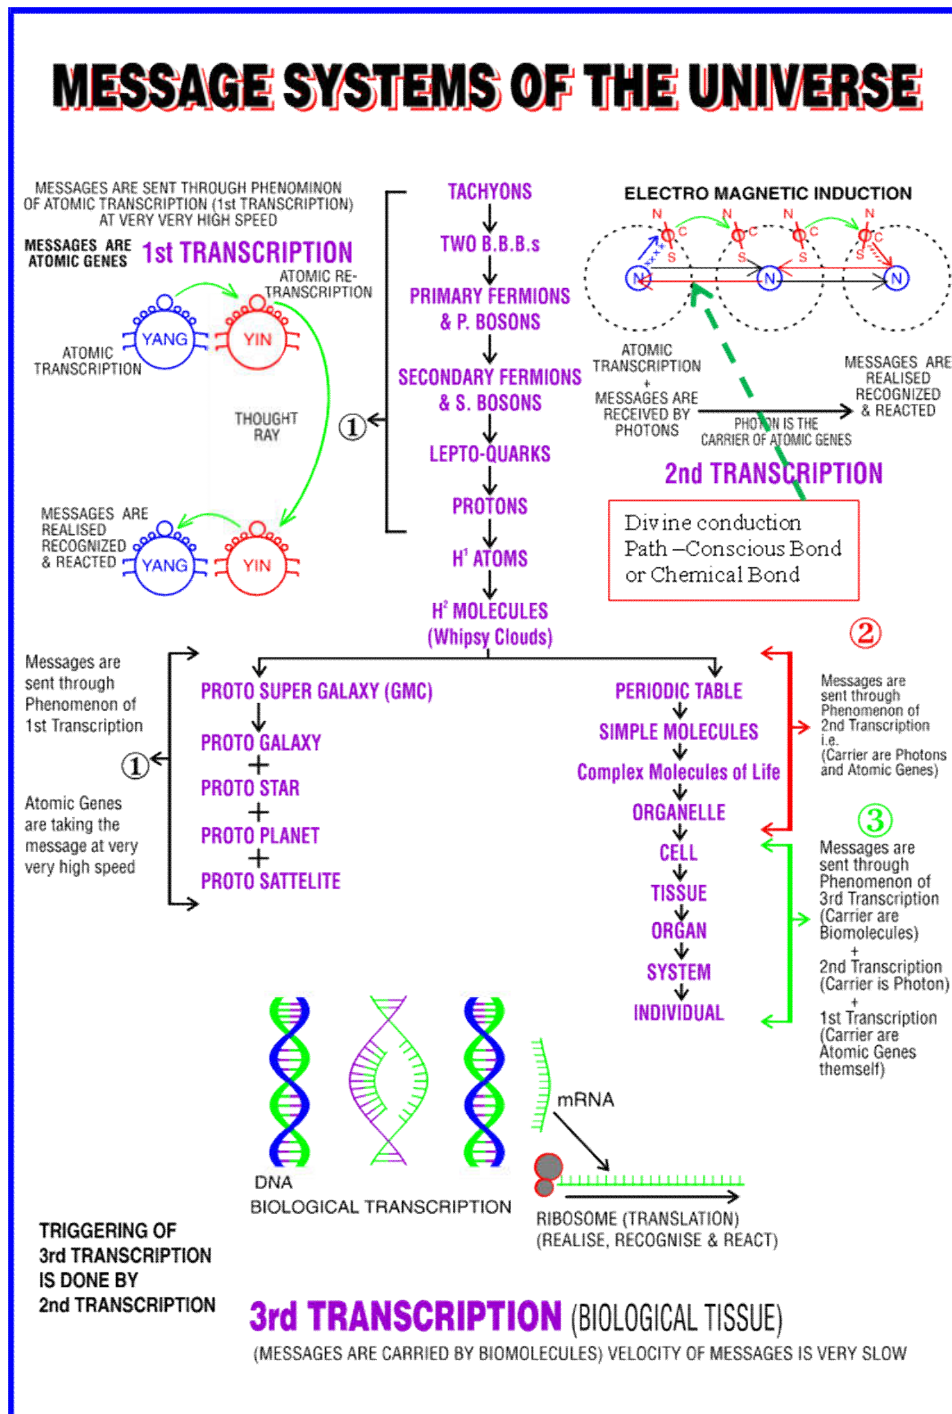

Fig. 5. Messages system of the universe

1.6. How does nature work & triggering of normal & abnormal effects

To understand creation physics as shown in Fig 6 and Fig 7.. There are two types of thought stimulation [2]. One is CONDITIONED THOUGHT STIMULATION and other one is UNCONDITIONED THOUGHT STIMULATION.

STIMULATION OF THOUGHT EXPRESSION --- There are two types of thought expressions one is CONDITIONED STIMULATION of thought expression, and other one is self stimulation of thoughts i.e. UNCONDITIONED STIMULATION of thought expression.

At the time of the origin of the universe, all effects got created. The cause of all effects of the universe is THOUGHT expression. These thought expressions were triggered by UNCONDITIONED OR SELF STIMULATED WAY. It is the first step and it is followed by PROGRAMMING or formation of programmed messages by code PCPs. This programmed message moves from higher centers to target B.B.Bs. it is called INTERACTION. Having received the messages, the mind and mass of the target B.B.Bs. work in a synchronized way so as to produced the effects as thought by a the higher center. If the thought expression by higher center is normal, the shapes, properties and laws produced by target B.B.Bs. would be normal and if the thought expressions are abnormal, the shapes, properties and laws would be abnormal. This is the basic concept of transmutation phenomenon. Finally what we observe is called EFFECT.

Appearance of new shapes, properties and laws is called TRANSMUTATION. The first three steps are collectively called CCP. During transmutation process if CCP is written, it does mean that unless the thought, programming and interaction take place, nature cannot transmutate. Transmutation phenomenon is seen in particles, atoms, molecules and even in cells. The basic steps of any transmutation remain the same except that the thought expressions differ. The subatomic particle are made up of more fundamental particles called Basic Building Blocks (B.B.Bs) which are made up of mind and mass. These B.B.Bs are divine in nature with the result they talk with each other by phenomenon called atomic transcription and translation (thought expressions). The triggering of broken symmetry is caused by atomic transcriptions. Unless the atomic transcriptions occur, subatomic particles could never exhibit phenomenon of broken symmetry. So the broken symmetry is never spontaneous. It is being mis understood that sub atomic particles do have spontaneous activities as far as broken symmetry is concerned. Hence the Nobel prize physics 2008 awarded to this work is too early to give prize.

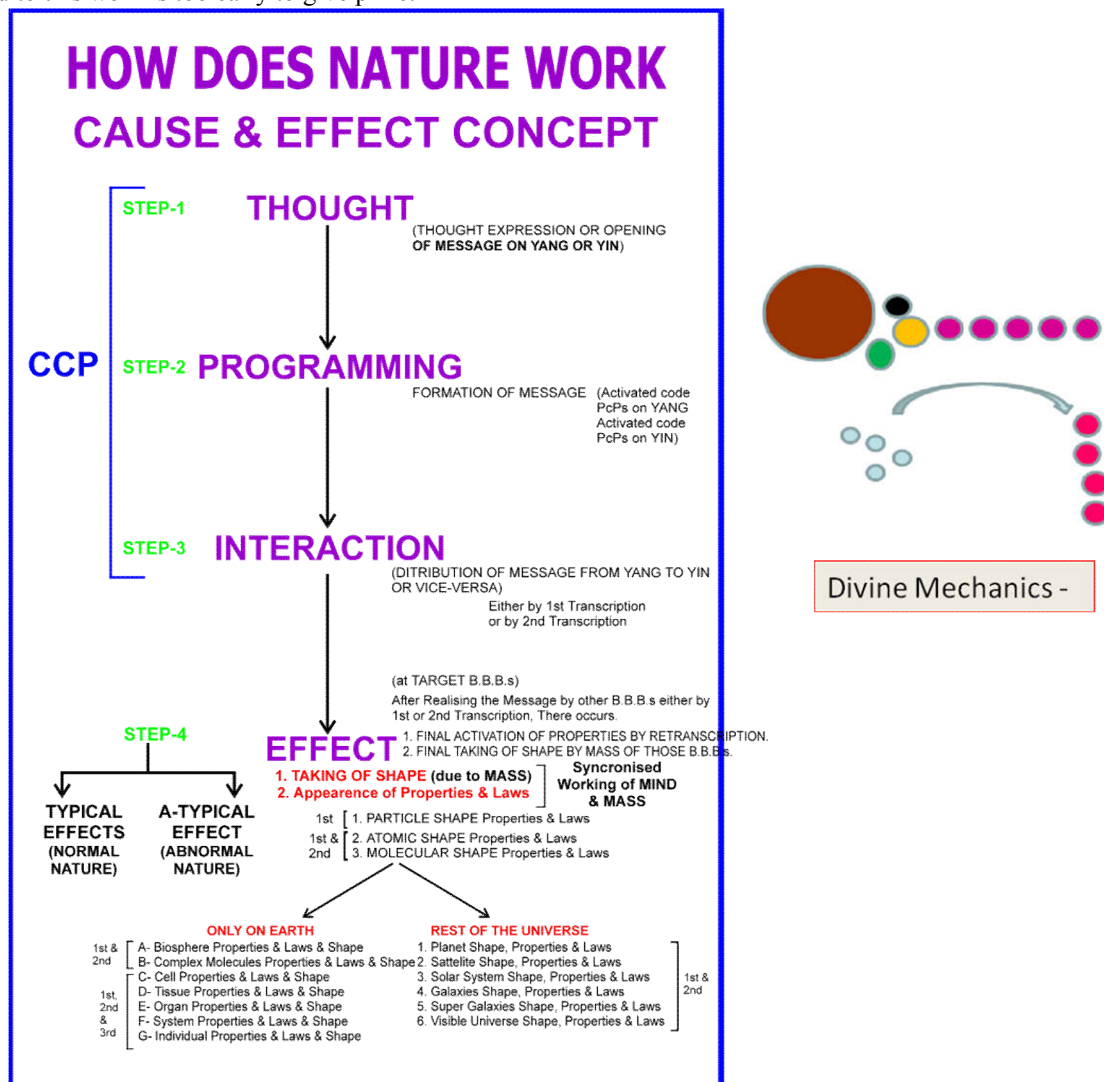

Fig. 6. Divine Mechanics – How Does Nature work ?

1.7 Message network of the Universe (Feed Back Mechanism and different centers of the Universe)

With the origin of universe, nature first created primary units i.e. primary fermions (gravitation) and primary boson, these primary units are equipped with one higher center (one B.B.B.) and rest of the B.B.Bs. are working as lower centers or target B.B.Bs.[2] After primary units,nature created secondary units i.e. secondary fermions and secondary bosons. similarly nature created tertiary units (lepto-quarks) and then quaternary units (protons& neutrons).

Each unit is equipped with higher centers, lower centers and target B.B.Bs. After quaternary units nature created atomic units, molecular units, complex molecules of life units, organelle units, cell units, tissue units, organ units, system units and individual units. Each unit is equipped with higher centers, lower centers, and target B.B.Bs. Similarly nature created satellite units, planet units, solar system units, galaxy units, super galaxy units, dark matter layer unit. These units are also equipped with higher centers, lower centers and target B.B.Bs. Thus our universe is divided into different units and each unit is equipped with higher and lower centers.

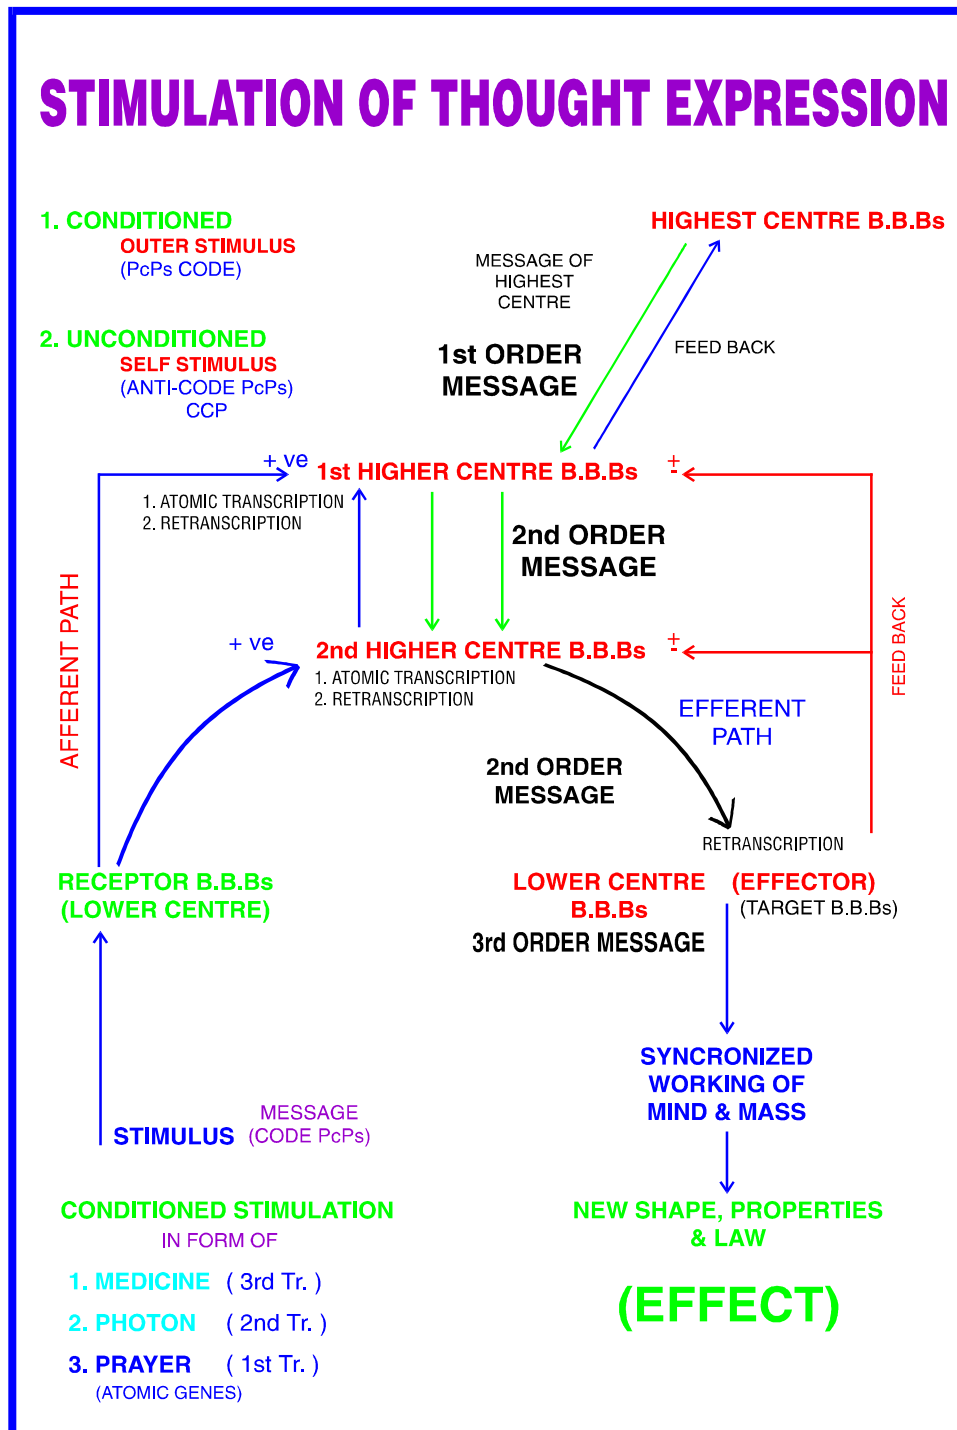

Fig. 7. Conditioned and Unconditioned thought expressions

All higher centers are under control of highest center of the universe by efferent paths. This efferent path is made up of first transcription. Higher centers can send messages to highest center of the universe by afferent path or feed back path. Thus highest

center of the universe is well informed about all effects of the universe. Messages can come from lower centers to higher centers and from higher centers to highest center of the universe via afferent path. The highest center of the universe can send messages to higher centers and from higher center to lower centers. There is an inter unit message network also which is made up of first, second and third transcription depending upon the nature's need. Thus the entire universe is under control of highest center of the universe. Highest center can change any programming programmed by it during pre creation era as shown in Fig 8.

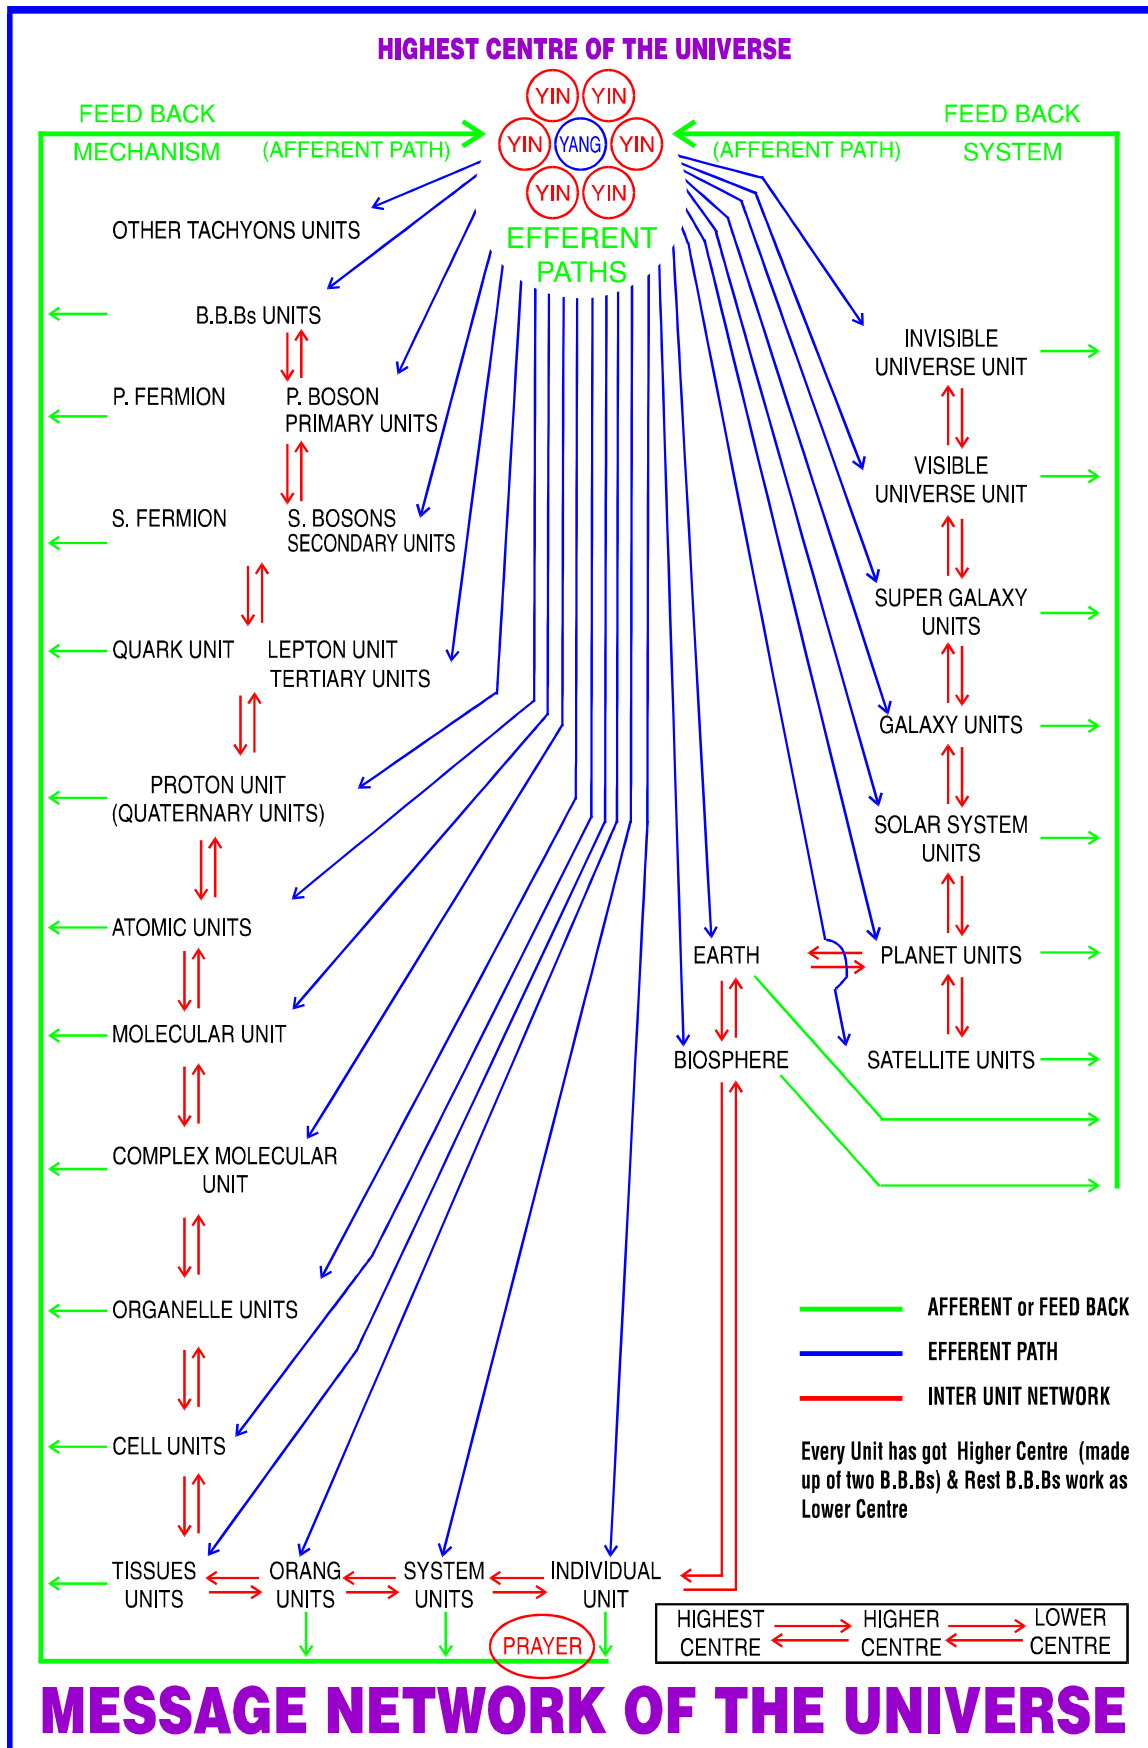

Fig. 8. Messages Net work of the Universe

1.8 Origin of the universe [7]

UNIVERSE "I"

Fig. 9. Development of the Universe

Before the origin of the universe, these Basic Building Blocks (B.B.Bs) as shown in Fig-3 were in the form of tachyons as shown in Fig- 9 [7]. It means that at that time the tachyons were everywhere in the universe. Let us look at the structure of tachyons; it is made up of one matter B.B.B. (YANG) and many energy (YINs) B.B.Bs. Initially out of the infinite tachyons, one became the highest center of the universe. Messages used to go from highest center to rest of the universe and messages could come from rest of the universe to highest center of the universe by atomic transcription. Thus highest center had fed its thought to rest of the B.B.Bs. that would take part in creation - that they would express only those thoughts to give desired effect as wished by the highest center of the universe. So all B.B.Bs were informed about their role before creation of the universe. In pre-creation era programming of the future universe was done by highest center of the universe.

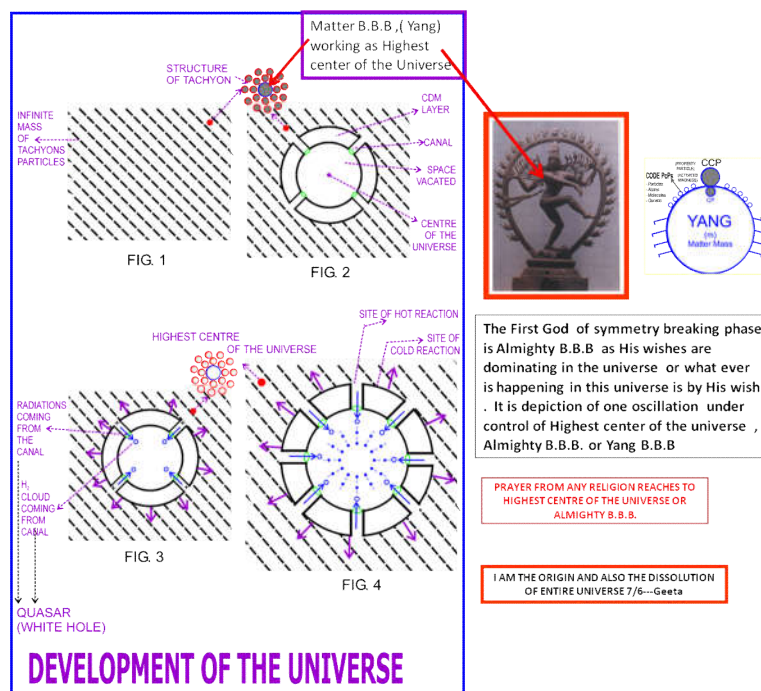

Figure 9.1. Hoyle Narlikar Universe OR Universe "I"

Our universe is oscillating and it is a divine universe. It means that it has a creation phase and a destruction phase. During creation phase tachyons break into their B.B.Bs. and from these B.B.Bs, formation of fermions and bosons take place as shown in Fig 3.1. After the creation phase, destruction would start and in this phase all created particles would again break into their B.B.Bs and finally tachyons would form.

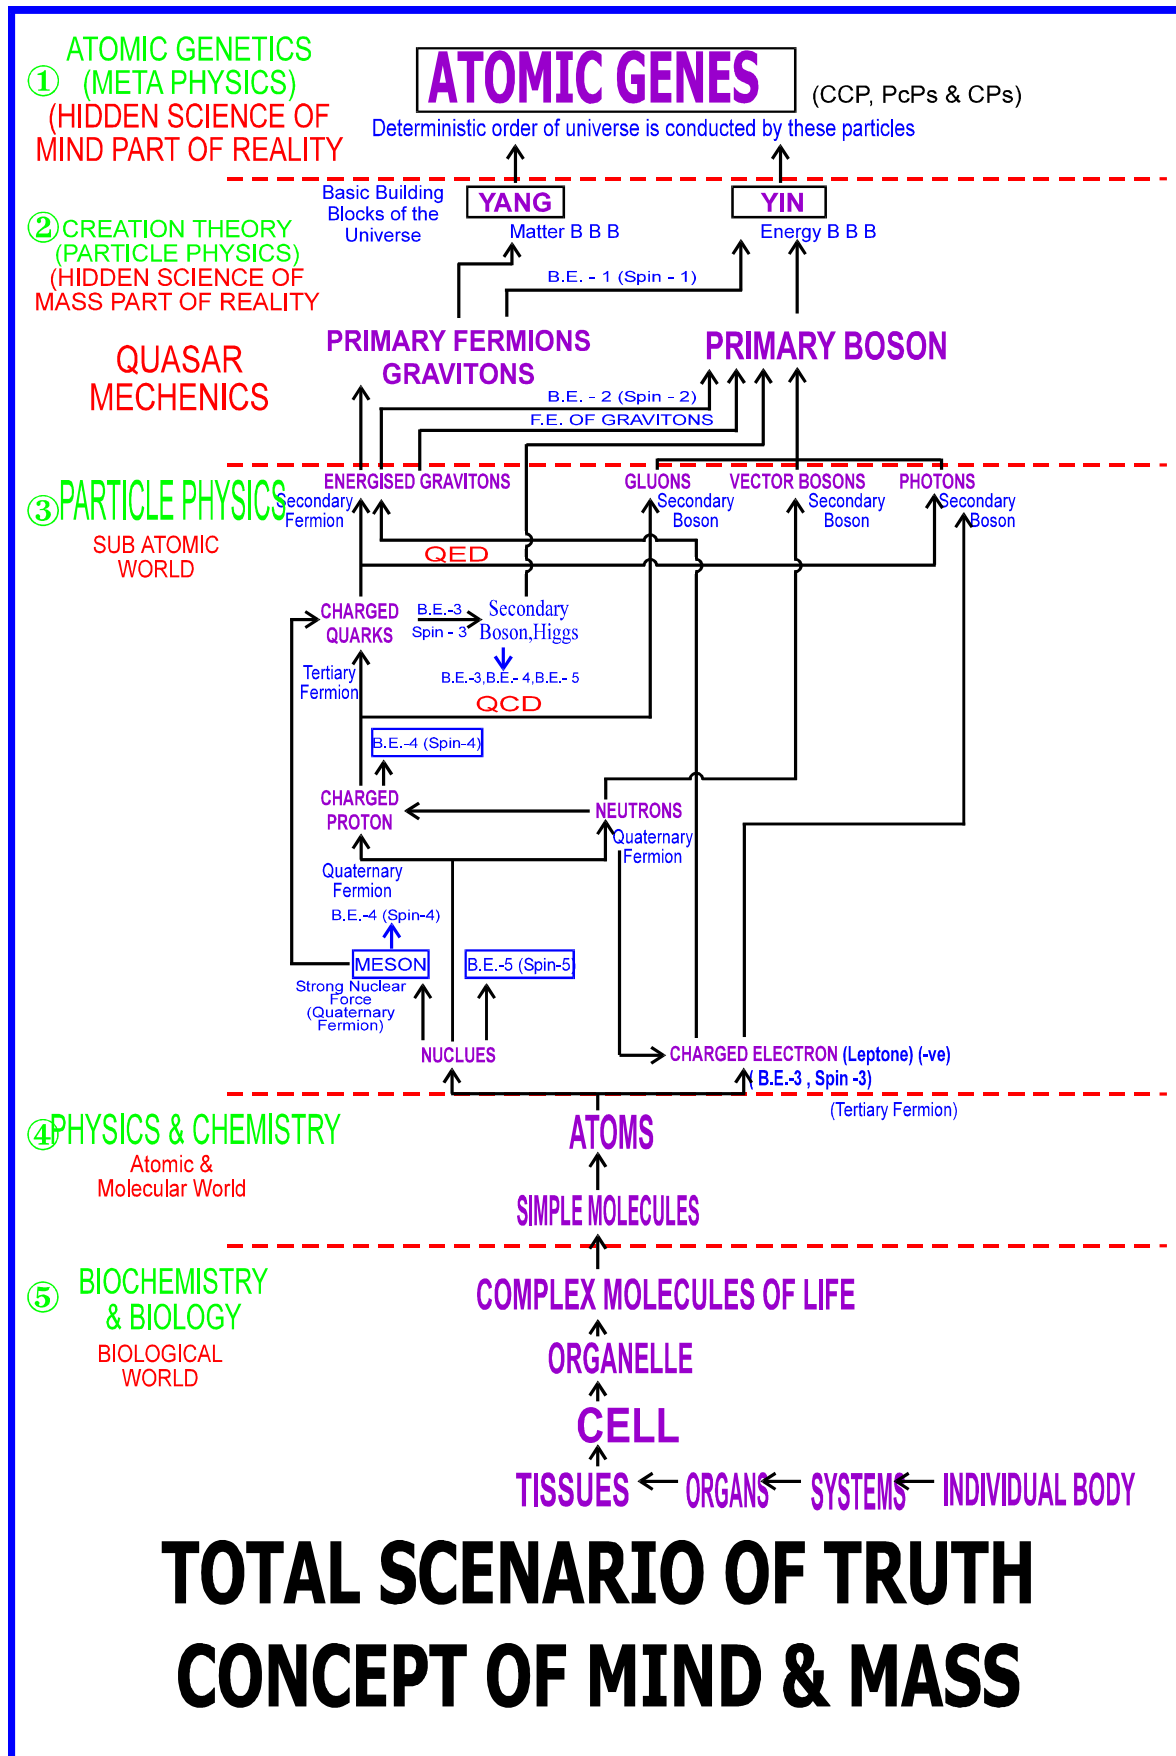

Fig. 9.2. Total scenario of Truth Mind and Mass

At the time of origin of the universe, all the effects got created. These effects are taking of different shapes and appearance of properties and laws. All these effects are studied in various branches of science. With the origin of the universe, nature first created a sphere of COLD DARK MATTER (C.D.M) and canals in it. With the result space got created. At the other end of the canals, hot reaction started (the relics are back ground radiations 2.7 degree K of our hydrogen clouds). As a result hydrogen clouds and lot of radiations were created.

The empty canals were filled by these hydrogen clouds and radiations and thus QUASARS appeared in the universe. Simultaneously C.D.M. layer started expanding and clouds and radiations kept on coming in this closed universe as shown in Fig 9. With the passage of time more and more C.D.M. layer formed, more and more quasars formed. The hydrogen cloud came in this closed universe. They started running towards C.D.M. layer as they were attracted by the gravity of C.D.M. layer. Those clouds, which were nearer, moved faster than those, which were away from CDM Layer. The HUBBLE LAW, can thus be explained. With some more passage of time, clouds were joined to form GMC (giant molecular clouds). Later by self-gravitation different proto stars, proto planets, proto satellites were formed. Finally stars became bright and thus bright galaxies appeared in this universe. Our universe is still in expansion phase and creation is still going inside quasars. It is to be remembered that highest center of the universe does not come in the visible universe. It keeps on receiving the messages by atomic transcription and it has power to change any programming programmed by it during pre-creation era.

It is the atomic genes which constitutes mind part of reality. Mind incorporation in physics is awaited as theory of every thing is not yet investigated. I have investigated theory of every thing (ToE) and I found that while studying unified theory at the time of origin of the universe by Hoyle Narlikar universe, it was mind reality that triggered symmetry breaking phase. It is mind reality that triggers oscillation phenomenon of the universe. It is the mind reality which is behind perfect cosmological principle. There is nothing like artificial intelligence in the universe. These mind particles constitute intelligence of the universe that controls the deterministic order of the universe. It is the mind reality behind all effects of the universe. But this is not our mind rather it is mind of Almighty B.B.B (Yang B.B.B or matter B.B.B. or Male B.B.B working as Highest center of the universe). His mind could be manipulated by prayer only. as shown in Figure 9.1 and 9.2

1.9 DM and DE i.e. energized gravitons and energy pool of the universe as shown in Fig 10 and Fig 11 [8]

Fig. 10. Structural configuration of Leptons and Quarks as regard DM and structural configuration of DM and DE at micro level

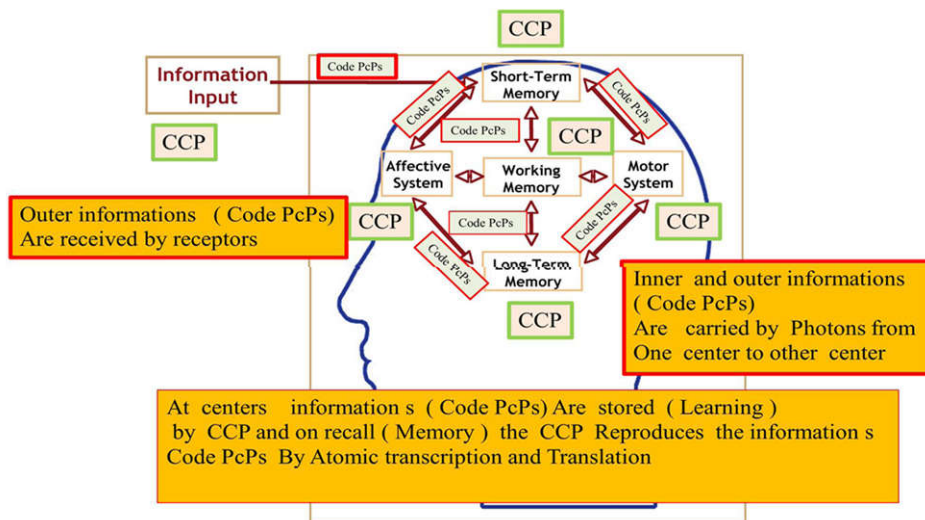

Fig. 11. Structural configuration of DM and DE at macro level [9]

Divine Mechanics and Brain Computation

Learning and Memory and information s (Code PcPs) Net work in Brain [10]

Divine Mechanics and Brain Computation

Fig. 12. Divine Mechanics of Brain Computing System – Learning and memory

At all steps, these are B.B.Bs (B-Bit) that are responsible for information's control and triggering. If CCP is written it means unless atomic transcription and translation occur, brain cannot have learning and memory triggering and control and it is called Divine mechanics of Biology and it is life. These are higher thought expressions of B.B.Bs. In Bits of classical computers and qubits of QC, the thought expressions are lower and different but the mechanics (DIVINE) remains the same. As shown in Fig 12.

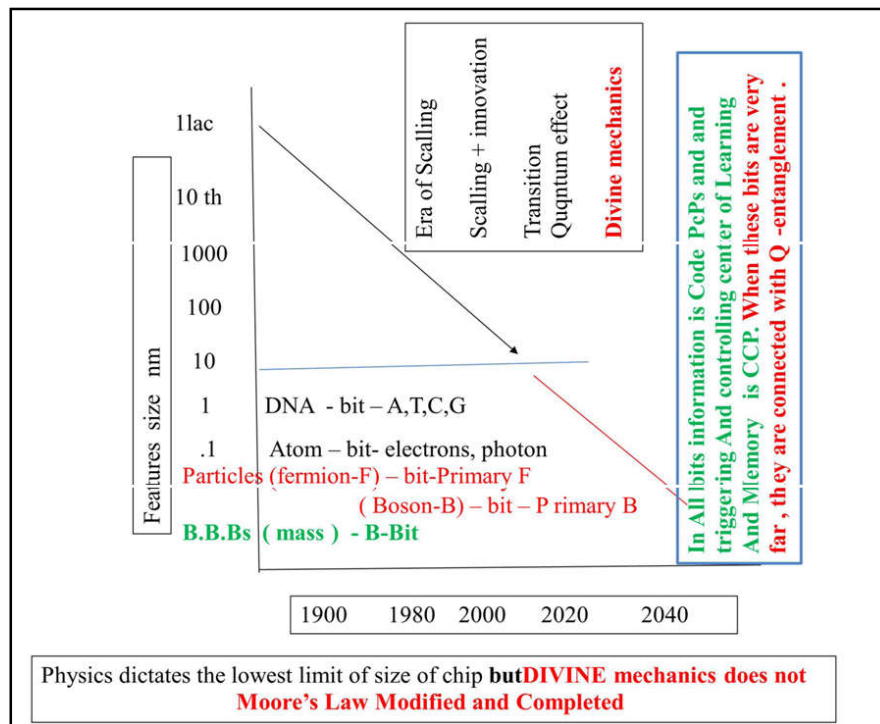

Fig. 13. The Theory of Computers and Brain are same – DIVINE MECHANICS

(Structural and Functional smallest Bit (mass) is B-Bit of the universe and the Divine Mechanical Unit is CCP, Code PcPs and CP.)

DIVINE MECHANICS The Theory of Computers and Brain is SAME as shown in Fig 13

Physics dictates the lowest limits of the size of chips [11]. But divine mechanics does not. Hence the bit is a typical unit of information. ((Classical and Quantum Bit) is wrong and to describe informations by adding qubit is also illusion as in complicate system, it is the different thoughts expressions that describe informations. Informations are separate (Code PcPs) and bits (Electron of transistor) qubits (electron of diamond crystal) are separate. At DNA level the bit is nucleotide (A,T,C,G) and at Atomic level the bit is photon and electron, at particle level (secondary fermions and secondary bosons) the bit is primary fermions and primary bosons and informations are still code PcPs and at B.B.B level the bit is B.B.B (Yang mass and Yin mass - B- bit) it self and the information is carried by Code PcPs but at all level of all bit units the information storage system is CCP (Physiological arrow of Time) it never dies even after destruction of the universe. Hence informations are eternal. In computers, Bit is a structural configuration that describes informations of the system and informations are in form of Code PcPs. The working of the bit is triggered and controlled by thoughts of higher centers that form that bit. If the bit is classical (transistors of chips) the effect is different. But if the bit is qubit with entanglement the working is triggered and controlled by thoughts of higher center that form that crystal. In both the effect of describing informations would be different.

One is classical (thought expressions are fixed and limited) and other one is quantum (thought expressions are changing and more wide to describe the more wide complicated system to have fast results.). In life sciences in Brain the bit is again Photon and the informations are Code PcPs and they are triggered and controlled by CCP of higher centers that is triggered by DIVINE MECHANICS.

In life sciences the CCP (cryptography) of B-bit expresses informations (Code PcPs) which were not fed like speaking Lie and unlike Bit of classical computer and qubit of QC it shows phenomenon of forgetfulness and IQ phenomenon (mental age /real age). It is Higher functions of B.B.B or B Bit and it is life. Hence there is difference in some aspect of DIVINE MECHANICS \of Computers computation and Brain computation

Structure

2.1 Modified theory of atomic structure as Niels Bohr's theory has limitations in explaining different series of hydrogen spectra. New assumptions of structure of hydrogen atom. – Divine Modified Niels Bohr 's Theory (Divine MONB) as shown in Fig 14.3

1. Hydrogen atom is like a miniature solar system with the negatively charged electron moving in circular orbit around positively charged nucleus having positively charged particle proton. In this circular orbit or stationary orbits, electron is being held by single string of energized gravitons. This energy level is called ground state.
2. When Hydrogen atom is excited, the electron moves from ground state to excited state energy levels making a bigger circular orbit and having reached in this new energy levels, it also emits radiations. Hence absorption and emission of energy quanta occur simultaneously. Shifting is understood in inter orbital shift phenomenon.
3. When excitation is over, the electron once again come back to ground state energy level. All above mentioned events are triggered by different thoughts or atomic transcriptions from the nucleus or proton in case of hydrogen atom.
4. These atomic transcriptions are being triggered by conditioned stimulation of CCP by the message system made up of photons (second transcription or -ve charged photons or afferent path) coming from electron to proton and further they are transmitted by photons (second transcription made up of +ve charged photons, or efferent path) to electron. Having received the messages, electron works accordingly. Unless the thought is expressed, nature cannot work. as shown in Fig 14
5. When electron is in ground state, its interaction with energized graviton and electromagnetic photon is more hence IP - 13.59ev (n=1) is required to remove electron from this energy level. During excited stage the interaction is different hence I.P. to remove electron from this state is -3.4ev (n=2), -1.511ev (n=3),- 0.850ev (n=4), -0.544ev (n=5) respectively. It the changing thought of interaction with energized graviton and electromagnetic photons that gives changing effect.
6. Electronic configuration of higher atoms could be known by studying I.P. curve. Working of hydrogen atom as shown in Fig 14.

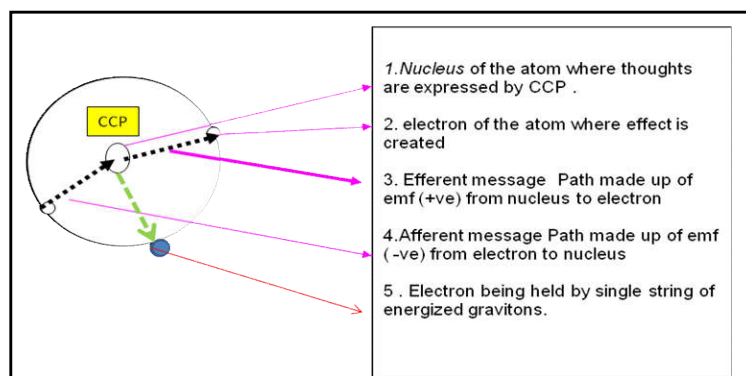

Fig. 14. Working of hydrogen atom – Divine MONB Theory

2.2 Atomicgenetics and Origin of Earth

To know mystery of Bermuda triangle, we have to understand origin of solar system.

ORIGIN OF THE EARTH AND SOLARSYSTEM

Figure 15. Origin of solar system

Till today it is believed that earth is the part of sun and sun is second generation star. There are observations which contradict this hypothesis. After the formation of rotating GMC (giant molecular cloud), there developed many nidus (B.B.Bs working as higher centers) in the rotating nebula. These higher centers expressed thoughts of condensation of nebula in different sectors that will give rise to formation of proto stars, protoplanets, proto satellites and proto asteroids and thoughts of contraction or collapse that will cause shrinkage of proto star, protoplanets and proto satellite. The formation of asteroid belt is due to thought expression of clumping or collapse. Thus there developed many different sectors in same nebula. Along with this the spin thoughts were also triggered. This led to development of spin of proto star, protoplanets, proto satellites and proto asteroids.

Finally the nebula transformed into proto star, protoplanets, proto satellites and proto asteroids. About 4.6 billion years ago, formation of our solar system took place. (Figure 15) In these proto star, protoplanets, proto satellites, proto asteroids many other different thought expressions were expressed by many other higher centers (B.B.Bs) that had led to formation of sun, different planets, different satellites and asteroid belt between mars and Jupiter. ALL ARE BORN FROM SEPARATE NEBULAR SECTORS AND THUS THEY ARE CREATED WHERE THEY ARE PRESENT NOW IN ORBIT. They all have their different shapes, size, different properties, different compositions and behavior which were triggered by many different higher centers. The asteroid belt present between Mars and Jupiter was created from proto asteroid by phenomenon of clumping. THIS WAS ALL DUE TO UNCONDITIONED THOUGHT EXPRESSIONS OF B.B.Bs. (Figure 7)

Origin of Continents and Shifting of Continents

When the Earth was forming, there developed many other higher centers for different thought expressions. These were—

- Thought expressions of formation of continents and water.
- Thought expressions of formation of different layers of the earth.
- Thought expressions of formation of different layers of atmosphere.

And thus Pangea continent, sea, different layers of earth, and different layers of atmosphere were formed by target B.B.Bs. Simultaneously there developed other higher centers which expressed following thoughts—

- Thought expression of ignition of the core
- Thought expression of magma.
- Thought expressions of shifting of continents (Figure 16)
- Thought expressions of seismic foci
- Thought expression of water cycle

And thus formation of heat in the core, magma in mantle layer, seismic foci in lithosphere (Figure 17), shifting of different continents in their respective directions and appearance of water cycle took place by different target B.B.Bs. This was all triggered by unconditioned working of B.B.Bs. The entire transmutation took place simultaneously

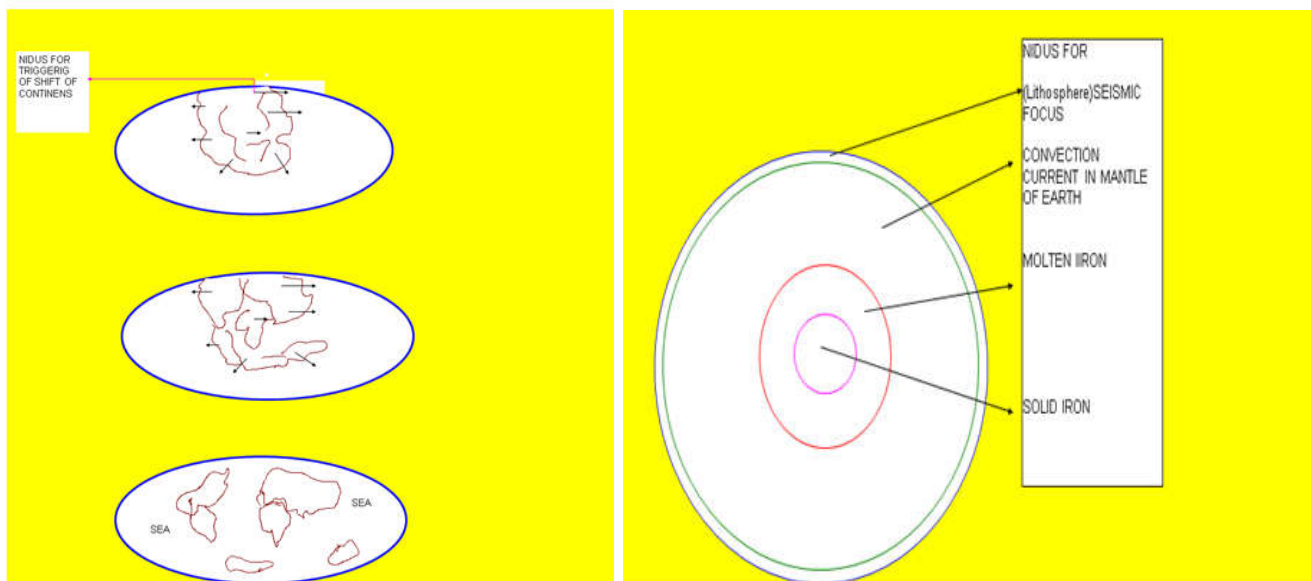

Figure 16. Shifting of continents Figure 17. Nidus for seismic foci

2.3 Atomic genetics and triggering of and regulation Law of Floating (Bermuda Triangle Mystery)

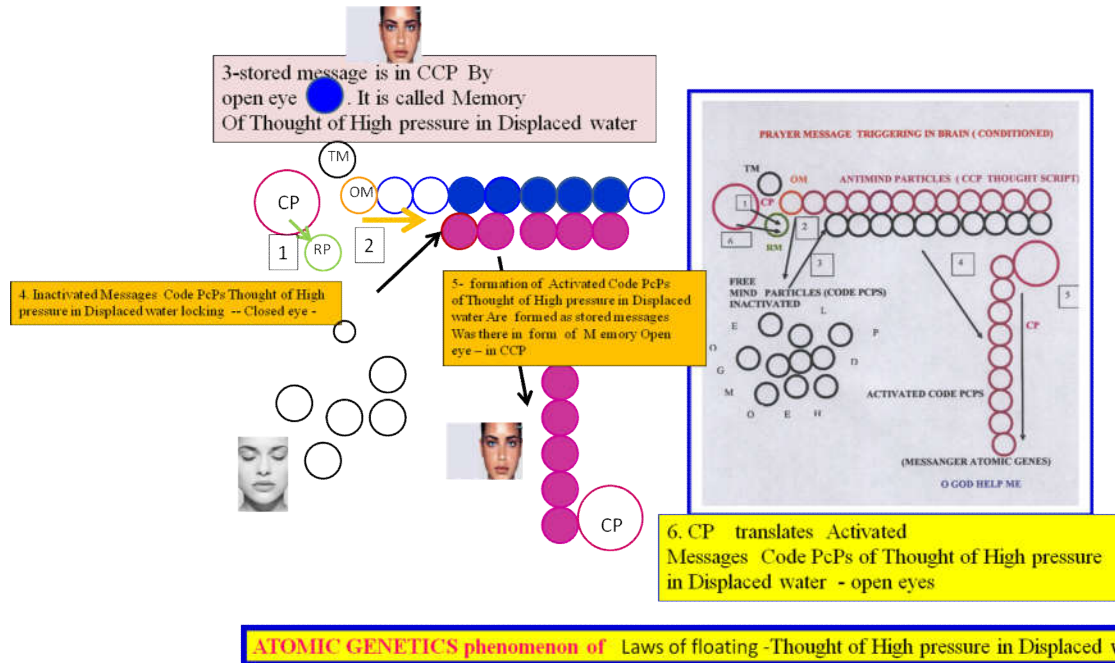

Fig. 18. Triggering of Law of Floating thought of High pressure in displaced water (micro level)

In phenomenon of thought of High pressure in displaced water, following steps take place on Yang B.B.B – B-Bit (Figure 18).

1. CP removes RM (repressor mindness-green) from OM (operating mindness -orange) thus induction of recall is triggered
2. OM searches learning mindness on Anti mind particles (Anti mind particles script) of that thought script (blue filed circles- open eye) of “thought of High pressure in displaced water”
3. But as that learning mindness is there with opening eyes of learnt anti mind particles.
4. Inactivated code PcPs “thought of High pressure in displaced water “ mind particles triggering to lock on Anti mind particles script
5. Formation of activated code PcPs “thought of High pressure in displaced water ” as stored messages was there in form of memory (open eye)
6. Finally there is activated message of “thought of High pressure in displaced water” is formed (Filled magenta circle – open eyes) by CCP (filled circle blue –open eyes). CP makes phenomenon of splicing.
7. 7CP represses act of recall memory by adding RM (green) to OM (orange). Thus recalling information s of “Laws of floating” gets halt.

Fig. 19. Thoughts of Law of Floating (macro level)

Laws of sailing of ship (sea) and flying of aero plane (air) do work all over globes except in area of Bermuda triangle. When ever ship sails in sea, the water is displaced by its weight. But it connects with water and Laws of floating gets triggered by conditioned thought expression in higher center (B.B.B.) of water (displacement of water is stimulus). Programmed messages of Code PcPs of floating is formed and messages spread in water B.B.Bs. Having received the messages, water target B.B.Bs work accordingly and

it prevents ship to sink and we say ship is floating by displacement of water. Similarly aero plane runs on runway, the air current is displaced in two different segments upper segment and lower segment (due to body designing of aero plane). Higher centers of each segment expresses two thoughts separately. Messages Code PcPs of low pressure in upper segment and messages Code PcPs of higher pressure in lower segment are formed. The messages spread to target B.B.Bs of two segments of air separately. With the result law of flying in air is formed (Bernoulli's principle) and aero plane lifts for flying.

Atomicgenetics and triggering and regulation of Law of Flying i.e. Low pressure Code PcPs and High pressure Code PcPs

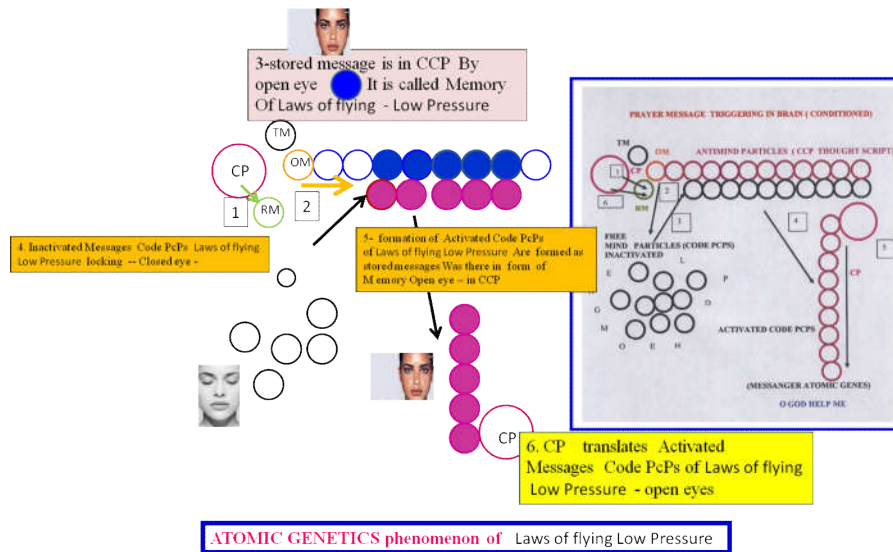

Fig. 19. Thoughts of Law of Flying Triggering of thought of Bernoulli's principle Low pressure Code PcPs (micro level)

In phenomenon of Laws of flying Low pressure, following steps take place on Yang B.B.B – B-Bit (Figure 19).

1. CP removes RM (repressor mindness-green) from OM (operating mindness -orange) thus induction of recall is triggered
2. OM searches learning mindness on Anti mind particles (Anti mind particles script) of that thought script (blue filed circles-open eye) of “Laws of flying Low pressure”.
3. But as that learning mindness is there with opening eyes of learnt anti mind particles.
4. Inactivated code PcPs “Laws of flying Low pressure “ mind particles triggering to lock on Anti mind particles script
5. Formation of activated code PcPs “Laws of flying Low pressure ” as stored messages was there in form of memory (open eye)
6. Finally there is activated message of “Laws of flying Low pressure” is formed (Filled magenta circle – open eyes) by CCP (filled circle blue –open eyes). CP makes phenomenon of splicing.
7. CP represses act of recall memory by adding RM (green) to OM (orange). Thus recalling information s of “Laws of flying Low pressure” gets halt.

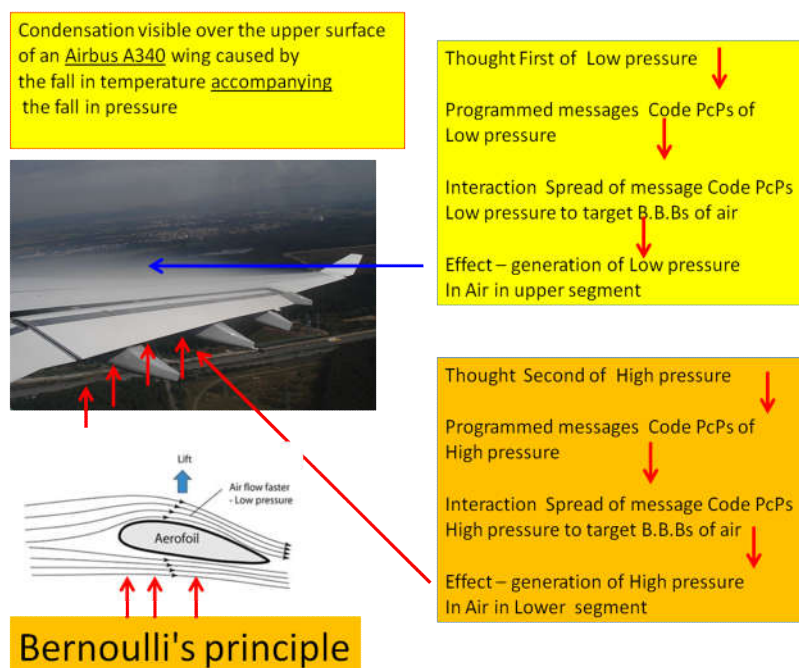

Fig. 20. Condensation visible over the upper surface of an Airbus A340 wing caused by the fall in temperature accompanying the fall in pressure (macro level)

In modern everyday life there are many observations that can be successfully explained by application of Bernoulli's principle, even though no real fluid is entirely inviscid^[22] and a small viscosity often has a large effect on the flow. Bernoulli's principle can be used to calculate the lift force on an airfoil, if the behavior of the fluid flow in the vicinity of the foil is known. For example, if the air flowing past the top surface of an aircraft wing is moving faster than the air flowing past the bottom surface, then Bernoulli's principle implies that the pressure on the surfaces of the wing will be lower above than below. This pressure difference results in an upwards lifting force.^{[d][23]} Whenever the distribution of speed past the top and bottom surfaces of a wing is known, the lift forces can be calculated (to a good approximation) using Bernoulli's equations^[24] – established by Bernoulli over a century before the first man-made wings were used for the purpose of flight. Bernoulli's principle does not explain why the air flows faster past the top of the wing and slower past the underside. See the article on aerodynamic lift for more info.

Principle of Floating - Scientific view

An object floats when the weight force on the object is balanced by the upward push of the water on the object. The upwards push of the water increases with the volume of the object that is under water; it is not affected by the depth of the water or the amount of water. If the weight force down is larger than the upward push of the water on the object then the object will sink. If the reverse is true then the object will rise – rising is the opposite of sinking. Different objects float at different levels in the water because as most regular objects are lowered into the surface of water, the upward push of the water steadily increases until it is in balance with the weight force of the object, and the object then continues floating at this level with the two forces in balance.

Many objects that are hollow (and so generally contain air) float because the hollow sections increase the volume of the object (and so the upwards push) for very little increase in weight force down. However, it is not necessary for an object to contain air in order to float. No object can float without some part of it being below the surface of the water. Until and unless these thoughts are expressed, ship would sail in sea and aero plane would fly in air. Phenomenon of Lawlessness triggered by unconditioned thought expression by Time mindness that led to inhibition of thought of law of Floating Or Flying in Bermuda triangle leading to sinking of ship or crashing of aero plane.

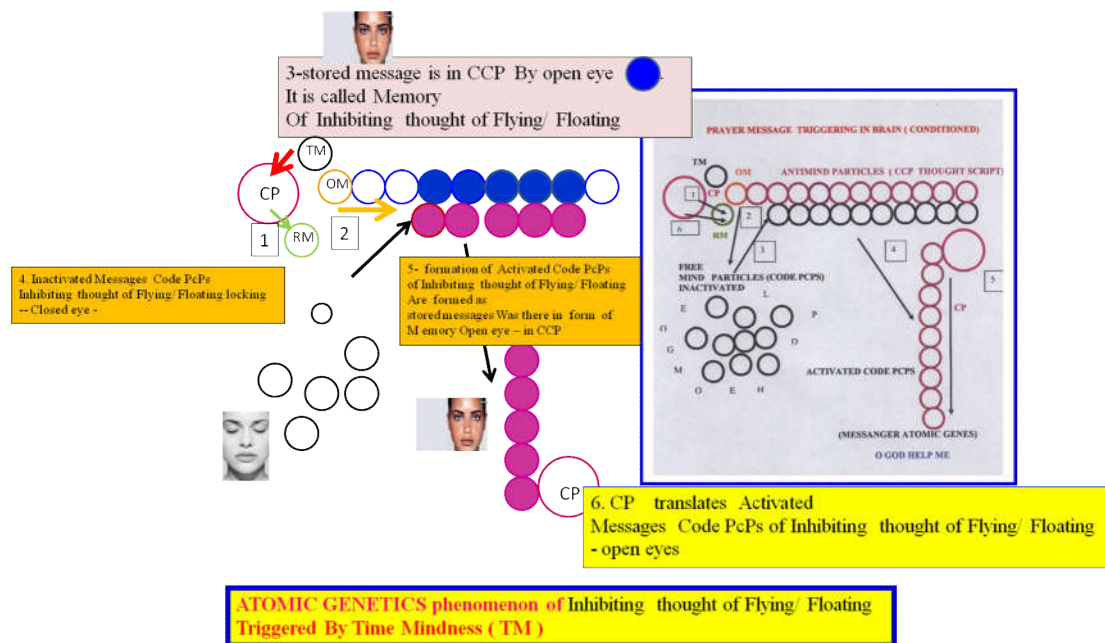

Fig. 21. Separate Thought Expression of Inhibiting of thought of Flying / Floating triggered by Time Mindness (TM) Lawlessness by Unconditioned thought expression. (micro level)

In phenomenon of Inhibiting of thought of Flying/ Floating, following steps take place on Yang B.B.B – B-Bit (Figure 21). TM triggers the thought expression separately.

- CP removes RM (repressor mindness-green) from OM (operating mindness -orange) thus induction of recall is triggered
- OM searches learning mindness on Anti mind particles (Anti mind particles script) of that thought script (blue filed circles-open eye) of “Inhibiting thought of laws Flying/ Floating”.
- But as that learning mindness is there with opening eyes of learnt anti mind particles.
- Inactivated code PcPs “Inhibiting thought of laws of Flying/ Floating “ mind particles triggering to lock on Anti mind particles script
- Formation of activated code PcPs “Inhibiting thought of laws of Flying/ Floating” as stored messages was there in form of memory (open eye)
- Finally there is activated message of “Inhibiting thought of laws of Flying/ Floating” is formed (Filled magenta circle – open eyes) by CCP (filled circle blue –open eyes). CP makes phenomenon of splicing.

- CP represses act of recall memory by adding RM (green) to OM (orange). Thus recalling informations of “Inhibiting thought of laws of Flying/ Floating” gets halt.

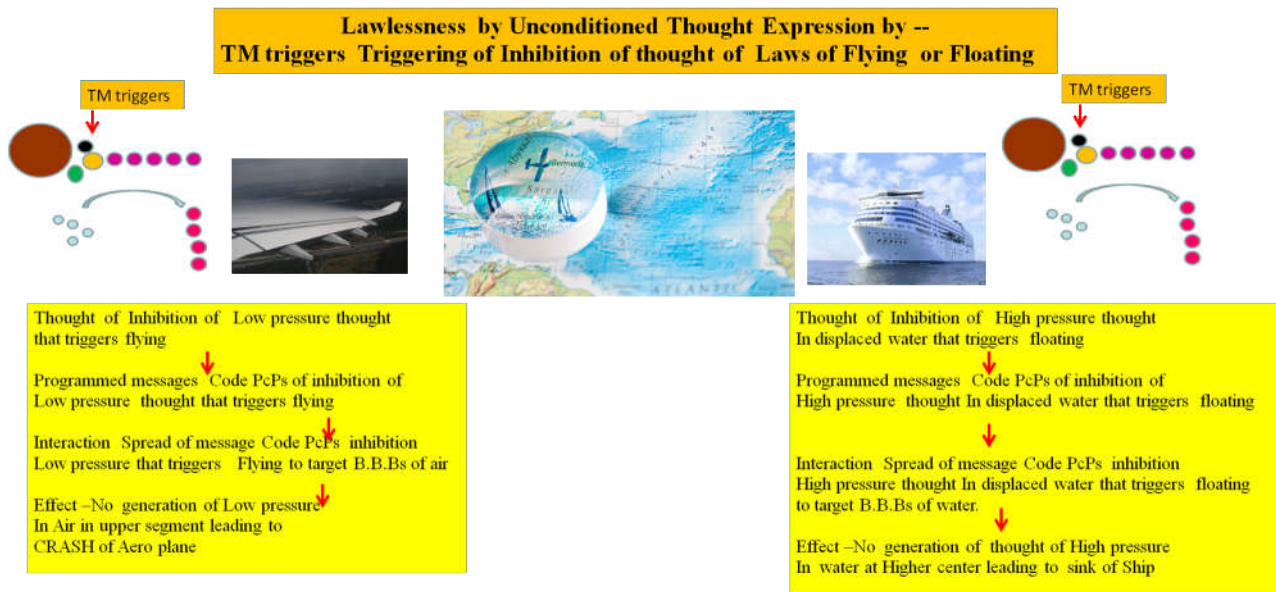

Fig. 22. Phenomenon of Lawlessness triggered by unconditioned thought expression by Time mindness that led to inhibition of thought of law of Floating Or Flying in Bermuda triangle leading to sinking of ship or crashing of aero plane (macro level)

While crossing Bermuda triangle, Time mindness (TM) triggers one more thought (CCP) i.e. thought to inhibiting the thought of laws of floating in water or flying in air. With the result Code PcPs inhibition of thought of laws of floating in water or flying in air are formed. Messages reach to higher centers where thought of floating or thought of flying are being formed. Having received the messages, higher centers of water and air stops expressing the thought of floating or flying respectively. With result sinking of Ship and crashing of aero plane effects would be visualized (macro level). These thoughts of inhibiting the thoughts of flying or floating are fed thoughts and feeding was done in precreation era by Highest center of the Universe. Hence it is Fed Act of God.

Fig. 23. Prediction of Theory to inhibit Fed act of God by Atomic Genetic Engineering (AGE) or Feedback phenomenon (Quantum entanglement) and if prayer is accepted then by First order of Universe (Quantum entanglement) inhibition of Fed Act of God and making journey Safe of Ship and Aero plane

Conclusion

Prediction of Theory

This lawlessness at Bermuda triangle triggered by unconditioned thought expression by Time mindness (TM) leading to inhibition of thought of Law of Floating or Flying making ship to sink or aero plane to crash making Bermuda triangle Devils triangle could be overcome by Atomic genetic Engineering (Prayer) where Highest center of the universe could inhibit Time mindness (TM) (by first order of universe) not to trigger inhibiting thought of laws of floating or flying making journey safe. There are many thoughts that trigger laws of floating or flying but to understand the concepts few thoughts have been depicted in diagrams. There is feed back to higher centers before the next thought is triggered. The phenomena of Floating of ships or flying of aero planes are

being regulated by TM mindness that trigger these thoughts. These thoughts (of Floating or Flying and their inhibition to lead to sinking and crash) are fed thoughts and feeding were done in pre creation era by Highest Center of the universe.

Acknowledgement

My gratitude to my teachers who taught me physiology specially Prof. B.D.Sharma to show me the way to think science and its propagation . He used to teach by Mc Naught “ Illustrated Physiology” that made me to illustrate the universe from micro (God Particles) to Macro (Hoyle Narlikar Universe). with research of “Mind”. or “Atomic genetics”. Prof. Bhrum Dutt awarded me distinction in physiology at M.L.B Medical College Jhansi U.P. India
