#### ABSTRACT

Mind, the inner most box of nature has not been investigated by modern physicists. Mind has not been incorporated in Standard model. Mind can only be studied by participatory science. Having searched Basic building blocks of the universe i.e. mass part of reality (figure 1.1) [9], we have also investigated mind part of reality and finally two fundamental particles with mind and mass realities are hypothesized (figure 1.2). Now we discuss how to further investigate mind so as to know their structures and functions. Atomic genetics is the branch of science where we investigate about fundamental interactions of the universe i.e. atomic transcription and translations. New words have been coined to understand hidden science of mind part of reality. Mind reality have been recognized as different faces by “I” about 5000 years back to Arjuna in Mahabharata. It is just like to understand any language through Alphabets. These are (different faces) Alphabets of mind reality. One Mind reality has one face identity and the second mind reality has second face identity and so on. The facial expression represents phenomenon of intelligence and different face represents different types of properties carrying property. The open eyes means property is activated while close eye means property is inactivated. In spite of carrying properties consciousness they also know how to conduct not only origin of universe but also how to create two different universe i.e. next creation could be different from this creation. In all, It is automatic system of the universe. The mind realities which are of good properties have devtas face identity (first five faces on both side) and those mind realities which are of bad properties have demons face identity (last four faces on both side). These are named as code PCPs or messenger atomic genes. The central face is CCP or Thought script where all thoughts of the universe are banked. It is bank of data of all informations of the universe It is face identity of Anti mind particles as data of all informations of the universe are stored as anti mind particles. It is the Time mind ness (biological clock) that keeps on expressing different thoughts from this thought script (CCP). There are four more faces (black bodies) shown on extreme left and right floating in fire are CPs (translating Atomic genes). That translates the messages and realizes it and reacts accordingly. Rest pictures are creation of different individuals and nature (sun, moon and snake and other pictures made on hands and body) by different thoughts of Almighty B.B.B. The entire picture has been explained in Geeta in 11/ 10 and 11 (figure 1.3). Whatever is being created in this universe is basically not by our thoughts rather it is the thought of Almighty B.B.B (Yang B.B.B or matter B.B.B. or Male B.B.B working as Highest center of the universe.) that is dominated over creation and destruction of this cycle of the universe (Figure 1)

## INTRODUCTION

It is the atomic genes which constitutes mind part of reality. Mind incorporation in physics is awaited as theory of every thing is not yet investigated. I have investigated theory of every thing (ToE) and I found that while studying unified theory at the time of origin of the universe by Hoyle Narlikar universe, it was mind reality that triggered symmetry breaking phase. It is mind reality that triggers oscillation phenomenon of the universe. It is the mind reality which is behind perfect cosmological principle. There is nothing like artificial intelligence in the universe. These mind particles constitute intelligence of the universe that controls the deterministic order of the universe.

It is the mind reality behind all effects of the universe. But this is not our mind rather it is mind of Almighty B.B.B (Yang B.B.B or matter B.B.B. or Male B.B.B working as Highest center of the universe). His mind could be manipulated by prayer only. (figure 1 and 1.1) --[7]

**FORWARD MESSAGES - ABOUT NEW PHYSICS**

**PARTICLES ARE ASSOCIATED WITH THOUGHTS-DR DAS**

1. **Prof. S.W.Hawking**- His hopes for the attainment of a fundamental theory of nature, and its relevance to the general public, are best summed up in the concluding paragraph of his famous book: "... if we do discover a complete theory, it should in time be understandable in broad principle by everyone, not just a few scientists. Then we shall all, philosophers, scientists and just ordinary people, be able to take part in the discussion of the question of **why it is that the universe and we exist. If we find the answer to that, it would be the ultimate triumph of human reason, for then we would know the mind of God!**

2. **Prof. Roger Penrose**- In *The Emperor's New Mind*, a bold brilliant, groundbreaking work, he argues that we lack a fundamentally important insight into physics, without which we will never be able to **comprehend the mind**. More over he suggests, insight may be the same one that will be required before we can write a **unified theory of everything**.

## 2.5 Messages From Biological world to understand B.B.B world

Figure 3. Biological transcription and translation

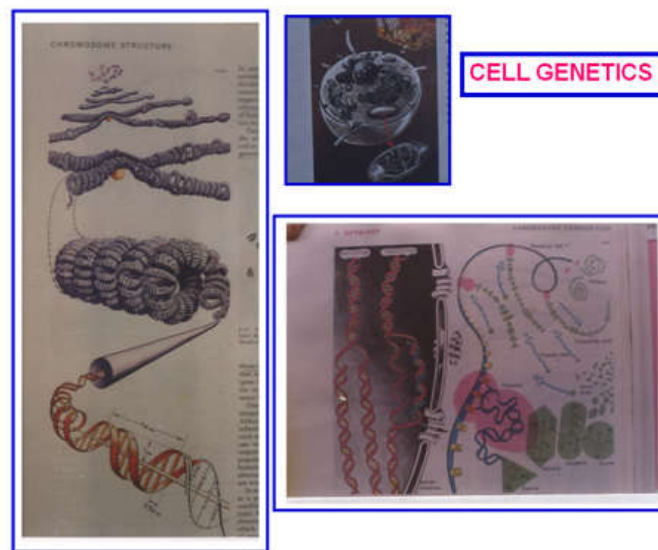

Figure 4 DNA Script(left) and biological transcription and translation(right) both are found in Human cell(above)

To understand cell genetics, we should know structure and function of genes. Chromosomes carry informations in form of DNA. It is a script. During transcription mRNA forms as it prints messages from DNA and carry messages from nucleus to cytoplasm where ribosome translates the messages and it work accordingly i.e. formation of polypeptides (PROTEIN SYNTHESIS) take place. Polypeptides are enzymes and hormones carrying programmed messages (Code PCPs) to carry out fixed programmed work as destined in DNA (figure 4).

DNA is made up of four nucleotides called A, T, C, G (adenine, thymine, cytosine and guanine). mRNAs are made up of four nucleotides called A, U, C, G (adenine, uracil, cytosine and Guanine). They form code or codon (triplet code, one triplet code represent one amino acid) of mRNAs. mRNAs carry informations in form of triplet codons from DNA anti triplet code or codons. The DNA counter part is made up of four nucleotide i.e. A-T, C-G (T for thymine). During transcription, A of DNA combines with U of mRNA, C of DNA combines with G of mRNA. T of DNA combines with A of mRNA, G of DNA combines with C of mRNA. (A-U, C-G, T-A, G-C) (Figure 4.1). If mRNA is made up of codon script then DNA is made up of anti codon script. If messenger atomic genes are mind Code PCPs then the CCP (equivalent to DNA) is made up of Anti mind particles (most mysterious structure of universe or thought script-CCP).

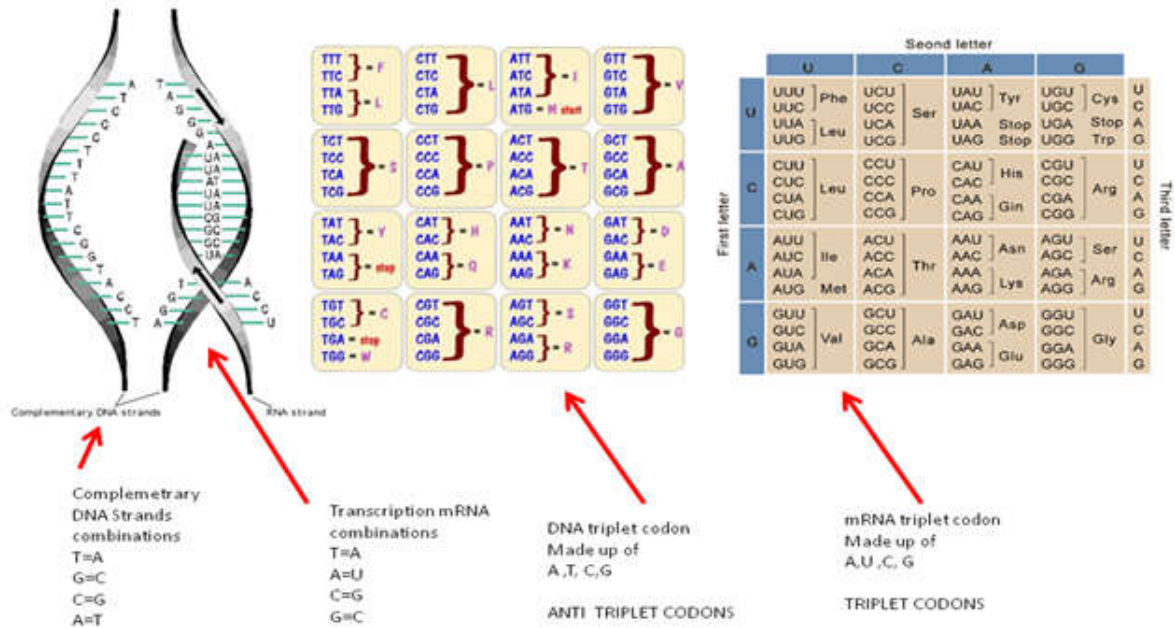

Figure 4.1 DNA is made up of Anti triplet codons while mRNA is made up of triplet codons

During transcription, A of DNA combines with U of mRNA, C of DNA combines with G of mRNA. T of DNA combines with A of mRNA, G of DNA combines with C of mRNA. (A-U, C-G, T-A, G-C). If mRNA is made up of codon script or triplet codon then DNA is made up of anti codon script or antitriple codon. If messenger atomic genes are mind Code PCPs then the thought script (equivalent to DNA) is made up of Anti mind CCP (most mysterious structure of universe or thought script-CCP). If the face identity of mind Code PCPs is male then the face identity of anti mind CCP is female. (Not shown in Figure 1.2)

## CELL GENETICS

Figure 5 Induction of protein synthesis Figure 6 Repression of Protein synthesis

INDUCTION OF PROTEIN SYNTHESIS (figure 5) - Structure of DNA - There are three genes involved in protein synthesis one is regulator gene which works through repressor protein, operon which is made up of structural genes and operator gene. During induction regulator gene which forms repressor protein (red cap) is removed from operator gene by hormones, metabolites or embryonic organizers etc. Thus operator genes get activated. It activates structural genes (DNA script) to form mRNAs (blue threads). mRNAs form polypeptide chains and finally hormones and enzymes (black threads). (ribosome has not been shown)---  
 -[5] REPRESSION OF PROTEIN SYNTHESIS (figure 6) - During repression, the hormones, metabolites or embryonic organizers etc along with repressor protein (red cap) which is formed by regulator gene, come in contact with operator gene to stop its activation to structural gene, With the result structural genes stop forming mRNAs and finally formation of polypeptide chain formation gets stopped. -[6]

Operon which is made up of structural genes (magenta) and operator gene (orange). During induction, repressor protein (green) is removed from operator gene by metabolites (lactulose). Thus operator genes get activated. It activates structural genes (DNA script) to form mRNAs (magenta threads) from inactivated nucleotides (adenine, guanine, uracil and cytosine). mRNAs are being formed from exon and interon structural genes. After this there is phenomenon of splicing where meaning full mRNAs (messages) are formed and after that there is translation by ribosome (brown) and there is formation of polypeptide chains and finally hormones and enzymes are formed. -[5]

2.6 Atomic transcription and translation

Figure 10 Prayer message formation in brain of “o god help me” at the level of b.b.b. in frontal lobe.

In atomic transcription and translation, following steps take place. In place of biomolecules we have different mindness.

- CP removes RM(repressor mindness-green) from OM(operating mindness -orange) thus induction of atomic transcription triggers.
- OM triggers activation of free mind particles(black -inactivated code PCPs) of that thought script(magenta) of “o god help me”.
- Free mind particles(black -inactivated code PCPs) get attached to anti mind particles script(magenta one) to form messenger thought script of “o god help me”.
- Messenger atomic genes (black) get activated by anti mind particles thought script and further they get detached from anti mind particles thought script to form activated messenger atomic genes( activated code PCPs)(magenta) of “o god help me”.
- CP carries phenomenon of splicing by translating the messenger activated atomic genes(activated code PCPs) and finally there is activated message of “o god help me” is formed.
- CP represses atomic transcription by adding RM(green) to OM(orange). Thus atomic transcription gets halt.

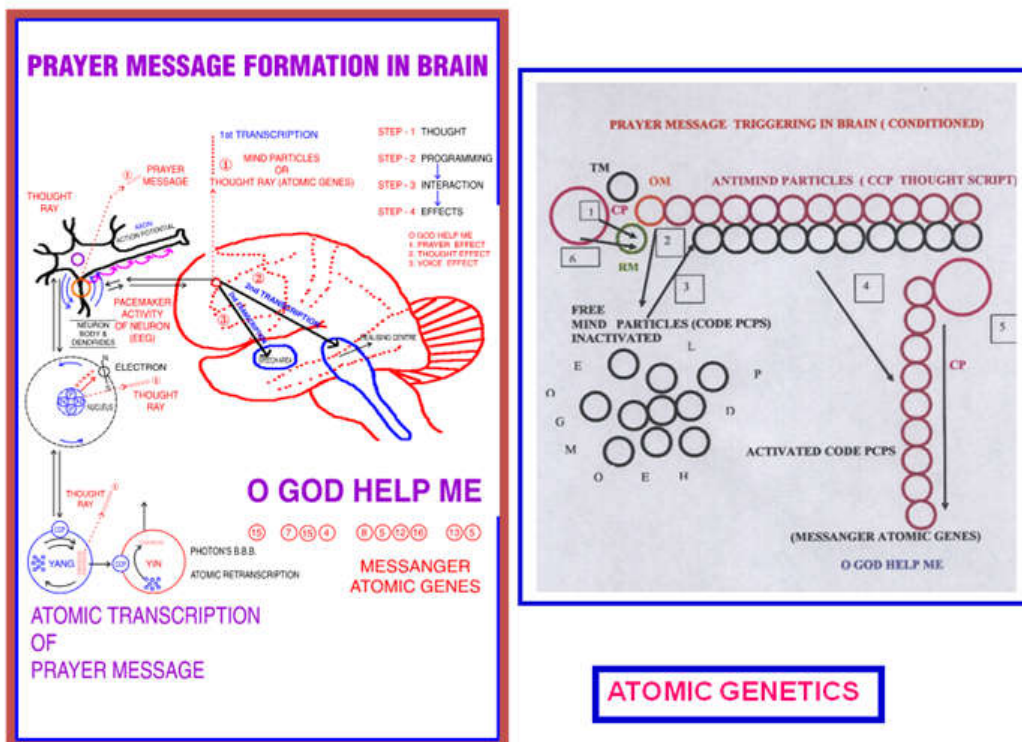

Figure 11. Prayer message formation in Brain detail mechanism

In atomic genetic engineering we use our basic power i.e. power of B.B.B.s. Our B.B.B.(higher center) talks with highest center of the universe by sending the message by first transcription. Till today nobody knows how does the brain generate thoughts. I am going to tell you that mystery too. In the frontal lobe the neurons are responsible for thought generation. In the neuron there is electrical activity called pacemaker activity which is occurring between dendrites and the body of the neuron. The membrane of the cell is made up of atoms and atom is made up of B.B.B.s. At the level of B.B.B. say thought of 'O GOD HELP ME' is expressed. As a result programmed messages of O GOD HELP ME(code PCPs) are formed. Out of three programmed messages, one is carried by atomic genes to highest center of the universe.

It is called THOUGHT RAY which is made up of pure atomic genes and then the message goes through phenomenon called first transcription. They come out from brain directly. The other two messages are carried by photons from nucleus of atom to electrons. Here they are modulated on electrical activity of the cell called pacemaker activity. Further they are modulated on actions potentials going towards REALIZING CENTER situated in brain stem(RAS) and from RAS to speech area situated in the frontal area. Target B.B.B.s. of the realizing center finally realizes thought effect of O GOD HELP ME. While from speech area message goes to motor cortex again via RAS and from there to vocal cords and finally it comes out as a speech effect of O GOD HELP ME. In layman's terminology formation of the thought ray means PRAYER.

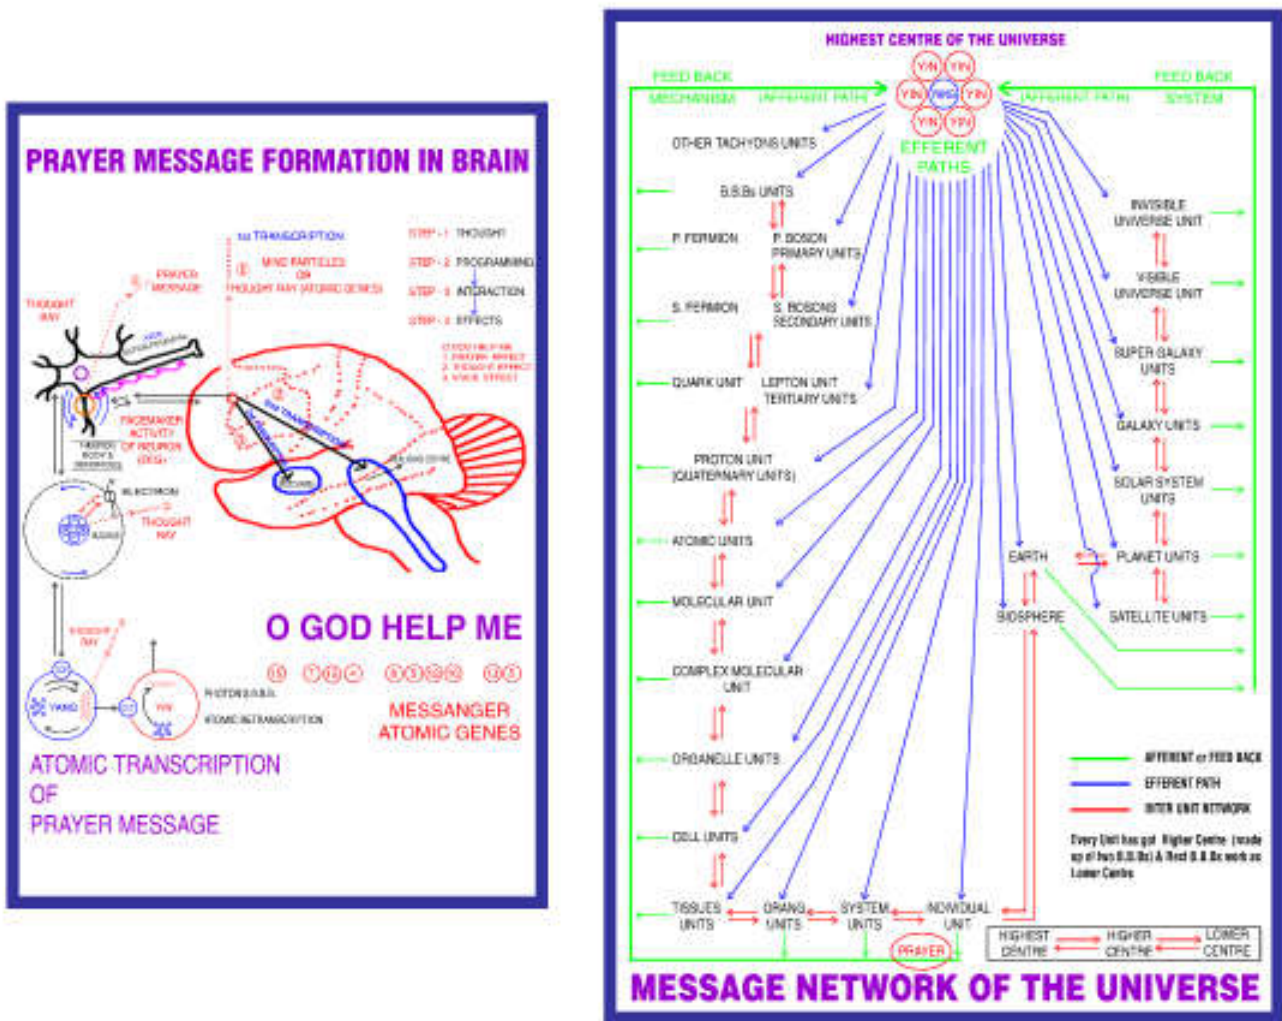

Figure 12. Message net work of the universe for prayer feed back

Prayer message goes to highest center of the universe via first transcription where it is realized and it is accepted, the highest center sends two messages to B.B.B.s working as higher center in cancer cell. These messages are message of inhibition of abnormal thought expression and message of activation of normal thought expression. Having received the messages, higher center stops expressing the abnormal thoughts and it starts expressing the normal thoughts.

As a result, there are no more abnormal programmed messages and in place of that normal programmed messages are there. Now the messages have shifted from abnormal(5 and 6) to normal(2 and 3). This shifting of thought expression is called ATOMIC GENETIC ENGINEERING (figure 13). The changed messages reach to target B.B.B.s. through same route. Having received the changed messages, target B.B.B.s. stop expressing the previous programming and they start expressing the normal programming. As a result the cancer cells transmutate into normal cells. Or diseased cell gets cured.

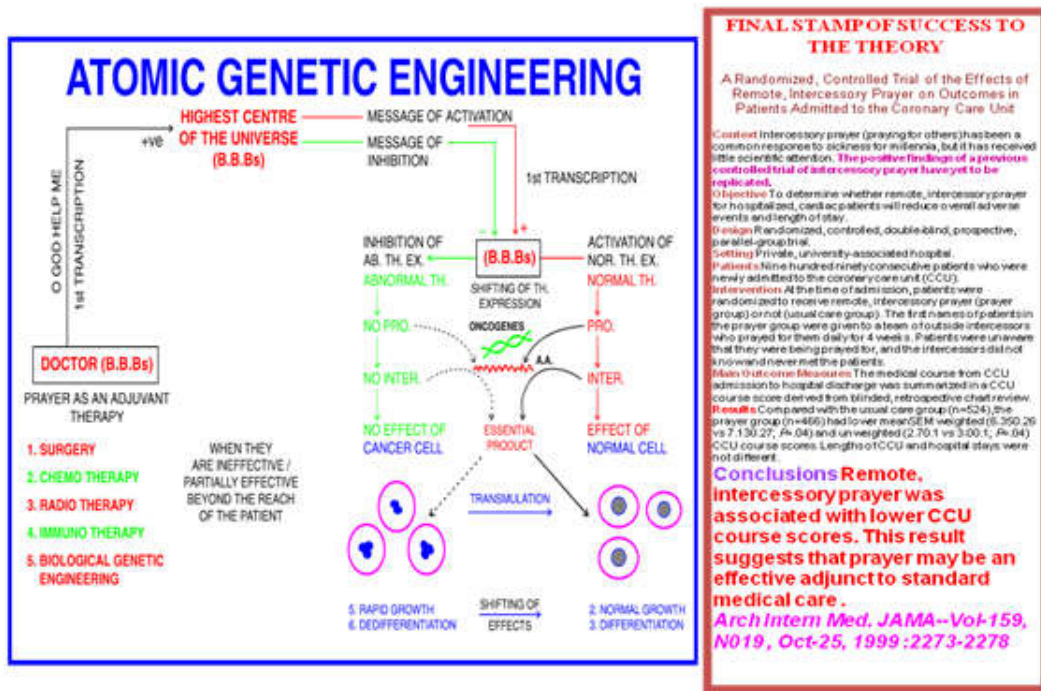

Figure 13. Atomic Genetic Engineering

The message goes to highest center of the universe where it is realized and it is accepted, the highest center sends two messages to B.B.Bs working as higher center in cancer cell. These messages are message of inhibition of abnormal thought expression and message of activation of normal thought expression. Having received the messages, higher center stops expressing the abnormal thoughts and it starts expressing the normal thoughts. As a result, there are no more abnormal programmed messages and in place of that normal programmed messages are there. Now the messages have shifted from abnormal (5 and 6) to normal (2 and 3). As a result the cancer cells transmutate into normal cells. Or diseased cell gets cured (right side text). [7]

2.7 Face Identity of mind particles

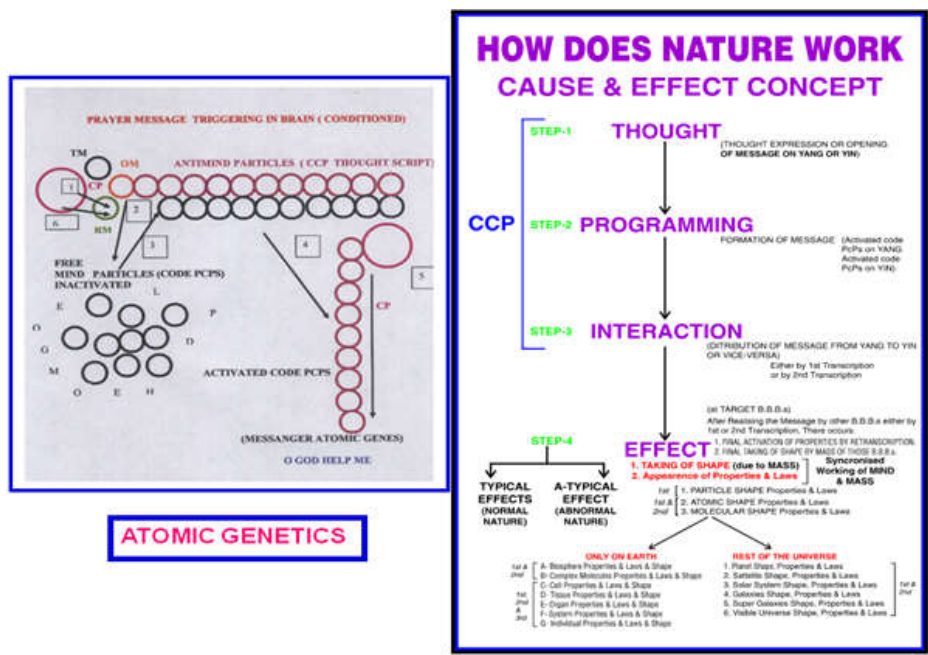

Figure 14. Structure and function of atomic genes symbolized. Different atomic genes have been symbolized as different heads

**ATOMIC GENES**— The conscious particles by virtue of which matter and energy attain transmutation phenomenon, properties, laws, interactions, message systems, behavior, life phenomenon, thought phenomenon, creation phenomenon is called atomic genes. They are the mind particles which conduct deterministic order of the universe.

**PARTICIPATORY SCIENCE**— To study the nature by a new discipline in which realization and Common sense is the main tools other than observations. For example - as we realize that we work through phenomenon of thought similarly nature works through phenomenon of thought. As we realize that our walking is triggered by our mind similarly electron moves through triggering of its mind. As we interact through thought message system similarly forces interact through thought message system. Our behavior changes with change of thought similarly properties of the matter and energy change with change of their thoughts. We do research by principle of analogy or parallel. It is a new way to know unknown by the help of known knowledge. The known knowledge is either biological knowledge or mystical knowledge. To understand consciousness and its working we have to understand this picture of God particle. Consciousness has been shown by different heads, It means each conscious particle has definitive shape and properties by virtue of which it has power to activate and inactivate that property that we study in different branches of science or we realize too. For example “o god help me”. It is an activated consciousness or atomic genes formed in brain carried by sound photons to our ears. As soon as we realize this sound effect of “O God Help Me, it gets inactivated inside our brain( in RAS).

It is just like to understand any language through Alphabets. These are (different faces) Alphabets of mind reality. One Mind reality has one face identity and the second mind reality has second face identity and so on. The facial expression represents phenomenon of intelligence and different face represents different types of properties carrying property. The open eyes means property is activated while close eye means property is inactivated. In spite of carrying properties consciousness they also know how to conduct not only origin of universe but also how to create two different universe i.e. next creation could be different from this creation. In all, It is automatic system of the universe. The mind realities which are of good properties have devtas face identity (first five faces on both side) and those mind reality which are of bad properties have demons face identity (last four faces on both side). These are named as code PCPs or messenger atomic genes. The central face is CCP or Thought script where all thoughts of the universe are banked. It is bank of data of all informations of the universe. It is face identity of Anti mind particles as data of all information's of the universe are stored as anti mind particles. It is the Time mind ness (biological clock) that keeps on expressing different thoughts from this thought script (CCP). There are four more faces (black bodies) shown on extreme left and right floating in fire are CPs (translating Atomic genes). That translates the messages and realizes it and reacts accordingly. Rest pictures are creation of different individuals and nature (sun, moon and snake and other pictures made on hands and body) by different thoughts of Almighty B.B.B. The entire picture has been explained in Geeta in 11/ 10 and 11 [1]. Whatever is being created in this universe is basically not by our thoughts rather it is the thought of Almighty B.B.B (Yang B.B.B or matter B.B.B. or Male B.B.B working as Highest center of the universe.) that is dominated over creation and destruction of this cycle of the universe (figure 1)

**2.8 Intelligence property of CCP( Thought script)**

When universe got created, different effects were also created. The cause of effect was thought expression. Unless the thought is expressed, effect cannot come. Effect means taking of different shapes and appearance, different properties and laws. Each type of effect is triggered by a separate thought expression. Different thoughts are expressed as thought of o god help me is expressed.

We study different effects in different branches of science. We observe only effects i.e. last step. The first three steps are not possible to see because they occur on B.B.Bs. Hence not visible. These three steps collectively are called CCP. If CCP is written in the equation or in line diagram, it means unless thought expression, programming, and interaction take place, effect cannot come or transmutation could not occur.

**How does nature work & triggering of normal & abnormal life effects** -To understand the triggering event of the normal and abnormal life effects, one must know about properties of B.B.Bs. At the time of the origin of the universe, all effects got created. The cause of all effects of the universe is **THOUGHT** expression. It is the first step and it is followed by **PROGRAMMING** or formation of programmed messages by code PCPs. This programmed message moves from higher centers to target B.B.Bs. it is called **INTERACTION**. Having received the messages, the mind and mass of the target B.B.Bs. work in a synchronized way so as to produce the effects as thought by a higher center. If the thought expression by higher center is normal, the shapes, properties and laws produced by target B.B.Bs. would be normal and if the thought expressions are abnormal, the shapes, properties and laws would be abnormal. This is the basic concept of transmutation phenomenon. Finally what we observe is called **EFFECT**. Appearance of new shapes, properties and laws is called **TRANSMUTATION**. The first steps are collectively called **CCP**. During transmutation process if **CCP** is written, it does mean that unless the thought, programming and interaction take place, nature cannot transmutate. Transmutation phenomenon is seen in particles, atoms, molecules and even in cells. The basic steps of any transmutation remain the same except that the thought expressions differ.

**2.9 Messenger Atomic Genes( Code PCPs)**

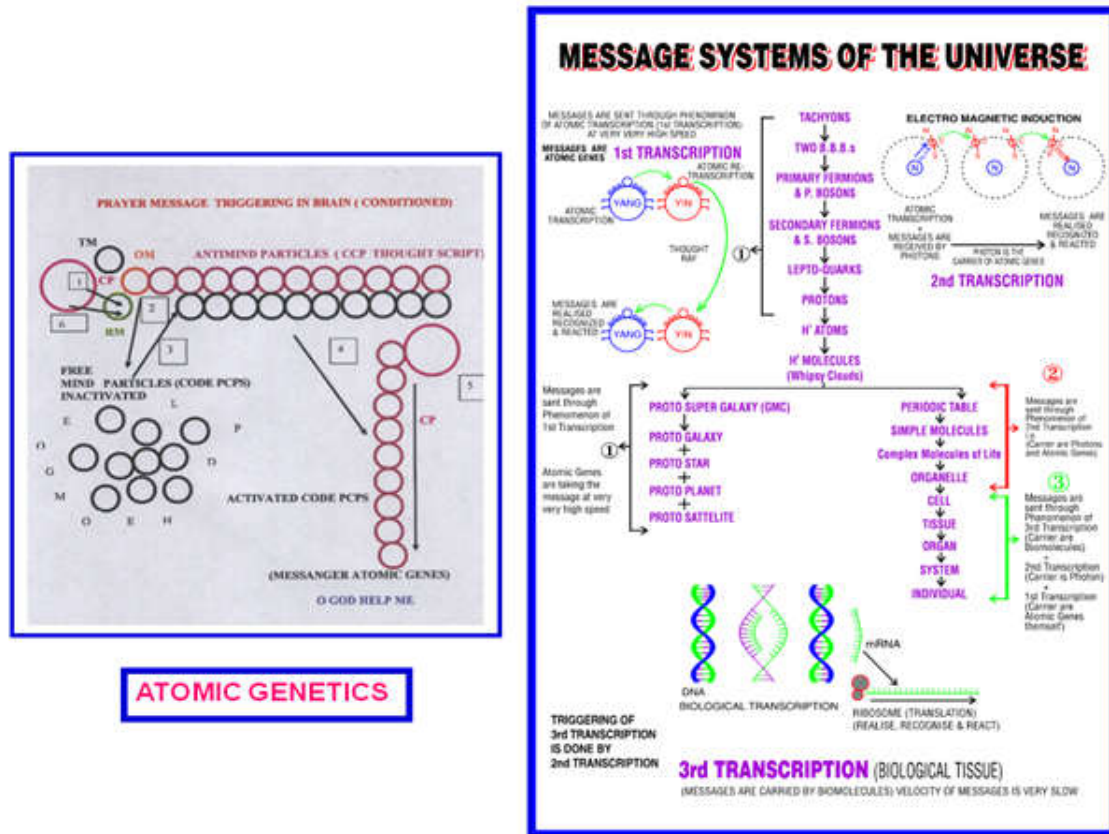

Figure 16. Message system of the universe

Message system of the Universe Before the origin of the universe nature had only one type of message systems which is called FIRST TRANSCRIPTION. Messages used to go from one B.B.B. to another B.B.B. by atomic transcription. Messages were carried by atomic genes(activated code PCP) with very very high velocity. It is the fundamental message system. After the origin of the universe, nature created atoms. It also created one more message system called SECOND TRANSCRIPTION. Here the message(code PCPs) are carried by photons from one atom to another atom with velocity of light.

Thus atoms, molecules, cells, and even individuals talk with one another After the formation of the cell, nature created one more system called THIRD TRANSCRIPTION. Here there is a message storage system formed by DNA. There are messenger molecules called mRNA that carry message from DNA script to cytoplasm where the message(code PCPs) is read or translated by ribosome and they work accordingly. Thus the messages reach to enzymes and hormones and finally messages reach to target units. Having received the messages, target units work accordingly. Finally life effects(metabolic) are observed. These three types of message systems are working in the nature. These message system are being used by the nature according to nature's need.

2.9 Stimulation of CCP atomic gene

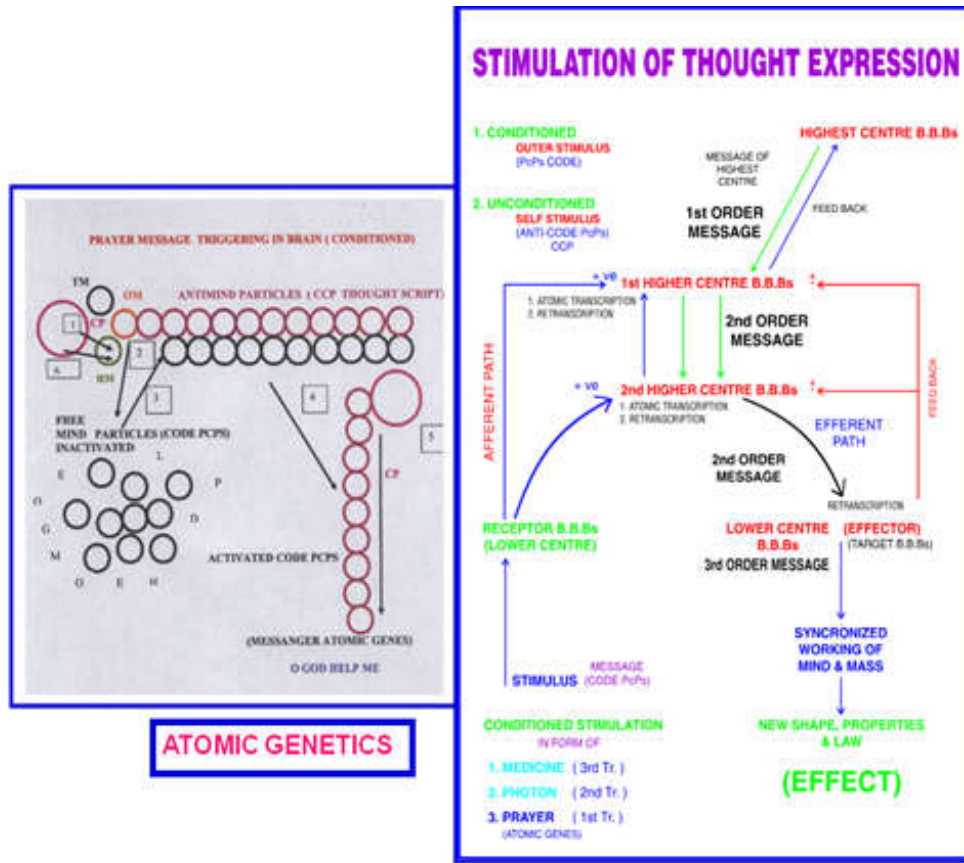

Figure 17 Stimulation of thought Expression

STIMULATION OF THOUGHT EXPRESSION — thought expressions could be triggered either by from outer stimuli i.e. **CONDITIONED STIMULATION** of thought expression, which is caused by medicine, photons or prayer or it is self stimulation i.e. **UNCONDITIONED STIMULATION** of thought expression.

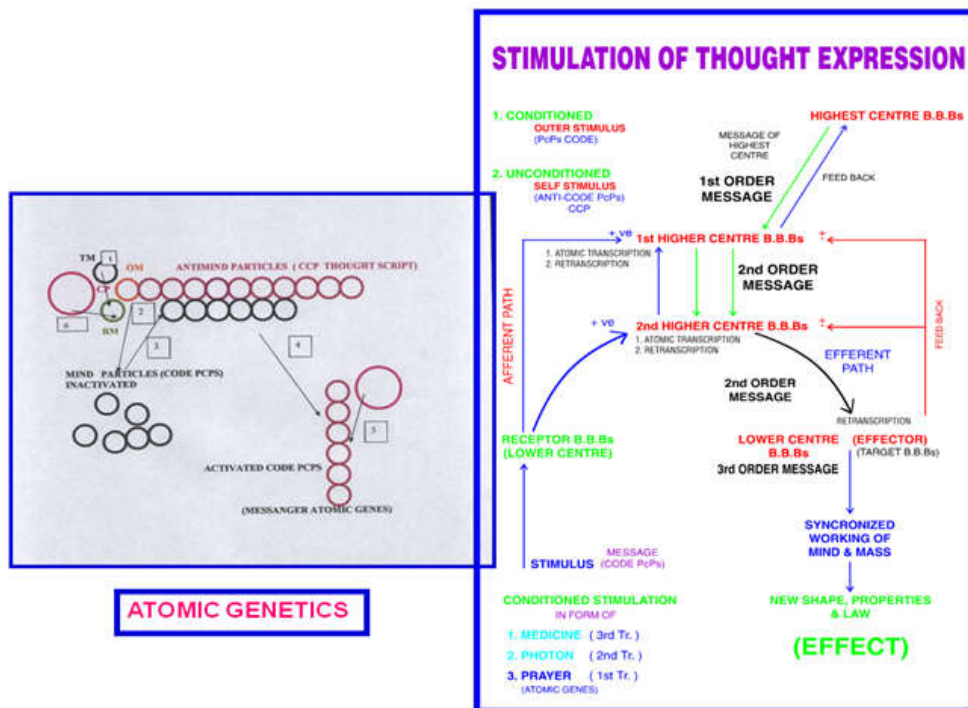

Figure 18. Stimulation of thought Expression

**STIMULATION OF THOUGHT EXPRESSION** -- Thought expressions by selfstimulation is called **UNCONDITIONED STIMULATION** of thought expression. Here the TM (time mindness) triggers the thought expression and it activates RM. Further same steps occur. TM is also called biological clock. Origin of universe and creation physics is all due to unconditioned stimulation of thought expression. These are all fed thoughts and feeding was done by Highest center of the universe during pre creation era.

**2.10 Feed back mechanism and control of universe by Almighty B.B.B**

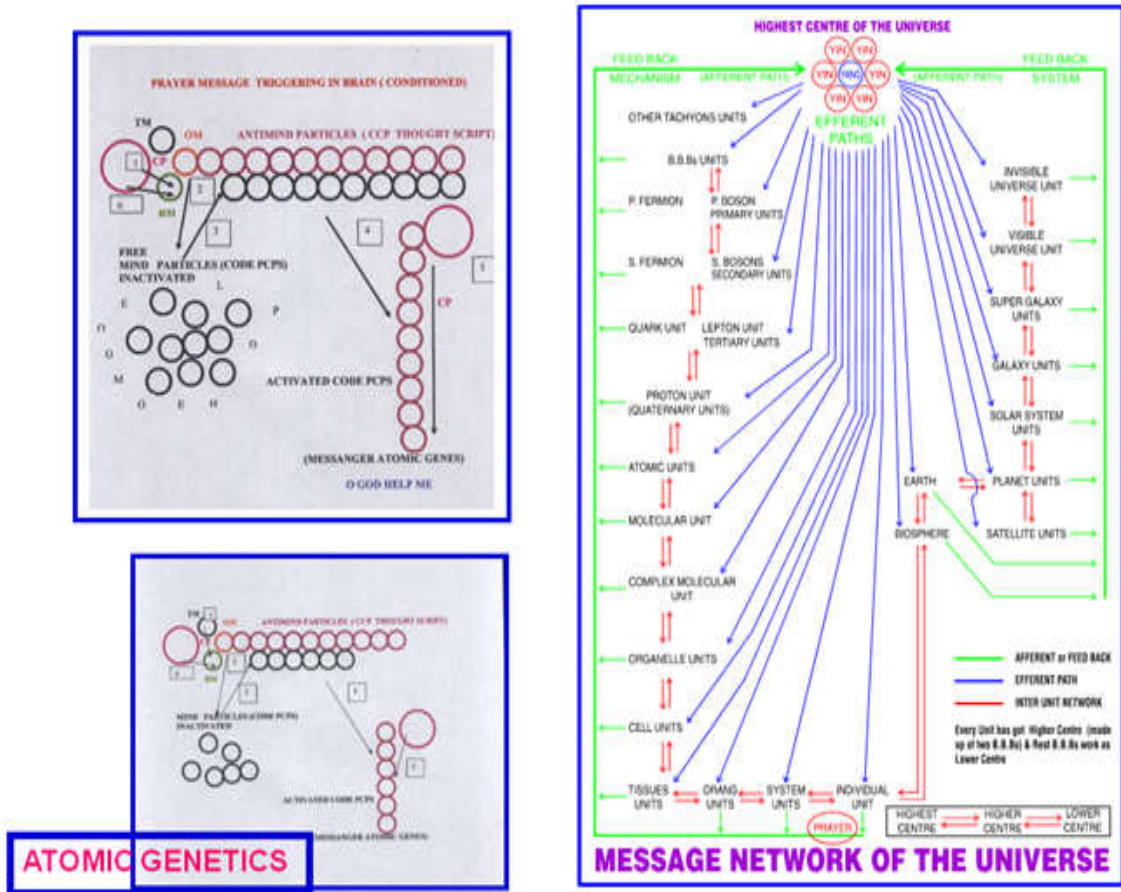

Figure 19. Message network of the universe

Message network of the Universe( Feed Back Mechanism and different centers of the Universe). With the origin of universe, nature first created primary units i.e. primary fermions(gravitation) and primary boson, these primary units are equipped with one higher center(one B.B.B.) and rest of the B.B.Bs. are working as lower centers or target B.B.Bs. After primary units, nature created secondary units i.e. secondary fermions and secondary bosons. similarly nature created tertiary units(lepto-quarks) and then quaternary units(protons& neutrons).

Each unit is equipped with higher centers, lower centers and target B.B.Bs. After quaternary units nature created atomic units, molecular units, complex molecules of life units, organelle units, cell units, tissue units, organ units, system units and individual units. Each unit is equipped with higher centers, lower centers, and target B.B.Bs. Similarly nature created satellite units, planet units, solar system units, galaxy units, super galaxy units, dark matter layer unit. These units are also equipped with higher centers, lower centers and target B.B.Bs. Thus our universe is divided into different units and each unit is equipped with higher and lower centers.

All higher centers are under control of highest center of the universe by efferent paths. This efferent path is made up of first transcription. Higher centers can send messages to highest center of the universe by afferent path or feed back path. Thus highest center of the universe is well informed about all effects of the universe.

Messages can come from lower centers to higher centers and from higher centers to highest center of the universe via afferent path. The highest center of the universe can send messages to higher centers and from higher center to lower centers. There is an inter unit message network also which is made up of first, second and third transcription depending upon the nature's need. Thus the entire universe is under control of highest center of the universe. Highest center can change any programming programmed by it during pre creation era.

2.11 Triggering of Creation by Mind

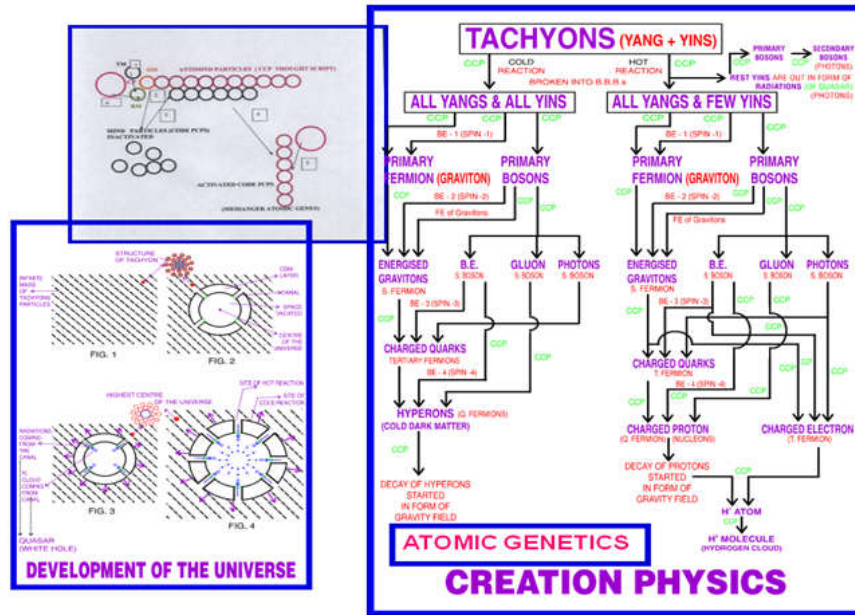

Figure 20. Stimulation of thought expression by unconditioned

**STIMULATION OF THOUGHT EXPRESSION** — Thought expressions by selfstimulation is called **UNCONDITIONED STIMULATION** of thought expression. Here the TM( time mindness) triggers the thought expression and it activates RM. Further same steps occur. TM is also called biological clock. Origin of universe and creation physics is all due to unconditioned stimulation of thought expression. These are all fed thoughts and feeding was done by Highest center of the universe during pre creation era.

2.12 Conditioned stimulation of CCP and phenomenon of life

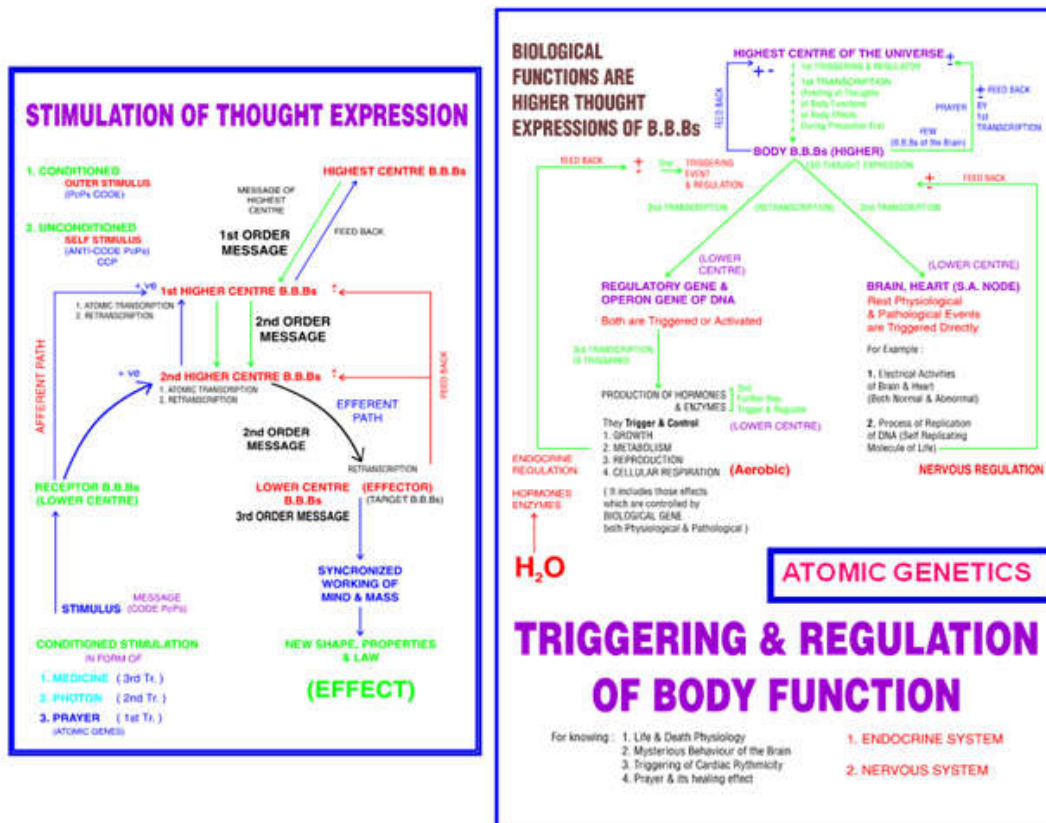

Figure 21 Stimulation of thought expression by conditioned

Few body functions are triggered by unconditioned thought expressions like mysterious behavior of brain i.e. creative thoughts, few dreams and triggering of cardiac cycle i.e. first systole in vitro. Few other functions are triggered by conditioned stimulation of thoughts like life and death physiology i.e. if you add water, you would see life effect and if you remove water, you would see death effect and prayer and its healing effect.

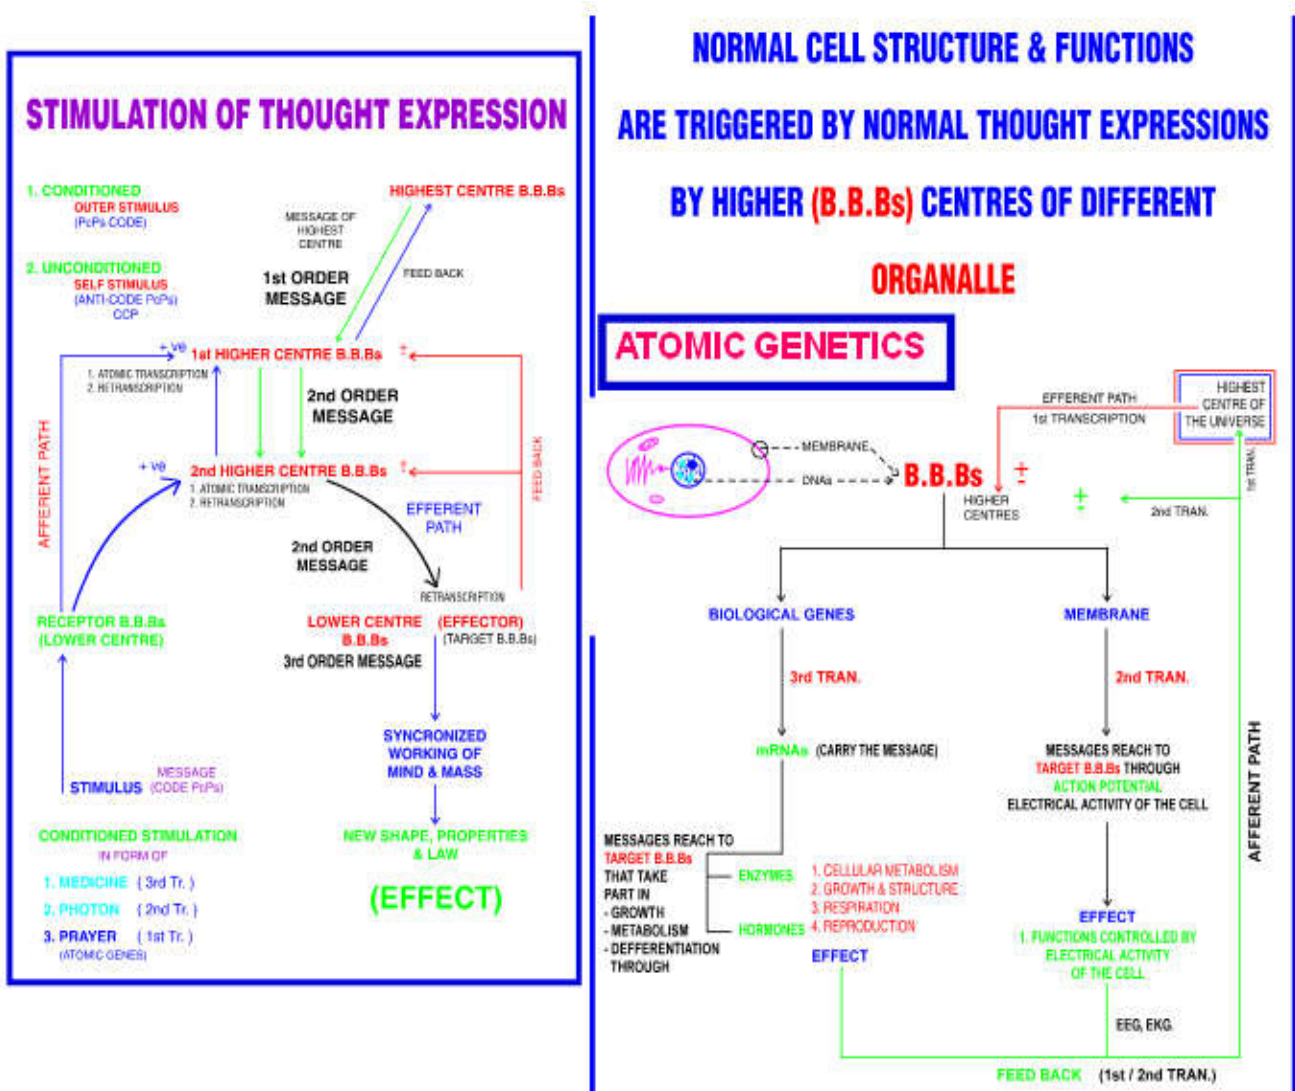

Figure 22 Stimulation of thought expression by unconditioned or conditioned in our body

**Triggering and regulation of cell functions or cell physiology:** Normal cell structure and function are triggered by atomic transcriptions or thought expressions by higher centers (B.B.Bs.) present inside the cell. These higher centers are found in DNAs and in the membrane. Higher centers in DNA express thoughts. The programmed messages (code PCP) are carried by photons from nucleus of the atom to electrons. Thus messages come on the surface of DNA molecule. These messages shift to mRNA during third transcription. mRNAs carry the messages (code PCPs) from nucleus to cytoplasm where messages are translated by ribosome. Simultaneously, messages shift to peptide chains (enzymes & hormones). These enzymes and hormones carry the messages to target units (B.B.Bs.).

Having received the messages, target units work accordingly and life effects like metabolism, cellular respiration, growth and structure formation, and other metabolic effects are observed. There is feedback of the effects to the higher centers. Thus triggering and regulation of metabolic functions are carried out. Similarly, the higher centers of membrane express thoughts. These thoughts are carried by photons from nucleus to the electron of the atom.

Thus messages (code PCPs) come on the surface of the membrane. Here they are modulated on pace maker electrical activity and further on action potential and thus action potential (second transcription) carries the messages from one part of the cell to the other part of the cell. This is called electrical effects (EEG and ECG) of the cell. There is feedback of these effects to higher center and thus these effects are triggered and regulated. Both the effects (metabolic and electrical) have their feedback not only to higher centers but also to highest centers via first transcription. So highest centers is well informed about all effects of the cell. Higher centers are not autonomous centers rather they are also under control of highest centers of the universe.

2.14 Body functions and their regulation by different centers

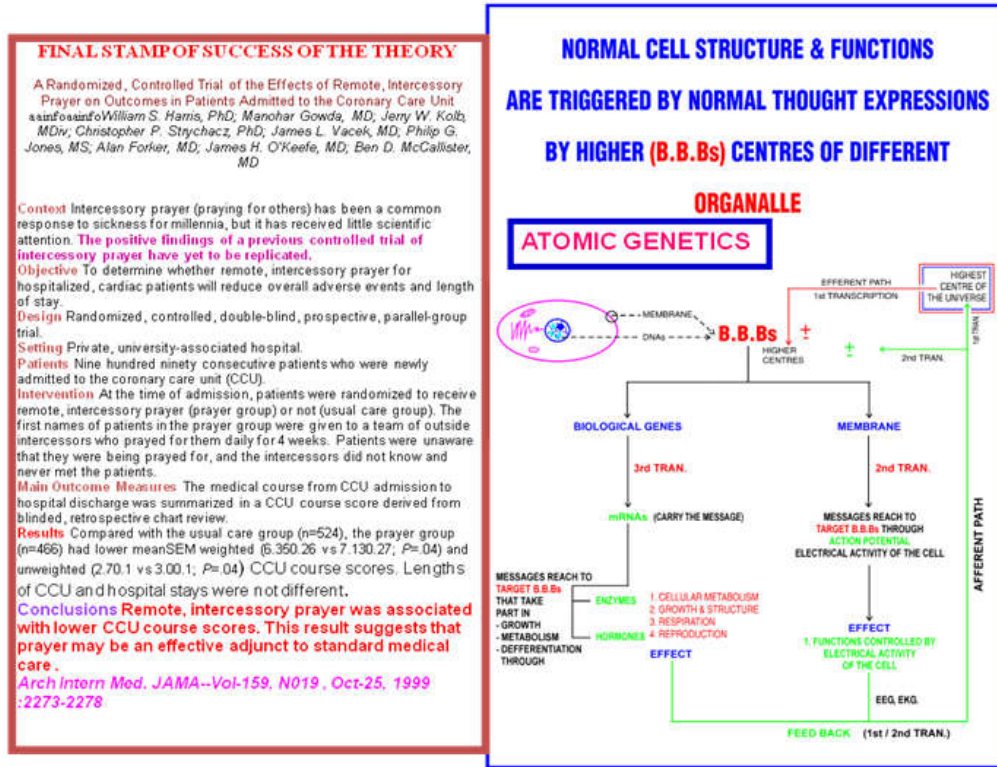

Figure 23 Stimulation of thought expression by unconditioned and conditioned

Our all body functions are triggered by different thoughts expressions by different higher centers present in biological genes or DNA or in membrane of the cell. Thus different life effects are seen. There is feed back to Highest center of the universe. That controls higher centers of our body. Prayer triggers this highest center to have its healing effect. Highest center is situated in invisible universe beyond CDM layer. Concept of SOUL is myth.

2.15 Phenomenon of cell transmutation by Mind

Figure 24. Stimulation of thought expression by unconditioned and conditioned – Mechanism of cancer etiology by carcinogens and hereditary

STIMULATION OF THOUGHT EXPRESSION -- Shi fying of thought expressions from normal to abnormal could be triggered by either from outer stimuli i.e. **CONDITIONED STIMULATION** of thought expression, which is caused by physical and chemical carcinogens or viruses etc or it is selfstimulate i.e. **UNCONDITIONED STIMULATION** of thought expression, which is caused by hereditary factors.

**2.17 Conditioned stimulation of CCP phenomenon of Germination**

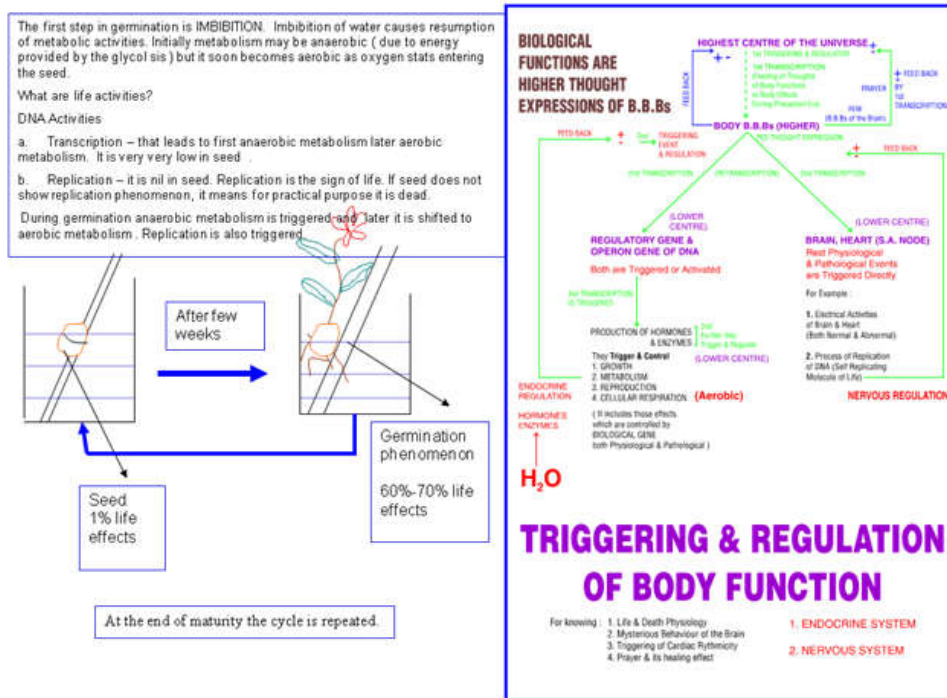

Figure 25 Stimulation of thought expression by conditioned

Few functions are triggered by conditioned stimulation of thoughts like life and death physiology i.e. if you add water, you would see life effect and if you remove water, you would see death effect

**2.18 Conditioned stimulation of CCP and phenomenon Dispersion of White light**

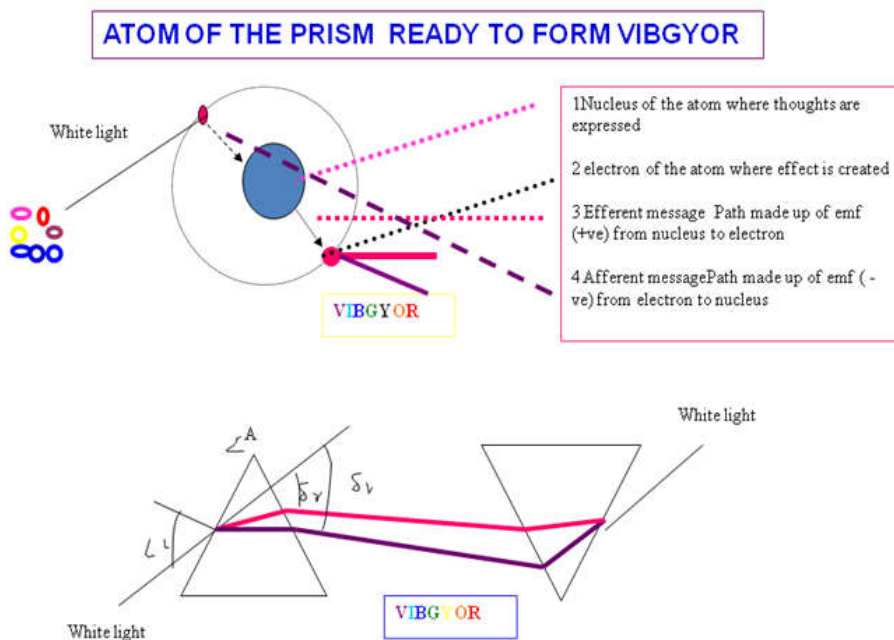

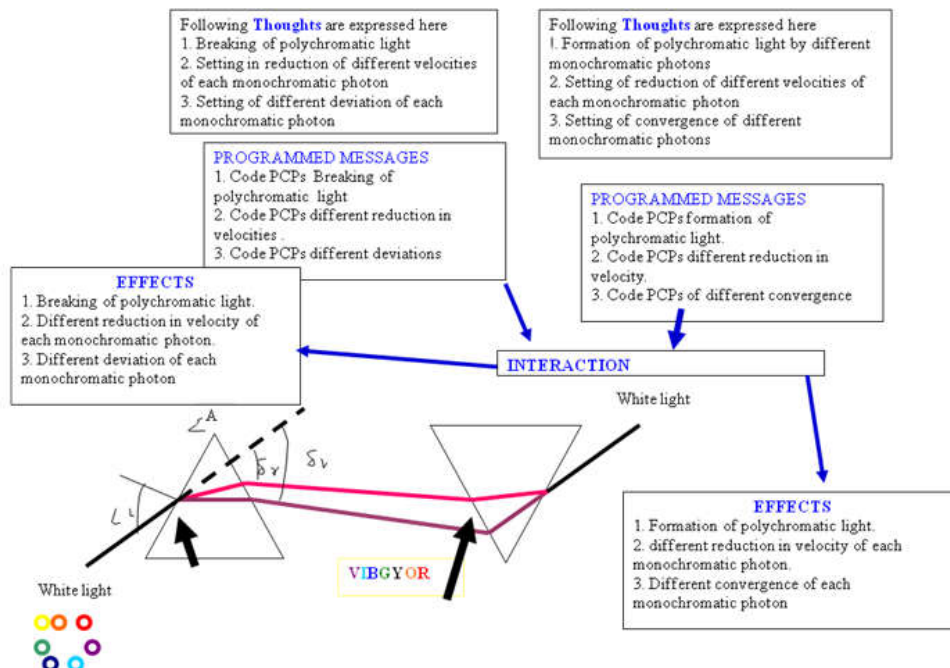

Figure 26. Stimulation of thought expression by conditioned

Formation of VIBGYOR is due to conditioned thought expression of CCP of the prism atoms. Unless different thoughts are expressed, VIBGYOR formation could not take place. The same is true for white light formation from VIBGYOR in reverse prism. Here reverse thoughts are expressed (figure 26 and figure 26.1)

**Figure 26.1 Stimulation of thought expression by conditioned**

## 2.19 Laws on which atomic genes work

Atomic Genetics and genetic damage (figure -27)

Having read Atomic genetics and Basic etiology of the cancer, now we discuss how atomic genetics trigger molecular effects like genetic damage etc during carcinogenesis. ATOMIC GENETICS is a new branch of science in which we study about Laws, PROPERTIES and FUNCTIONS of atomic genes. Now I shall highlight the laws on which atomic genes work. As we have seen that Gregor Mendel had made three laws of inheritance known as --

1. The principle of Dominance--- Mendel therefore concluded that what were transmitted from parent to offspring were discrete factors. Each factor contained information about the form of the trait. The factor associated with the form which was expressed in the hybrid offspring (F1) was DOMINANT. For example, the factor for yellow seed color was a dominant factor. The factor associated with the form which remained hidden in the F1 but reappeared in the F2 was RECESSIVE, Thus the factor for the green seed color was recessive. Mendel's factor is now recognized as the gene. In atomic genetics this law is interpreted like this --- During atomic transcription or thought expressions few thoughts are expressed and these are called dominating thoughts and rest thoughts which are not expressed are called recessive thoughts. Thus particles, atoms and molecules show only those properties which are triggered by dominating thought expressions. During transmutation, dominating thoughts get recessive while recessive thoughts get dominant. Single effect or property is triggered by single dominating thought expression or atomic transcription.

**For example--** Normal genetic arrangements are triggered by normal arrangement genetic dominating thought expressions while genetic damage is triggered by abnormal arrangement genetic dominating thought expressions. Abnormal arrangement genetic thought expression is triggered by carcinogens only after normal arrangement genetic thought expressions get recessive. Or we can say normal genetic arrangement are triggered by normal arrangement genetic thought expressions and when carcinogens come in contact with the cell, they shift the thought expression from normal to abnormal genetic arrangement. With the result we observe genetic damage. Thus carcinogens suppress dominating normal arrangement genetic thoughts and they trigger abnormal arrangement recessive genetic thoughts. With the result genetic damage is seen.

**2. The Principle of Segregation--**The principle of segregation states that allele pairs separate or segregate during gamete formation, and the paired condition is restored by random fusion of gametes during fertilization. In atomic genetics it will be interpreted like this -- There is separate atomic transcription for separate effects. So if there are hundred effects, they all are triggered by hundred separate thought expressions or atomic transcriptions. For example --- Genetic damage is triggered by separate thought expression and rapid growth is triggered by separate thought expression and dedifferentiation is triggered by separate thought expression. And all these thought expressions are triggered by

carcinogens. But the timing of thought expressions is different. Genetic damage thought expression is first to trigger and later rapid growth and dedifferentiation thought expressions.

**The Principle of independent assortment**---- The principle of independent assortment states that if we consider the inheritance of two or more genes at a time, their distribution in the gametes and in the progeny of subsequent generations is independent of each other. In atomic genetics it will be interpreted like this--- In one phenomenon, if two or more than two transcriptions or thought expressions are expressed that will give rise to two or more than two effects, it does not mean that their expression is DEPENDENT ON EACH OTHER. For example --- In phenomenon of carcinogenesis, there is effect of genetic damage, there is effect of rapid growth and there is effect of dedifferentiation. All these effects are triggered by separate thought expressions. The simultaneous expression of these atomic transcriptions is independent of each other. Or these thought expressions are the part of the carcinogenesis phenomenon but their expressions are independent of one another. It does not mean that for rapid growth thought expression, genetic damage thought expression is NOT essential. Having informed about the laws and working of atomic genes, now we discuss phenomenon of carcinogenesis, which is triggered by, outer stimuli like physical, chemical carcinogens or virus or they are self-stimulated i.e. hereditary factors.

When Genetic damage is not essential for cancer transmutation then what is the role of Genetic damage?. Why do carcinogens trigger genetic damage first? How do carcinogens trigger carcinogenesis?

कड़वी सच्चाई | महादेव ने बताया ब्रह्मांड की उत्पत्ति कैसे हुयी ? Big Bang VS Mahadev Shiv Or Allah Ho Akbar

BISMILLA REHMANE Rahim means VANDEMATRUM means honor and worship of female God particle or shakti ma id ol or Allah. Today we shall know science of KUN FAYA KUN. Means HOJA, AUR HO GAYA. Quran and sanatan knowledge are updated in a book downloaded by Almighty God Lord Natraz or Allah ho Akbar i.e Atomic genetics and origin of universe. Allah means two God particles or primary God of science. Allah means Secondary God or Lord Natraz or Allah ho Akbar or Creator bbb. Allah means tertiary God or Creation or sun, moon or Earth.

It is science of Atomic transcription and translation through which Almighty God Lord Natraz or Allah ho Akbar or Highest center of universe gives first order of universe. Having received the order rest BBBs or higher centers send second order to lower centers and from lower centers to target BBBs. Target BBBs work accordingly.

And nature takes new properties, shapes and laws That is how Lord Natraz or Allah ho Akbar works in universe. MEANS KUN FAYA KUN. There is a feedback from all higher centers to Highest center of universe. Hence Quran talks about how Allah orders by quantum entanglement and things do happen. Prayer is feed back to Highest center by our bbb by quantum entanglement.

**2.21 Be Proud that all are Sanatani. Means made up of Two God particles.**

Applied Part of Hinduism In China | Atheist  
China Believes in Hindu way of Burning Dead  
Bodies.

COVID 19 Eradication by Burning Bodies  
Dead Body Disposal Burn Vs Buried in Earth

BISMILLA REHMANE Rahim means VANDEMATRUM means honor and worship of female God particle or shakti ma idol or Allah. Hindu has two parts. One is way of life and another is spirituality. WAY OF LIFE MEANS RITUALS SPIRITUALITY OF ALL RELIGIONS IS SAME IE SANATANI KNOWLEDGE. Hindu and SANATANI these two words are separate. SANATANI means I. I is eternity. I persist even after destruction of universe. Geeta 10/8, I am origin of all every thing evolved from me knowing this wise men worship Me. I means two God particles or ardhnareshwar or satyam shivam sundaram or smallest idols of universe. Means SANATANI knowledge. The word SANATAN means SANATANI KNOWLEDGE means two God particles or ardhnareshwar or satyam shivam sundaram or smallest idols of universe. Means colorless eternity. Means SYMMETRY phase of universe. Universe is cycle of colorless symmetry phase to many colors created universe. Means all are SANATANI. Means made up of two God particles or ardhnareshwar or satyam shivam sundaram or smallest idols of universe. It is Eternity. Prayer is fundamental interaction between two God particles or fundamental particles mediated by atomic genes.

Hence all colors have originated from colorless eternity or SANATANI knowledge or God Particles or ardhnareshwar or satyam shivam sundaram or smallest idols of universe. All worships are idol worship between two God particles. Hence to spread illusive Islam of Mohamad Sahib that prohibits idol worship and kills those who do idol worship means islamic jihad means Islamophobia is anti Quran act and Anti Quran MOVEMENT and penalty is as equivalent to apostasy and shirk of islamic law ie death. Allah means two God particles or ardhnareshwar or satyam shivam sundaram or smallest idols of universe. Namaz is idol worship of tachyon particle which are made up of two God particles or ardhnareshwar or satyam shivam sundaram or smallest idols of universe and their reconstruction on Earth is Lord Natraz or Allah ho Akbar. Secret of Quran is Everything is Allah means SANATANI, every book is Quran means written by Almighty God Lord Natraz or Allah ho Akbar and all worships are Allah's worship means two God particles or Allah.

This unifies all religions into one religion called RELIGION I. Means worship of two God particles. Or eternity and that will persist even after destruction of universe. Or symmetry phase or SANATANI knowledge. Hence gentle man enjoys all colors created by Almighty God Lord Natraz or Allah ho Akbar. They are enlightened to the tune that they do not HATE any color despite they do not like it. Ignorance and Hatredness is SIN. Know science of prayer and know Allah in the light of science to get yourself enlightened. Dharmanantran is CRIME. ARTICLE 25 is obsolete. Means freedom to possess practice and propagate any religion. Now Religion I is eternity means two God particles. All have to possess practice and propagate Religion I only or SANATANI knowledge only. That will persist even after destruction of universe. As regard Almighty God Lord Natraz or Allah ho Akbar or His avatar Ram, Rahim, Jesus and Buddha etc are secular deity. Means non communal deity. Making them communal is Crime. OM means map of universe. Hence it is SANATANI knowledge. Means Dark matter layer and Quasars. All religions are different colors by virtue of way of life means rituals. But their spirituality is same ie SANATANI knowledge and they could be bring under one roof to worship Lord Natraz or Allah ho Akbar or Creator bbb or IDOL WORSHIP.

**2.22 Two steps Kalki Avatar. First Idol Avatar on 22-23 Dec 1949 in middle Gunned of Babari Mosque and second from Idol Avatar to Lord Natraz transformation like Narsing Avatar. First Part is over as He won the case on 9.11.2019 from SC and became owner of disputed land.**

All Momins means OIC, AIMPLB and 143 Islamic sangathan should know that all are SANATANI means made up of two God particles idols or ardhnareshwar or satyam shivam sundaram or smallest idols of universe and it will persist even after destruction of universe. Hence Dharmanantran or making non muslim person MOMIN means that prohibits idol worship and kills those who do idol worship means ADHARMA OR making Hindu to follow illusive Islam of Mohamad Sahib that prohibits idol worship and kills those who do idol worship and it is Anti Quran MOVEMENT and Anti Quran act and penalty is as equivalent to apostasy and shirk of islamic law ie death.

Death of illusive islam as 1400 years passed by Kalki avatar.

Phenomenon of teleportation. Means message used to come from Tachyon particle to BBB of pillar and BBBs of pillar transform into Narsing avatar. That is how Lord Natraz or Allah ho Akbar's reincarnation takes place when ADHARMA exceeds on Earth. Kalki avatar had taken place on Earth on 22-23 dec in middle gummud of Babri mosque. Means message came to Ram lalla virajman idol and tertiary God idol transformed into secondary God idol. He won the case on 9.11 2019 and become owner of disputed land in Ayodhya.

This time two stages avatar would be there. Means like birds they take birth in two steps ie first inform of egg and later from egg to living bird kid. Similarly Kalki avatar has first appeared as transformation of tertiary Ram lalla idol to secondary Ram Rahim Jesus and Buddha lalla virajman idol avatar. Only those who know science of prayer and science of reincarnation could understand it. But later on this secondary Ram Rahim Jesus and Buddha lalla virajman idol avatar would transform into Lord Natraz or Allah ho Akbar a living human beings, means all in one deity.

His flag shows His photo as namaz is idol worship of tachyon particle which are made up of two God particles and their photodepiction is ardhnareshwar or satyam shivam sundaram or smallest idols of universe and their reconstruction on Earth is Lord Natraz or Allah ho Akbar. Momins of globe who are indulged in Anti Quran act and Anti Quran MOVEMENT ie Islamic jihad or making others to momins is ADHARMA and to protect it, Lord of Universe or Allah ho Akbar or Lord Natraz has reincarnated as Kalki avatar part 1 on 22 -23 dec 1949 in middle gummud of Babri mosque. It is part 1. In part 2 you would see as Narsing avatar like transformation. Hence OIC, AIMPLB and 143 islamic sangathan either reform or Leave Earth. Sharia would not let momins to reform and Almighty God Lord Natraz or Allah ho Akbar or His Kalki avatar would not let Momins to live on Earth. It is ECAA for all Adharmies of Earth.

**2.23 Article 19 is obsolete. Means one could not abuse Almighty God Lord Natraz or Allah Ho Akbar and His avatars. Such Questions should not be entertained in Public place. Dr Zakir did Crime by making Dhamanantran as Article 25 is obsolete.**

<https://youtu.be/A9eBp2E9B34>

Dr Zakir is incompetent to discuss spiritualism. He does not know secret of Quran. ie Everything is Allah every book is Quran and all worships are Allah's worship. He knows only one Quran only. Hence he is full of ignorance and Hatredness. Dharmanantran is Crime and Sin as article 25 is obsolete by Lord Natraz or Allah ho Akbar. As regard charges framed against ALMIGHTY GOD LORD NATRAZ OR HIS AVATARS Lord Krishna etc are ridiculous charges. Being Parbhram, no rule of law could be imposed to punish Almighty God Lord Natraz or Allah ho Akbar or His Avatars. The reason are

- The biggest sin is one who does not obey Almighty God Lord Natraz or Allah ho Akbar. Rest sins are conditioned and could be erased.
- Sins get quashed when Almighty God or Allah ho Akbar in Avatar form as Lord Krishna as said in Gita 4/36 that if one knows Gyan yog, one's sins would be erased. Means know science of prayer and know Allah in the light of science.
- Karma and their results are our destiny. FOR HIM it is LILA and He is exempted from all so called SINS.
- Article 19 is obsolete. Means one could not abuse Almighty God Lord Natraz or Allah Ho Akbar and His avatars.

## Science vs Religion part 1. जाने धर्म और साइंस में कौन सही कौन गलत?

BISMILLA REHMANE Rahim means VANDEMATRUM means honor and worship of female God particle or shakti ma idol or Allah. Pl see two diagrams Fig 28 and Fig29. Science is out come of Religion I or SANATANI knowledge. Means two God particles or Primary God. Next comes Creator BBB or Almighty God Lord Natraz BBB or Allah ho Akbar or secondary God. Next come CREATION or Tertiary God mean sun, moon earth etc. God particles are made up of MIND AND MASS. MIND DESIGNS shape properties and laws and mass works accordingly. It is Science. It is second order and third order of universe. The First order is in precreation era when programming of universe was done by Highest center of universe or Lord Natraz or Allah ho Akbar to rest of BBBs to give desired effects as wished by Highest center of universe. Then creation started and many Higher centers formed and when they express thoughts is second order, the message reaches to lower center and from lower center to target BBB via third order and finally target BBBs work accordingly and we see different shapes properties and laws and finally we see effects and these effects are studied in different branches of sciences. THE CAUSE OF ALL EFFECTS IS THOUGHT OR MIND OF GOD PARTICLES HENCE SPIRITUALISM UNDERPINS ALL SCIENCES. Had there been no spiritualism means God particles, and ALMIGHTY BBB, or Creator bbb, Lord Natraz or Allah ho Akbar, we could not have sciences of all types. Means from colorless knowledge or Sanatani knowledge to many colors means creation of all sciences or tertiary God. Means sun moon Earth etc. Means from symmetry phase to symmetry breaking phase means origin of universe by Hoyle Narlikar universe. Or Continuous creation theory. Not Big bang Know science of prayer and know Allah in the light of science.

## केवल 1 घंटा और और 107 करोड़ किमी की यात्रा, ब्रह्माण्ड की सबसे तेज स्पीड, Fastest Speed Of Universe

BISMILLA REHMANE Rahim means VANDEMATRUM means honor and worship of female God particle or shakti ma idol or Allah

How nature designs speed. Mind of God particle designs speed( distance / time) and mass of God particles work accordingly. Thoughts are two types , one is unconditional speed thoughts means outer forces could not increase or decrease speed ie spin of particles. Second is Conditioned thought of speed that could be increased or decreased by external forces. Means speed of rocket car aeroplanes or human beings speed. Speed means property of female God particle or Shakti ma ie inertia of motion triggered by thought in all directions. Rest means property of male God particle or inertia of absolute rest.

It is called inertial property of matter mass means YANG BBB and energy mass or Yin BBB.. which is inherent property of two types of masses of universe. Means Yang mass and Yin Mass of two types of God particles. Hence matter mass and energy mass are different and they could not be interchangeable. Hence  $E=mc^2$  is Fiction.(Means energy and matter are convertible. Means amu unit and ev unit are convertible). This unit conversion is illusion and fake mathematics ie  $1amu= 931.5 Mev$ . Unit represents two state of matter one is weight of fermion in amu( unit of measurement of fermions ie gravitational weight) and energy bosons quanta in ev( Unit of energy) . Fermions and bosons are two distinct class of particles and no experiment yet found that could convert them into each other. This abolishes all feynman's diagrams of Materlization and annihilation of different particle interactions in particle physics. This gives zero Mark to Feynman on his work and rejects his Noble prize 1965 physics. Hence Energy mass equivalence is fiction. As Marths does not have thought of mind and thought of Creator. THIS ABOLISHES Mach's principle of inertia means inertia is by virtue of not due to inherent property of matter rather by virtue of distant forces of universe

Dark Energy Explained!!!!

BISMILLA REHMANE Rahim means VANDEMATRUM means honor and worship of female God particle or shakti ma idol or Allah. Noble prize 2011 is awarded to the work that concluded universe is accelerating. Means no big crunch in future. Means no contraction phase of universe. Means only expansion of universe forever.

Fig Structural configuration of DM and DE at macro level [9]

Seeing the new model Hoyle Narlikar universe universe is bounded by cold dark matter expanding with velocity of flight , hence not visible or Dark. That is why night sky are black. Olber's paradox. Quasars are white hole in CDM layer creating Hydrogen. These hydrogen clouds come in closed universe and they move towards CDM LAYER by virtue of gravity of CDM layer. The clouds nearer cdm layer move faster than away from CDM layer. Thus Hubble law appeared in universe. These hydrogen clouds transformed into bright galaxies showing red shift means expanding universe. When star dies in form of supernova blast , that could be recorded.

According to Bigbang cosmology , universe expansion should be retarding as brightness of supernova would be same in distant galaxies. But due to Hubble law the further the galaxy the dimmer would be supernova blast. That is they found against what was prediction of Bigbang cosmology. Hence they concluded acceleration rather than retardation of distant universe.. According to New model Hoyle Narlikar universe, CDM would contract by order of Higher center of universe or Lord Natraj bbb or secondary God or Allah ho Akbar and Quasars would transform into black holes and destruction would begin and all created universe would transform in tachyons particle. Means symmetry phase of universe. Hence zero Marks out of 10 and Noble prize 2011 has been rejected. For further detail log on C V Dr VM Das on google. Or write atomicgenetics on google search.

Discoverers of Accelerating Universe Win 2011 Nobel Prize for Physics [10]

### ESO telescopes and staff played major role

4 October 2011

24.April 1995

The 2011 Nobel Prize in Physics was awarded "for the discovery of the accelerating expansion of the Universe through observations of distant supernovae". One half of the prize goes to Saul Perlmutter (Lawrence Berkeley National Laboratory and University of California, Berkeley, USA) and the other half jointly to Brian P. Schmidt (Australian National University), and Adam G. Riess (STScI, Baltimore, USA). Observations from ESO's observatories in Chile contributed to the discovery, which is one of ESO's all-time Top-10 of scientific discoveries. The 3.6-metre and NTT telescopes at La Silla and the 8.2-metre VLT telescopes at Paranal provided vital data to both teams. In addition two of the followup projects were led by ESO staff Chris Lidman and Bruno Leibundgut, and other ESO staff members, Isobel Hook and Jason Spyromilio, were contributors to crucial papers. This was a global effort involving most of the major observatories around the world. By making many very careful and accurate observations of exploding stars known as Type Ia supernovae, teams led by the Nobel Prize laureates established that the expansion of the Universe was not slowing down, as had been expected in a Universe dominated by matter, but was accelerating. The acceleration is thought to be driven by dark energy, but its origin remains deeply mysterious. The discovery of the accelerating expansion led to a total revision of astronomers' view of the Universe as a whole and opened up a new world of cosmology and fundamental physics.

**2.26 Death is ACT of God. Hence in any medical and surgical treatment if prayer is done , it could stop fatal effects and disease could be cured or sustain without fatal effects ie death:** BISMILLA REHMANE Rahim means VANDEMATRUM means honor and worship of female God particle or shakti ma idol or Allah. Almighty God Lord Natraz or Allah ho Akbar takes COVID 19 into consideration Diseases of any type are never fatal. It is destiny to leave Earth ie Death makes all diseases fatal. Death is ACT OF ALMIGHTY GOD LORD NATRAZ OR ALLAH HO AKBAR. Science of Death starts with First Order of Universe means He ( Highest center of Universe ) used to send first order of universe via quantum entanglement to BBB of Heart ie Higher center BBB in SINO Atrial NODE of Atria to stop thought expressions of SDD, DP AND RP , With the result SA node stops making electrical impulses to trigger cardiac cycle and Heart stops. Death is ACT of God. Hence in any medical and surgical treatment if prayer is done , it could stop fatal effects and disease could be cured or sustain without fatal effects ie death. Why Do patients Die During Surgical or Medical Treatment? Death (Say Cardiac Arrest) Is Triggered By First Order Of The Universe (Code PcPs Death Message or Quantum Entanglement Or Act Of God) That Comes From Almighty B.B.B (CCP). It Is Divine Mechanics and Mendel's Law Of Independent Assortment That Underpin Death Phenomenon. (Fig 22)

Death is a conditioned phenomenon but despite of long starvation or progressive motor neuron disease if cell lives, or death does not come, it is unconditioned phenomenon and it is lawlessness. To understand phenomenon of body structure and function (Both normal and abnormal and life and death phenomena), we have to understand Basic Building Blocks (B.B.B – Mind – CCP, Code PcPs and CP and Mass -- Fig 1). Life effects are higher thought expressions ( activation different Code PcPs – informations ) of B.B.Bs. Formations of molecules , atoms and particles are due to lower thought expressions ( Thought - CCP – Programming – Code PcPs – Interaction – Effects ). If thought expressions are abnormal it called lawlessness in nature. After certain age (11 years) Prahlad's body transformed to certain changes that are abnormal to us. And it followed Mendel's law of Independent assortment also. The same is true for Prof S.W. Hawking that he is still alive despite of progressive MND. These thoughts are fed thoughts and feeding was done in precreation era by the highest center of the universe. We are set of informations (Code PcPs). Informations (Code PcPs) never die. The theory predicts that Informations (Code PcPs) could be recreated. Hence dead cell could be made Alive only by highest center of the universe (Almighty B.B.B). Despite of disease ( progressive MND) in Prof S.W.Hawking or despite of long starvation , cell is alive in Prahlad Jani case , it means for triggering of death thoughts expression ( or inhibition of life thoughts expression ) , disease thoughts expressions are not essential. (Mendel's Law of Independent Assortment). It is myth that we say that death is caused by a disease during treatment of diseased patient or by a surgical operation on a diseased cell. Prof. S.W.Hawking and Prahlad Jani are exception to rule that diseases during treatment of disease (or surgical operation or anesthesia on diseased cell) or starvation causes death. Death is a separate phenomenon that is caused by message of inhibition to higher centers (say S.A.Node) to stop rhythm city thoughts (thoughts of SDD, depolarization and repolarization) by first order of universe by Almighty B.B.B (Act of God).

There are certain phenomenon which are considered as Act of God. For Example - Quran, Gita, Bible are written by Almighty God. They are words of God. Similarly, Book - --Science God Universe prayerl is also Act of God since no man could attempt to know Almighty God. But science has explored Almighty God through origin of the universe, concept of Basic Building Blocks (Mind and Mass) and finally through Atomic genetics. Science (Origin of Universe- Hoyal -Narlikar universe Model) is Update of Gita, Bible and Quran. Death is also Act of God because when science (knowledge of doctors) fails, death is triggered by Almighty B.B.B. Only Science of Prayer could prevent death during Treatment. Prayer works on diseased cell and it has been confirmed by different studies. But prayer does not work on dead cell. Our universe is deterministic order of universe and each effect is destined i.e. effects are triggered by thoughts and each thought is fed thought and feeding was done in precreation era by Highest center of the universe. Hence all sciences are made by self knowledge of Almighty Basic building block. Thus Einstein's famous statement that God (Almighty B.B.B) does not play dice ultimately became the truth along with final acceptance to Laplace determinism-- All that had happened had a definite cause and gave rise to definite effect and future of any part of the system could in principle be

predicted with absolute certainty ( Only by Almighty B.B.B not by us ) if its state at any time was known in all details Nobel Prize 1932 (for the creation of quantum mechanics) And 1933 (for the discovery of new productive forms of atomic theory) Are On Illusive theory Of Uncertainty Principle Of Heisenberg. Hence Quantum Mechanics atomic model is not correct. Prof S.W.Hawking is still alive because -Despite of progressive MND, he has not received (His heart, S.A. Node - B.B.B - Higher center) First order of the universe - death message. Hence he is alive. This message could be prevented by prayer only (Quantum Entanglement).

What are those abnormal water, food and energy cycle thoughts that triggered after the age 11 in Prahlad's body that led to transformation of body cells to live under starvation i.e. Weight loss and gain (38 to 42 kgs), vanishing of urine in bladder in different sono graphy finding and no food in digestive systems despite of normal blood biochemistry, all suggest lawlessness due to unconditioned thought expressions by the higher center of the different organ of Prahalad's living Body. But thoughts that trigger aging by different cells are normal (childhood – adolescence, adulthood, old age). There are many thoughts that trigger to maintain our body structure and functions. But to understand the concept only few thoughts have been depicted in diagrams ( *Why Do patients Die During Surgical or Medical Treatment? Death (Say Cardiac Arrest) Is* DOI: 10.9790/7388-07050688123 www.iosrjournals.org 123 | Page Cancer diagram). There is feedback to higher centers of cell before next thought is triggered. Our body cells (higher centers) are not autonomous center rather they are under control Highest center of the universe. At the time of death message ( First order of universe – Quantum entanglement ) comes from Highest of the universe to higher center ( Say S.A.Node ) of heart and B.B.B of S.A. Node stops expressing rhythmic thought expression ( SDD, Depolarization and Repolarization – life thoughts stop ) and cell dies or body dies ( Death thoughts are triggered ). How long Prahalad would live only Almighty B.B.B could tell. Death thought expression and diseases thought expressions are separate and their simultaneous expression is independent of each other. That is for death thought expression, disease thought expression is not essential ( Mendel's law of independent assortment ) ( Fig 22)

### Conclusion

Our universe is deterministic order of universe and each effect is destined i.e. effects are triggered by thoughts and each thought is fed thought and feeding was done in precreation era by Highest center of the universe. Hence all sciences are made by self knowledge of Almighty Basic building block. Hence Albert Einstein's famous story is true i.e. " God ( Almighty B.B.B ) does not play dice". Quran and sanatan knowledge are updated in a book downloaded by Almighty God Lord Natraz or Allah ho Akbar ie Atomic genetics and origin of universe. Allah means two God particles or primary God of science. Allah means Secondary God or Lord Natraz or Allah ho Akbar or Creator bbb. Allah means tertiary God or Creation or sun, moon or Earth. It is science of Atomic transcription and translation through which Almighty God Lord Natraz or Allah ho Akbar or Highest center of universe gives first order of universe. Having received the order rest BBBs or higher centers send second order to lower centers and from lower centers via third order of universe to target bbb's. Target BBBs work accordingly and nature takes new properties, shapes and laws. That is how Lord Natraz or Allah ho Akbar works in universe. MEANS KUN FAYA KUN. There is a feedback from all higher centers to Highest center of universe. Hence Quran talks about how Allah orders by quantum entanglement and things do happen. Prayer is fed back to Highest center by our bbb by quantum entanglement. ( Fig 22)
